MID-TERM ADDRESS

OF

Hon. Edward F. Harrington

MAYOR OF NEW BEDFORD
MASSACHUSETTS

TO

City Council

JANUARY 3, 1963

BRADBURY-WARING, INC.
New Bedford, Mass.

MID-TERM ADDRESS
OF
HON. EDWARD F. HARRINGTON
TO
CITY COUNCIL
JANUARY 3, 1963

MR. PRESIDENT, GENTLEMEN OF THE COUNCIL:

This is an age of progress and speed. In this era when telstars and rockets are seeking out the mysteries of outer space and defense projects such as the Texas Towers become obsolete within a decade, New Bedford cannot stand still. It must move forward to keep up the pace. I have been in office but one short year. I am here on this anniversary to give an account of my stewardship, to outline the enlivened pace assumed by our City of New Bedford to make this once again a City of pre-eminence. The strides we have taken are great, but must be quickened. The plans we have in store are designed to make the first two years of my administration commensurate with the age in which we live. If I may beg your indulgence, I would like to refresh in your memory the strides we have taken in the past year and to outline the revolutionary goals we have set for ourselves and the City.

One of the most sensitive areas in any municipal administration is taxation. It is a foregone conclusion that we must pay for progress, and that with our present tax laws, nearly the whole burden falls upon property owners. High taxes directly affect all of our homeowners, and indirectly nearly all of those who rent property. Taxes could, if permitted to go

much higher, seriously affect the ability of many of our homeowners to keep their homes or frustrate their efforts to give their children an education and the benefits they deserve. Taxes are also important to the business community.

A very high tax rate is a deterrent to industrial growth, and to our ability to attract new industries. One of the most frequent questions asked of me, and I am certain of you also is, how high will the taxes go.

In 1962, in all categories except welfare, the City of New Bedford paid its bills. In previous years deficits were allowed to pile up in all categories with reckless disregard for the fact that someday the piper would have to be paid, and with the hope that these deficits would be someone else's headache. The inevitable came in 1962 when we were forced to contend with the failure of others to meet the financial obligations of the City when they became due. I was forced to contend with a financial situation which was almost disastrous.

People who had built or bought homes with the expectation of a reasonably stable tax rate were financially distressed by the irresponsibility which characterized the last decade of municipal management. Others have taken it upon themselves to predict that there will be a ten dollar tax increase during 1963. Unlike the 1962 tax rate, the rate in 1963 is my responsibility and my responsibility alone. Before the rate is set, I will have been in office a sufficient time to effect changes and economies directed at keeping taxes within reasonable limits. Of course, there are certain fixed costs over which I have no control, such as welfare and schools. These two categories alone amounted to nearly 80 percent of last year's overall budget. But, there are costs which I am empowered to control, and these will be cut to the bone. In so doing, I will not eliminate needed services, nor fail to appropriate a sufficient amount of money to meet all necessary expenses. I will, however, eliminate services which I consider unnecessary or too costly, and I will not tolerate waste of any kind.

A year ago, the citizens of New Bedford placed a tremendous trust upon me. This trust shall be honored by my doing everything within my power to keep taxes down to a level which is not unduly burdensome to our City or to any of our citizens or business men. Furthermore, I shall honor this trust not by deficit financing, not by mortgaging your tomorrows, but by a program of continuing sound fiscal management.

In 1962 our tax collection program was changed. These were the first changes made in the program in many years. On December 31, 1962 the City of New Bedford had \$100,000 less in unpaid poll, personal and real estate taxes than on the same date a year before. This is positive proof of the effectiveness of the new tax collection systems. It also assures all those hard pressed taxpayers that more people who actually owe taxes are paying their fair share of the tax burden.

This year also we are moving up the advertising date for delinquent real estate taxes from March to January 17, 1963. This is a step calculated to encourage earlier payment which will reflect to the benefit of all our taxpayers.

Due to improved tax collection procedures, due to necessary tax foreclosures, due to a much tighter administrative control than employed previously, and due to a conscientious regard for the future of our City, the revenue cash position of the City of New Bedford today is much more favorable than it was on this date one year ago, shortly after I took office. In January of 1962 the revenue cash position of the City of New Bedford was approximately \$404,000. Today, we have available \$1,200,000. This means that barring any unforeseen emergency, the City probably will not have to borrow money in anticipation of taxes for the ordinary running of Municipal affairs during January of 1963.

Due to the extremely bad condition in which I found the City in January of 1962, I was forced to borrow on January 11. Of course, all money borrowed in anticipation of taxes must

be repaid with interest. What we are seeking to do is to save interest on borrowed money. We have during 1962, and will continue in 1963, to continually prod the Commonwealth to make payments owed to the City of New Bedford on time. A serious problem which has confronted this City and the other cities and towns in this Commonwealth is the failure of the State to pay its share of welfare and other costs until they are long overdue.

On December 29, 1961, a settlement was made for the City of New Bedford by a lame duck administration of \$60,000 for the acquisition by the City of two acres of land in the south terminal area. This was a negotiated settlement which I strongly opposed. The assessed valuation of this particular piece of property was \$13,649.00. In December of 1962, during my administration, while many of you were busy with other matters, the damages were set for the land taking by the City of the Eastern Electric Manufacturing Plant, also in the south terminal area, by a jury in the Bristol County Superior Court. The assessed valuation of this particular piece of property was \$102,000, and included a building with valuable fixtures contained therein. A Superior Court jury awarded Eastern Electric only \$75,000 for the entire land and building, which points out more forcefully than anything I ever could say concerning the tremendous disservice to the City in the \$60,000 settlement in latter part of 1961, which many of you in the Council have asked be investigated. All land damage cases during my administration have been tried and will be tried except in instances where our appraisers advise us that the fair market value of the land taken is in close proximity to the demand of the former owner.

There was another settlement made in the latter part of 1961, which I will go into in greater detail on a future occasion. This settlement was made on December 28, 1961 and is one of the most amazing acts ever perpetrated by any Mayor of New Bedford at any time in the disservice of a City. This cost the City of New Bedford approximately \$50,000.

Settlements such as these are no longer being made and therefore our tax picture will continue to improve.

In recent years administrative policy in New Bedford has dictated constant additions to municipal payrolls of political friends without regard to the problems of the taxpayers. I have embarked on a year long study during 1962 of methods of eliminating unnecessary jobs and reducing the amount of our payrolls. During the early part of this year, there will be an announcement made concerning a survey of municipal employment practices at no cost to the City of New Bedford. Wages of all classifications of municipal employees were raised in 1962. Many of our employees feel that the compensation awarded to them was unjust, and not substantial enough for the types of work which they are performing. I felt that the increases that they were given, amounting to nearly \$800,000 were as much of a burden as the taxpayers could be asked to assume. There may be inequities in certain classifications or with regard to some employees. There may be adjustments which should be made according to good conscience and sound employment practices. It is extremely difficult for any one person to arbitrarily make these adjustments. There may be further changes which should be made in classifications. It is also difficult for any one person to deal with all of these matters independently. During 1962, I offered a plan for a Grievance Committee to the New Bedford City Council. Councillor Gaudette also offered a plan for such a committee. Your Body suggested parts of his plan and parts of my plan be included in the ordinance as it was finally drafted. This, I think, was wise. I feel that a grievance procedure for municipal employees should have been adopted many years ago. I ask you now in January of 1963 to take steps to make whatever changes you feel are in the best interests of the City of New Bedford and its employees, and to adopt an ordinance setting up a grievance procedure to promote better relations between the City and its workers. Independent of the report of any survey group in the study of municipal employment practices, I have some definite conclusions resulting from stud-

ies made by myself and by the Auditing Department. These changes should have been made years ago and now may be unpopular with some city employees.

The Municipal Garage will become a reality during January of 1963. We hope that in this year and the years to come, hundreds of thousands of dollars will be saved in purchasing parts and equipment and the freeing of men now repairing cars to do other work. We anticipate a very substantial savings during 1963 alone, and greater savings in the years to follow. I anticipate that the service will be better than it was when performed in individual City facilities.

In January of 1963 the collection of non-burnables will be integrated in the Department of Public Health from the Department of Public Works. We feel it will be much more economical to combine the two collections into one unit and to adopt a no hire, no fire policy. As the years go on, costs will be successively reduced. These changes should result in substantial savings without depriving anyone of his or her job.

I have been besieged with questions concerning the bi-weekly collection of trash. This matter will be given serious consideration before a final decision is reached.

A no hire, no fire policy has been in effect for a period of time, and will continue until such time as I am certain that every department is running with only that personnel actually needed for its day to day activities. There will be further reductions in force in municipal departments with an eye to reducing numbers of people required to do certain work in accord with a policy of saving money in the administration of our governmental activities.

In 1963, I will be forced to raise the entire amount of the Welfare deficit incurred during 1962, together with the amount borrowed in December of 1962 to meet payments. We are, therefore, paying in 1963 what we should have paid during 1962. I recently held a conference with the Commis-

sioner of Public Welfare for the Commonwealth of Massachusetts and found that the Welfare Department in the City of New Bedford in one of the few in the entire Commonwealth of Massachusetts, in any city of any size, which is not integrated.

Administrative and personnel changes which should have been effected many years ago will be effected during 1963 so that the City may have a smooth operating welfare program designed to pay those who are in need, but to keep an extremely watchful eye on the tax dollar. The State is compelling us to retain additional social workers to supervise the program. However, the Commissioner has agreed that the City of New Bedford will be reimbursed in advance 87% of the salaries of the additional social workers hired in the A.D.C. program. On this basis, and with the assurance that these workers will be employed for the purpose of attempting to cut back the staggering burdens in this category, I will deviate from the no hire, no fire policy in hiring the additional workers demanded by the Commonwealth of Massachusetts.

I regret to say the New Bedford Incinerator problem is the same now as it was this time last year. You all know what the problems are. I have suggested what I think is a method of solving them. You may differ. I certainly am ready and willing to listen to any alternative you may have for their solution.

A new process has been developed for destroying garbage and converting it to use as a fertilizer. I have sent to all manufacturers who make this product an inquiry on behalf of the City for specifics. I will forward these specifics to you as soon as they arrive. I do ask, however, that in 1963 you either adopt my solution or come up with an alternative solution to this very disturbing problem.

Remember, we have applied for a Federal grant to aid us in paying for Incinerator changes. Chances are excellent that we will receive an award.

I firmly believe that during the month of January, 1963, the City of New Bedford will receive the first grant under the Accelerated Public Works Program given to any City in Southeastern Massachusetts. The grant will be in excess of \$178,000 for the new Public Library Branch in the South End of our City. This Library will be an architectural landmark in our South End, and will be completed this year.

The South End Police Station is a reality. During 1963 as soon as the new Library opens interrogation rooms and additional facilities will be added to the former library building to provide adequate police protection for the South End.

New Bedford's parking problems still require the attention of myself, your Honorable Body and the Traffic Commission. The parking garage went into operation during 1962. Despite a very bad initial start, we are hopeful that the tide has turned and the garage will start to pay for itself. Because of greater usage by the public, drivers have acquired more confidence in the facility and are impressed with the convenience that long hour parking offers.

The parking meters have been removed from the St. Luke's Hospital parking facility.

A piece of property located in the South Water Street area has been acquired by the City of New Bedford in lieu of taxes assessed in previous years. The first land damage case for the taking on the Morton Street location has been tried and decided by the Superior Court. The newly acquired land, together with all previous acquisition made by the City in the area will be prepared for parking during the early part of 1963. Plans and specifications are presently being prepared by the Building Department in order that the contracts may be let out during the early part of the year.

During 1962 money was borrowed for the purpose of paying the deficit incurred during the previous year for the Kerwin Parking Facility and for the land takings in the South

End. These matters have now been straightened out and I anticipate no further borrowing. Whatever sums remain from the borrowing after the completion of land taking and site preparation work in the South End, I suggest be used for the creation of further off-street parking either in the North End or in the Center of the City.

Others have promised parking on South Water Street, but at last it will become a reality.

Today, we had an extremely important development. We have been unofficially notified that New Bedford will be the first City in the Commonwealth of Massachusetts to receive the approval of the Federal government for participation under Public Law 606, providing for matching funds for both personnel and administration expenses of our Civil Defense Organization. This means, in effect, that approximately one-half of New Bedford's Civil Defense expenditures will be reimbursed to us, retroactive to January 1, 1963. This new achievement is another first in New Bedford's long history, and is the result of cooperation between the Director of Civil Defense, Mrs. Anne Fitch, Mr. Louis Saba, Director of Area 2 and myself.

The City of New Bedford has long had a fine school system staffed by experienced and able personnel. We all realize that buildings alone do not make a fine school system, but a building program is essential if we are to replace schools which, through age, have become totally obsolete. In 1962, New Bedford was selected and requested by the American Friends Society to enroll five students from Virginia in our system because they realized the calibre of instruction which we offered. There has been no comprehensive long range school building program in New Bedford since the Keith Junior High and two elementary schools were planned under the administration of the late Arthur N. Harriman. It is important that we plan not only for today, but for the future, because our children and their minds are a paramount interest to each and every one of us.

During 1962, I have worked with the School Committee in planning for the urgent physical needs of our system. Many of you attended the meeting which I called at the Keith Junior High School after the dedication of the new Hathaway Elementary School. At an early meeting, I will submit to you bond issues calling for either one or two projects. The firm of Bishop and Hackett, Architects, have been retained by the City at the request of the School Committee to set approximate cost figures for urgent building needs.

I will advocate that you adopt either one or both of the bond issues as your feelings and conscience dictate, bearing in mind the needs as balanced against the cost of bonding. In the first proposal, I will suggest the building of the Parker Street School to replace three schools each more than 100 years old. The land for the building has been acquired. Also in the proposal will be funds for the addition of five urgently needed class rooms at the Keith Junior High School, necessary work in the Roosevelt Junior High School and the construction of a badly needed cafeteria on ground level at the Normandin Junior High School. The second bond proposal will be for the construction of additional class room facilities for an integrated New Bedford High School.

I realize that these matters may require considerable study by you. However, I urgently request that you give the matters your very early consideration during 1963 so that our children may be afforded opportunities equal to those given by other cities and that our fine standards of education may continue. This program has been badly needed for a long time and is important enough to be given very high priority in the list of all of your deliberations.

When industries seek a site for relocation one of the concerns of all executives is the condition of the schools which their children will be attending, and the quality of the teaching staff offering them instruction. If we are to stay in competition, and if we are to continue to attract industries, we

must continue to improve our physical plant and the quality of instruction offered.

In 1962, an ordinance proposing a recreation committee was submitted by me to your Honorable Body. A group of responsible men and women in the community spent many months investigating the recreational needs of the young and old in the area alike. As a result of their investigation and conferences with members of the Park Department and the Park Board, they suggested that a recreation commission be formed with a sufficient amount of power to set up a better recreation program encompassing all age groups in the community. I thereupon submitted an ordinance encompassing their suggestions. I firmly advocate the creation of a separate recreation department without any present increase in the allotment of funds. This is another facet of our community life which has been neglected over a long period of time. The Superintendent of Parks, who is a very able and energetic man, in his particular field, admitted that the City had no recreation program. This situation must be corrected.

Very possibly since this matter has been allowed to lay on the table in the Council, you may have differences of opinion with regard to certain features in the ordinance, or you may desire changes in it. I am available at any time to sit down and discuss the matter with you in the hope of reaching a compromise, if necessary, which will benefit all of the people of all age groups within the community and permit us to spend our tax dollars in an effective way rather than waste them as we have been doing for many years.

I shall, therefore, await your suggestions in the matter.

I propose, during 1963 with your co-operation, to establish a park for the residents North of Lunds Corner. During 1962, the Park Department, at my request, voted to take a portion of land to the rear of the Fire Station located in the area. After further investigation a decision was made that the size of the land prohibited the full use of the area as a full recreation

center, and rather than give these children a second class facility, the land taking was abandoned. Sometime during the first two months of the year, I will submit a further suggestion to the Park Board and then to the City Council for the new facility.

During 1962, we have made strides in bringing our parks up to the physical condition we feel they should be in a community of this size. Buttonwood Park in particular has undergone a major road rebuilding program. The pond has been fenced with an anchor fence, and by next summer there will be a new concrete block buffalo house in the zoo.

The children in the North End of our City have had a total lack of swimming facilities since the closing of Sassaquin Pond. High costs and long distances in reaching south end beaches have prevented many children from using our beaches. I propose during 1963 to initiate plans for a pool in Brooklawn Park.

In 1963, I hope to recover from the Commonwealth of Massachusetts damages for the taking and disruption of our Municipal Golf Course. At the public meeting to be held on Wednesday, January 16, 1963 the positive plans for repairing and replacing holes will be presented by the golf architect retained by the City of New Bedford. He will also present his estimate of damages. I hope that we can start construction on the new holes in 1963 prior to the time that the bulldozers actually start to disrupt the usage of the course.

1962 saw the cataloging of land owned by the City of New Bedford at an extraordinary low cost to the taxpayers. I have already discussed this matter with the Chairman of the City Council Property Committee, and hope to add to the tax rolls in 1963 many parcels of land which have lain idle for many years.

The work on the Coggeshall Street Bridge should have been at an advanced stage of progress at this time. The bureau of Federal Roads refused to participate financially with

the Commonwealth of Massachusetts if an award for the construction was made to the low bidder. The Department of Public Works has voted to award the contract to the second low bidder, subject to approval of the contractor by the Bureau of Public Roads. All of the information required by the Bureau of Public Roads has been sent by the Commonwealth of Massachusetts to Washington, D.C. for consideration by the Bureau.

We hope that a decision will be forthcoming during the month of January, and that the project will be substantially completed during 1963.

One of the keys to New Bedford's future greatness is its waterfront. During 1962, great strides were made in improving the area and preparing for its ever important role in our City's economy. The Maritime Terminal site preparation work, after many disappointments, is finally in progress. As you probably know, after the project lay dormant since 1960, we were given assurances by the Commonwealth of Massachusetts that State participation would be forthcoming. When all legal hurdles had been cleared, we were advised that unfortunately even though a commitment had been received, there were no State funds available which could be used for the project.

We have pursued an application through the Area Redevelopment Authority for a Federal contribution. We have recently completed submitting briefs and detailed statements concerning the legality of Federal participation in the project. I have been advised by the Chief Counsel of the A.R.A. that project approval will be cleared in the very near future, and the entire matter referred to another government agency for a determination as to the amount of money the Federal Government can contribute to this project. We will continue to seek from the Commonwealth of Massachusetts some of the State aid which was previously promised to the City. A bill has been submitted to the Legislature for this purpose.

I expect that during 1963 we will receive Federal reimbursement and I hope some reimbursement from the Commonwealth of Massachusetts. A local contractor was low bidder for the site preparation work, and is currently engaged in completing the project. The work is progressing rapidly.

Long-term lease arrangements have been entered into between the City of New Bedford and large waterfront lessees. Long-term leases add stability to all waterfront industries permitting them to make capital improvements and engage in long-term growth plans. This stability was needed on the waterfront in order that our fish processing industry could expand and grow with the community.

1962 saw Fulham Brothers, one of the nation's largest fish processors, opening for business on our waterfront. 1963 will see plant expansion and employment of up to 100 workers by this firm.

Two new parking areas have been acquired and have been prepared to preserve badly needed pier space for actual waterfront productivity. These areas have been needed for a long time.

Every inch of space on Homer's Wharf has now been rented, and is in actual use for our fishing industry. A valuable area at the end of the Wharf which lay idle for three long years has been torn down and fine new facility for fish unloading is being built with private capital. The owner of the building being constructed has a long-term lease with the City. A considerable amount of work has been done on Homer's Wharf in replacing pilings which have been damaged over the years and needed replacing in order to preserve the pier and permit proper dockage for the unloading of fishing vessels.

During 1962, millions of pounds of tuna were unloaded on New Bedford's waterfront. This tuna was unloaded from vessels under the control of many of the larger tuna companies in the United States. During 1963, we expect this to continue on a much larger scale and we have high hopes that during

this year we will receive a commitment from at least one major tuna cannery that a plant will be located on New Bedford's waterfront. If this in fact becomes a reality, it will give added impetus to our waterfront's growth and supply work for many of our people.

The largest single project of urgent need confronting the City at the present time in stimulating waterfront growth is the construction of a fish pier. This will be an extremely expensive project, but I would like to outline to you briefly what steps have been taken up to this point with relation to the needed fish pier.

In 1960, plans were drawn by a Boston engineering firm at the request, I assume, of the Division of Waterways for a finger-type fish pier to be located at the south terminal facility. These plans were approved by City Officials in 1960 and nothing further done until 1962 toward bringing about the construction of the needed pier. During 1962, we have held conferences with engineers, industry officials, persons familiar with the construction and building of piers, and those familiar with the needs of our fishing fleet and discarded the finger-type pier plan. It was the nearly unanimous feeling of everyone concerned that this was not the type of facility needed by New Bedford to insure future growth of the area and to provide the fishing fleet with the services it requires. We next requested a study from the A.R.A. to determine if there was ample water for a bulkhead type pier in the area and whether or not such a bulkhead type pier would be practical in the south terminal. We received a grant of \$5,000 from the Area Redevelopment Authority. A study has been completed and the answers in both respects are in the affirmative. Next week a meeting will be held between the City Planner, the Executive Director of the Harbor Development Commission, Engineers and representatives of all phases of the fishing industry to determine how long the bulkhead pier should run in order to properly fulfill our needs. When this has been determined, applications will be filed with the Federal Government for

study and planning grants, and later for a construction grant enabling us to use only those City funds which are absolutely necessary to complete the project. Without having estimates before us, it is difficult to project the actual cost. I do, however, know that the over-all cost of the bulkhead pier, which will be more valuable to New Bedford, will be less than the projected cost of the finger-type pier. So, therefore, even if we receive Federal grants, the cost to the people of the City of New Bedford must still be high, but the stakes are also high. I hope to have the plans for the pier completed in 1963 and actual building of the long needed pier started during this year. The development of the Maritime Terminal has been costly and time consuming. Many hours have been spent by several City Departments on trying to clear away obstacles and red tape necessary to obtain outside funds to make this project financially feasible. This administration is presently working on a plan to complete this project in one step through use of private funds and at no cost to the City. New, sorely-needed waterfront space will be made available to incoming industries to provide jobs for our citizens and revenue for the City at no cost to our government. We have made preliminary studies. Early in 1963, the Executive Director of the Harbor Development Commission and I will take steps to cause the City of New Bedford to be declared a free port to give added stimulus to our waterfront development. This will enable importers to bring in their raw materials from foreign countries and postpone payment of duties thereon until such time as the commodities are to be used by them.

URBAN RENEWAL: In 1962, we made great strides in our urban redevelopment program. Our plans will begin to go into execution during the year 1963. We are within the schedule that has been prepared.

The City of New Bedford received a \$79,000 grant during 1962 as the Federal share of our over-all program. We have retained a director for the redevelopment authority, Mr. Howard Baptiste. In the spring of 1963, public hearings will be

held to give everyone in the community an opportunity to know, understand and participate in the urban redevelopment program. This program is essential to our complete development of the waterfront in order to make space available for secondary industries and expansion of seaside industries and to provide necessary access roads for the proper transportation of our sea products.

For a number of years no steps have been taken to preserve and improve the purity of New Bedford's water. Our system has been allowed to deteriorate.

New Bedford must immediately take bold steps to preserve one of its most priceless assets. An abundant supply of inexpensive water is invaluable in our attempts to attract new industries to the City.

We are daily negotiating with companies who must have pure water for their refined manufacturing purposes.

In 1963, we will retain the services of chemists to clearly point out any deficiencies that exist and suggest methods of clearing them out. This year we will correct these problems and sweep away 10 long years of neglect.

INDUSTRIAL DEVELOPMENT

On January 1, 1963 the best estimate of labor figures for New Bedford is that there are 59,330 people in full employment as compared with a figure of 57,170 job holders a year ago for an increase of 2,160 employed workers in a year. These increases are reflected mainly in the increased production of many plants presently located within the City of New Bedford.

There are presently a total of approximately 350 people employed in our Industrial Park.

In March or April of 1963, it is expected that Heidenberg Textile Manufacturing Company will commence operations

in the City. It will join with our fine Cameo Curtain Company to give New Bedford probably the strongest curtain manufacturing industry anywhere in the United States. Presently repairs to the building are being completed and machinery is being installed. It is expected that approximately 500 jobs will be available for New Bedford inhabitants during the year in this plant.

Shawnee Mills commenced operations in New Bedford in 1962. It is employing 50 people and expects to expand and increase employment during 1963.

Only today we announced the coming to New Bedford of Hancock Industries with a probable employment of 100 people, mostly males, before the end of the year.

Industrial development is extremely difficult to predict or to foretell. The Industrial Development Commission, the Industrial Foundation and myself have devoted hours and hours to contacting, interviewing, and soliciting industries throughout various parts of the United States. We feel we have left no stone unturned in trying to attract industry to our City. We are in competition for these industries with many other areas, some of which can offer much more by way of land grants, periods of no taxation, and actual money gifts. During the time we have been gaining additional jobs through continuing industrial confidence in community growth, we have not been losing employees. This has not been the case in previous years where the loss of employment far exceeded any new employment created.

1963 will be the brightest year in New Bedford's industrial rebirth since the decline of our textile industry. The year 1963 will see commitments made to the City by major industries which will finally bring about the industrial resurgence which we have all been awaiting, and of which we all knew that New Bedford was capable.

All of us here will be proud that we are a part of this rebirth.

16th Annual Report

of the

AIRPORT MANAGER

of the

NEW BEDFORD MUNICIPAL AIRPORT

For the Year Ending December 31, 1962

BRADBURY-WARING, INC.
New Bedford, Mass.
1963

December 31, 1962

To the Honorable Edward F. Harrington, Mayor, and the
Gentlemen of the City Council of the City of New Bedford.

Gentlemen:

There is enclosed the Annual Report of the Airport Manager for the year 1962.

We are happy to report that our airport has maintained its high standard of safety this year. Our able and conscientious personnel are to be congratulated for this record.

Shawmut Avenue, the principal approach to our airport, is now in process of being widened and resurfaced, and this will make it more inviting to the public, and help insure the financial interests of our tenants.

Our goals for the future are to:

1. Improve commercial air schedules and service.
2. Attract potential air passengers from neighboring cities and towns to use our facilities, and
3. By leasing our fine real estate at the airport, endeavor to make it financially self-supporting.

The Airport Commission concurs in the recommendations of the Airport Manager for the next year.

Respectfully submitted,

N. B. AIRPORT COMMISSION

LOUIS J. OSTRIC,

Chairman

NEW BEDFORD AIRPORT COMMISSION

Year Ending December 31, 1962

Replaced by Raymond J. Thomasset

December 31, 1962

The New Bedford Airport Commission:

Gentlemen:

December 21, 1962 marks the end of the sixteenth full year during which the City of New Bedford has operated its Municipal Airport.

The number of takeoffs and landings recorded by the Federal Aviation Agency Control Tower during 1962 total 38,669 compared to 41,440 during 1961, a decrease of 2,771.

The following percentages, based on the total number of takeoffs and landings of the past two years, show clearly the type of aircraft now using the field:

TYPE	1961	1962
Air Carrier	17.20%	17.16%

Itinerant Aircraft:

USAF	6.37%	4.85%
Navy	2.47%	2.36%
Civil	46.16%	55.00%
	-----	-----
	49.16%	56.37%

Local Aircraft:

USAF	12.69%	11.47%
Navy	5.00%	5.09%
Civil	10.11%	27.80%
	-----	-----
	9.91%	26.47%

The following chart shows the number of takeoffs and landings recorded during the years 1961 and 1962 and the number of days they were recorded.

Number of takeoffs and landings	Number of days during the year	
	1961	1962
200 or more	41	19
100-199	181	193
75- 99	36	52
50- 74	34	33
25- 49	22	24
15- 24	12	17
10- 14	7	6
5- 9	11	11
1- 4	13	3
0	8	7

HIGHLIGHTS OF THE YEAR'S ACTIVITIES:

The outstanding achievement of the year was the awarding of a contract to the Simmons Construction Company for the rebuilding of the Shawmut Avenue entrance to the airport under the Chapter 90 Program of the Commonwealth of Massachusetts. This was accomplished primarily through the efforts of Airport Commission Chairman Louis J. Ostric and Commissioner Fred N. Darwell.

Actual construction commenced in November with an estimated date of completion of July 1963. The finished product will be a modern, well lighted, mile long, forty foot wide road having twenty foot grass shoulders on either side. This will finally eliminate what has been one of the poorest approaches and eye-sores in the country to an airport of comparable size.

During the year 1962, with financial assistance from the Federal Aviation Agency and the Massachusetts Aeronautics Commission, we resurfaced the instrument runway and applied new All Weather Markings under contract to Warren Brothers Roads Company for a total cost of \$122,377.16, including engineering. This overlay served two purposes. First, it gave us a surface free from cracks and frost heaves; and secondly, it increased our load factor to 40,000 plus pounds single wheel loading which is 15,000 plus pounds greater than the previous rating.

Because of the low unit price of the bituminous asphalt used in the runway overlay the Airport Commission voted to surface the 1,000 foot gravel access road on the west side of the field.

In November the Federal and State Governments, through their respective agencies, notified the New Bedford Airport Commission that funds would be available for the overlay and obstruction removal of the other runway and the installation of a new 12" water main, all of which will be accomplished in 1963. This came as good news since both projects are very necessary if we wish to continue to provide a high standard for the flying public.

The clearing of approximately 80 acres of property for industrial purposes is continuing but due to a shortage of manpower and equipment the pace is rather slow. However, I feel sure that our efforts will show favorable results in the very near future.

The newly organized 9120th Air Force Recovery Squadron that located at our airport last year has been very helpful in allowing us the use of their equipment and manpower when needed. This arrangement is saving the airport hundreds of dollars a year at the present time and I feel that it will be even more beneficial in the future. Also, during the year they entered into an agreement with the City for office No. 1 on the first floor of the administration building for a yearly rental rate of \$585.00.

The procedure used in acquiring surplus government property for airport use has been streamlined considerably through the combined efforts of the Federal Aviation Agency and the Massachusetts Aeronautics Commission. Excess and surplus government equipment is constantly being screened by members of the Massachusetts Aeronautics Commission, who incidently located our D7 Bulldozer, for distribution to all Massachusetts airports.

Due to illness Mrs. Albertina Contardo, the restaurant concessionaire, was forced to terminate her tenant-at-will agreement as of September 1, 1962. For two months following her termination we experimented with a machine-type food vending opera-

tion. Although this has been successful at some of the larger airports it proved very unsatisfactory at this location.

In October the airport commission voted to equip and remodel the restaurant area in the administration building with the hope that this would generate more business which in turn would increase our income. The cost of this project will be approximately \$3,800. This is the first capital expenditure in that area since the original construction eleven years ago.

In December after interviewing numerous candidates to operate the restaurant concession the commission chose Mr. Philip J. Poutre with an official opening date of January 1, 1963.

Another first at the airport this year was the appointing of four additional members to the airport commission bringing the total number of members to nine. This change has enabled us to achieve a broader outlook in our planning for the future. New members appointed during the year were: Mrs. Clair F. Carpenter, Fred N. Darwell, Frank Golen, Jr., Raymond W. Leclair, C. Eric Lindell, William A. Silveira and Raymond J. Thomasset.

On the recommendation of the New Bedford Airport Commission the City Council, after a public hearing, voted to rezone the airport in its entirety to Industrial B with the exception of a one hundred foot buffer zone on the inside airport boundary which was zoned to Industrial A for the protection of the abutters.

Passenger traffic carried by Northeast Airlines from this airport during 1962 has again dropped below that of the previous year. The major causes for this condition appear to be a combination of the super highway and the high cost of hauling passengers by air for a distance of 200 miles or less. The aviation industry, as well as the government, are well aware of this situation that is effecting airports in our category and are making an all-out attempt to come up with a solution to the problem.

My recommendations for the year 1963 are as follows:

1. That we do everything possible to improve our scheduled air carrier service.

2. That we do all in our power to increase the revenue to the airport.
3. Continue to press for the following surplus government equipment:
 - a) One large foam crash truck.
 - b) One large rotary snow plow.

As in the past, the airport manager wishes to express his gratitude to all those who directly or indirectly assisted in maintaining and promoting the municipal airport which is one of the city's more modern facilities, especially the members of the airport commission who have given unselfishly of their time, energy and wisdom.

Respectfully submitted,

JASON G. TAYLOR
Airport Manager

SUPERINTENDENT AND INSPECTOR OF BUILDINGS

ANNUAL REPORT

1962

In accordance with Chapter 7, Section 158 of the City Code of the City of New Bedford, I hereby submit a report of the activities of the Superintendent of Buildings for the calendar year of 1962.

BUILDING DEPARTMENT

A total of Seven Hundred Two (702) permits were issued in 1962, amounting to Three million seventy-three thousand, three hundred forty-nine dollars (\$3,073,349.00). This was Sixty-eight (68) more permits than in 1961, but the total valuation was Five hundred seventy-nine thousand, three hundred seventy-two dollars and five cents (\$579,372.05) less in 1962.

Listed are some of the large permits issued in 1962:

Sun Oil Co.	
N.w. Cor. County and Middle Sts.	
New Service Station	\$ 25,000.00
Quaker Oats Co.	
E.s. No. Water St.	
Erect a building	216,320.00
Golub Furniture Co.	
127 County St. (rear)	
Erect a store	29,500.00
City of New Bedford	
Marine Products Lessee	
Homers Wharf	
Erect a loading platform	35,000.00
N. E. Tel. & Tel. Co.	
396 Acushnet Ave.	
Erect addition to building	120,000.00
First Safe Deposit National Bank	
Kempton, Watson and North Sts.	
Erect a bank building	56,000.00

First Safe Deposit National Bank Acushnet Ave. and Jireh St. Erect a bank building	56,000.00
WTEV Television, Inc. N.w. Cor. Spring and Eighth Sts. Erect a building; TV Studio	225,000.00
Chas. S. Ashley & Sons 11 No. 6th St. Alter for offices	50,000.00
N. B. Institution for Savings 1743-49 Acushnet Ave. Erect a bank building	80,000.00
Herman Steinberg Mt. Pleasant St., no. of Nauset St. Erect a building	35,000.00
Merchants National Bank 458 Dartmouth St. Erect a bank building	60,000.00
N. E. Petroleum Co. 280 So. Water St. Erect fuel tank	200,000.00

Specifications were prepared and bids solicited for the demolition of a metal building and concrete platform formerly used by the New Bedford Ice Co. on the northeast end of Homers Wharf. The contract was awarded to Paul G. Cleary and Co., Inc. on May 11, 1962 and the work was completed about June 19, 1962.

Sullivan-Foster, Inc. completed work on the Ernest W. Kerwin Memorial Parking Facility at William St., Second St., Barker's Lane and Acushnet Ave. The facility was dedicated on June 16, 1962.

Acting on behalf of the New Bedford Harbor Development Commission, the Building Department prepared specifications and obtained bids for the demolition of an unfinished, reinforced concrete building at 81-83 Front St. and an adjacent five-story brick building at 95 Front St. Bids were opened on July 23, 1962 and ranged from a high of \$66,000.00 to a low of

\$8,000.00. The contract was awarded to Gracia Bros., Inc., the low bidder. Work was completed in early December, thereby removing an unsightly building that had been a blight on the waterfront since 1945, when construction started and was never finished. Removal of these buildings will provide needed waterfront parking.

Specifications were prepared for extensive roof repairs to No. 8 Fire Station, corner of Acushnet Ave. and Davis St. The Glennon Roofing Company was awarded the contract on September 25, 1962 and work was completed November 23, 1962. Cost of the repairs was \$1,190.00

Although work on the Ellen R. Hathaway School was not completely finished, it was made ready for occupancy in September. Final acceptance of the school had not been made before the end of 1962 because of the contractor's inability to obtain, and therefore install, several items such as cork boards, picture screens, etc., on schedule.

In addition to regular inspections listed in this report, Building Department inspectors made one hundred thirty-three (133) inspections of buildings listed with the Relocation Service (Route 195) to determine suitability for those persons displaced by land takings.

The installation of oil burners in two of the three Municipal Building boilers was completed, and placed in operation, early in January of 1962. This installation not only eliminated the problem of smoke and soot in 1962 but resulted in lower fuel costs. Cost of oil in 1962 was \$2,562.61 less than the cost of coal in 1961.

SUMMARY OF BUILDING PERMITS

1962

	Permits	Estimated Cost
*New Construction	234	\$2,417,655.00
**Alterations and Additions	340	640,719.00
Heating	25	14,975.00
Demolitions	103
	<hr/> 702	<hr/> \$3,073,349.00

*NEW CONSTRUCTION:

Dwellings	139	\$1,015,200.00
Stores, Bus., Mfg.	25	1,190,620.00
Garages	35	37,050.00
Filling Stations	2	32,500.00
Miscellaneous Sheds, Coops, Signs	31	12,285.00
Hospitals, Schools, Institutions	2	130,000.00
	234	\$2,417,655.00

**ALTERATIONS AND ADDITIONS:

Dwellings	234	\$ 149,575.00
Bus., Mfg., etc.	92	436,729.00
Miscellaneous	9	9,765.00
Schools, Churches, Hospitals	5	44,650.00
	340	\$ 640,719.00

There were One hundred thirty-nine (139) new one-family dwellings and twenty-three (23) new apartments added by conversion.

Comparative Summary of Construction for the Last Five Years

Year	No. of Permits	Estimated Cost
1958	746	\$2,994,226.00
1959	772	2,638,054.98
1960	735	2,034,880.00
1961	634	3,652,721.05
1962	702	3,073,349.00

During the year 1962, the Department made 69 special investigations. Special investigations are made as a result of a complaint by a tenant or a neighbor relative to a violation of zoning or building code.

There were 68 sign applications during 1962 which were forwarded by the City Clerk to be approved by this department as to construction, site of location and method of erection and maintenance.

The Massachusetts state law requires that a thorough yearly inspection be made of all elevators, and a report of their condition made to the State Department of Public Safety.

There were 305 freight and 79 passenger elevators inspected during 1962.

Three new elevators were installed.

During the year, the elevator operators' licenses issued were as follows:

Renewals	111
New Applications	20
	<hr/>
	131

There were 26 appeals from the ruling of the Inspector of Buildings during the year 1962 relative to the application of the zoning ordinances.

Granted	22
Denied	3
Withdrawn	1
	<hr/>
	26

Appeals that are granted are reversals of the rulings of the Inspector of Buildings; while appeals that were denied upheld the Inspector's ruling.

Places of assembly must be carefully examined according to Chapter 143 of the General Laws, as amended, before a license for their use can be obtained. This includes every building or part thereof, used as a place of public assembly and capable of accommodating 50 or more people; where 10 or more people are employed; rooming houses and apartment houses having eight rooms or 10 people above the second floor.

The following places of assembly were checked and issued certificates during 1962:

	Renewal	New
Cafes, Clubs, etc.	78	2
Industrials	4	3
Mercantile	1	1

During the year 1962, 28 Rooming Houses having 635 rooms, were inspected. A report of each inspection was forwarded to the State Department of Public Safety.

Inspections were made on Boarding Homes and Convalescent Homes.

BUILDING MAINTENANCE

The maintenance men have been very busy making necessary repairs to the buildings under the jurisdiction of the Superintendent and Inspector of Buildings and repairs requested by other department heads.

Work performed in the Municipal Building consisted of normal repairs to wiring, heating and plumbing systems, carpentry repairs and painting.

Although closed, the City Infirmary where two watchmen are employed, must be constantly checked to prevent vandalism.

The Isolation Hospital is patrolled by the same watchmen. Periodic visits are made to this building to check heating, sump pumps and sprinklers. In September the Cerebral Palsy Council was given permission to use the west wing of the hospital until a contemplated building is completed. Due to the necessity of maintaining higher temperatures in the building, it was necessary to make extensive repairs to the burner and boiler which included a complete retubing job.

Various repairs were made to several Fire Department Buildings notably Fire Station No. 3 where interior and exterior painting was done in addition to repairing of doors, windows, floors, etc.

The Cemetery Department office was moved from the Municipal Building and extensive alterations were made to the Rural Cemetery office building to provide the new quarters.

At the Oak Grove Cemetery one side of the greenhouse was rebuilt with cypress lumber salvaged from the City Infirmary silo and florist benches rebuilt, stairs rebuilt and gutters were repaired. Exterior painting was also done.

Work at the Center Library included repairs to cabinets, shelves and doors; floors were patched; electrical wiring and heating system repairs.

Alterations were made at the South End Library to provide quarters for a Police Station.

Additional space was provided for the Handicapped Center on Rodney French Blvd. Asphalt tile floor was installed, counters altered and moved, new light fixtures installed, etc.

Miscellaneous painting, plumbing, wiring and carpentry repairs were made at the Lawler Branch Library, Wilks Branch Library, North and South End Comfort Stations, Butler Mill, Park Department buildings, Department of Public Works garage and yard, Wharfinger building, Incinerator Plant, New Bedford Airport, Y. D. Building, Civil Defense building and Homers Wharf.

Other miscellaneous jobs performed by the maintenance men included erecting bandstands, boarding up dilapidated buildings, installing posts and chains and construction of attendant's booth at the Kerwin Parking Facility.

The Veterans Administration Building (Sylvia Ann Howland School) required painting and other maintenance repairing, also, ten desks were picked up from the School Department, repaired, refinished and delivered to the Welfare Department.

The Central Police Station required some interior and exterior painting, carpentry, plumbing, heating and electrical repairs. Drains were cleared and floors patched at No. 5 Police Station.

Respectfully submitted,

EVELYN HENDRICKS

Clerk of the Cemetery Board

BOARD OF CEMETERY COMMISSIONERS

To the Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

The Cemetery Board herewith presents its sixty-eighth annual report.

Mr. Joseph Oliver, a laborer in our department for over six years, retired July 1, 1962.

The following price changes became effective January 1, 1962:

	Lot	Perpetual Care	Total
Two graves	\$80.00	\$80.00	\$160.00
Three graves	130.00	130.00	260.00
Four graves	175.00	175.00	350.00
Five graves	215.00	215.00	430.00
Six graves	260.00	260.00	520.00
Eight graves	338.00	338.00	676.00

Opening graves (adult) for brick, cement vault, steel case or crypt raised from \$35.00 to \$40.00, with the exception of openings for old age assistance cases — for crypt, as they remained at \$30.00.

The foundation charge of \$1.25 per cubic foot was raised to \$1.40 per cubic foot, and the minimum charge of \$10.00 remained the same.

As the result of two snowstorms of February 14 and 15, 1962, it was necessary to have our 1946 Pine Grove truck battery and motor replaced, and the plow on same was also repaired. The clutch on our 1958 Rural Ford Ranch Wagon had to be replaced. The total cost of these parts and labor amounted to two hundred forty-eight dollars and fifty cents.

Mr. Carl A. Arneson, Election Commissioner, was granted permission to use the Rural Cemetery office as a polling place for the State Elections that were held, September 18 and November 6, 1962.

At the request of the Kiwanis Club of New Bedford, our department featured a formal garden display for their Ninth Annual Spring Flower Show held Thursday, March 29 through Sunday, April 1, at the Hammond Auditorium of the Vocational High School.

Miss Sharon Wood, a student at the New Bedford High School, was assigned to our department, to act as Superintendent of Cemeteries on Student Government Day, May 10, 1962.

Two parcels of our land at the Rural Cemetery, one located on Grape Street and the other at Winterville Road and Rockdale Avenue, more specifically described as Lot 301, on Plat 35 and Lot 39, on Plat 27, which were of no further use to our department, were transferred to the Committee on City Property.

Our land on the west side of Caroline Street, near the Oak Grove Cemetery, described as Plat 70, Lot 173, was approved by the City Council, November 13, 1962, for transfer to the City Property by the City Council, November 13, 1962, for transfer to the City Property Committee, as it was also of no further use to our department.

The following notice was published in the Standard Times and the Portuguese Daily News for three days, in May, just prior to Memorial Day:

PUBLIC NOTICE

Lot owners in Cemeteries owned and operated by the City of New Bedford are, hereby, notified that all baskets, wreaths, sprays and potted plants placed on graves for Memorial Day, will be removed on and after June 10, 1962.

The Cemetery Board recommends that plants be planted in the ground, at the head of the grave, or in front of the monument.

Permits for planting may be had without charge at the office of the Cemetery Board, Room 201, Municipal Building, New Bedford, Massachusetts.

Per order of the Cemetery Board

John Thornhill, Supt. of Cemeteries

This was the second season that we had published such a notice.

A new stairway and new benches were made in our greenhouses, by the Building Department employees.

We purchased one seventy-inch (70") Locke mower, one eighty-four inch (84") National mower, ten twenty-one inch (21")-cut hand-propelled rotary mowers, a generator, a zip saw to replace one that was stolen, a Vee plow and a snow blower.

The need for new mowers and other grass-cutting equipment cannot be too strongly stressed, because in cutting the grass in all of our cemeteries, and in order to fulfill our contract with the lot owners, to keep our property in first-class condition, we must have this much needed equipment annually.

We sold forty two lots and fifty-eight graves, this year. Nineteen transfers of lots and graves were transacted, and forty-two burial right assignments were made. Of the total number of lots and graves sold, twenty lots and eighteen graves were sold at the Rural Cemetery, seven lots were sold at the Oak Grove Cemetery and fifteen lots and forty graves were sold at the Pine Grove Cemetery. One hundred sixty-one dollars (\$161.00) was turned into the City Clerk's office for the recording fees on these transactions.

Early in December 1962, it was decided that in January of 1963, our main office was to be moved from the Municipal Building to the office building of the Rural Cemetery, where all administrative work will be done. The new address is to be 149 Dartmouth Street.

We take this opportunity to express our gratitude and appreciation for the kindness, assistance and cooperation received from His Honor the Mayor, members of the City Council, Department Heads and our own department personnel.

Respectfully submitted,

RALPH E. SALTUS, Chairman

J. TUNSTALL PARHAM, Secretary

JOSEPH J. BEATTIE

SUPERINTENDENT'S REPORT

To the Board of Cemetery Commissioners

Gentlemen:

I, herewith, submit the annual report of the work done, under my supervision, during the year 1962 and recommendations for 1963.

RURAL CEMETERY

A tree on Lot 10, Section K which had been condemned, was taken down and the lot owners in this part of the cemetery were pleased. The trim on our toolhouse and garage was primed and painted. I hope we will be able to paint the office building in 1963. A 1962 International truck, with a V-shaped snow plow attached, was purchased for this cemetery and will be a big help in snow removal.

OAK GROVE CEMETERY

With the help of the Building Department personnel, we finished the West greenhouse. The students from Vocational High School installed the heating system. The new benches in the greenhouse have been a great help to us, as it is now possible to keep many of our stock plants in this house. We were able to prime and paint the toolhouse and garage in this cemetery. On May 6, 1962, Sergeant Carney Day was held and the public was invited to witness the unveiling of a Civil War marker at the grave of Sergeant Carney, who was a Congressional Medal of Honor winner. Section 7 has been revised. Now, we have a number of two and three grave lots for sale, in this section. One of the boilers in the greenhouse sprung a small leak and I hope to replace this boiler in 1963. Many of the trees on the Liberty Street side of the cemetery have been cut down and a portion of this land has been filled. We hope to continue with this work until the Liberty Street side has been completed. A large spruce tree, on the south side of the public tomb, was taken down.

PINE GROVE CEMETERY

We received a number of loads of dirt fill from the Department of Public Works, which we were able to use on our single grave section. All of the existing trees were cut down and we will continue this operation until all of this section has been graded. An American Flag was donated to us by Mr. John Fielding, of 1942 Acushnet Avenue, in honor of his brother who is interred on the World War ~~II~~1 Veteran's Plot. A snow plow which was broken while our truck was assigned to street snow plowing was replaced with a larger one, by the Department of Public Works, and works very well to our advantage. A new sewer and surface drain that was laid on the west side of Ashley Boulevard, by the Department of Public Works, has lowered the water level in the pond. The brook which emptied into our pond was tapped into the sewer, causing the lower water level.

GENERAL

We donated 180 geraniums, 180 petunias and 108 Dusty Miller plants to the Garden Club of Greater New Bedford for window boxes for New Bedford Public Library and the Municipal Building. Our department received an Award of Merit for our display in the spring Kiwanis Flower Show, and I recommend we again enter the show in 1963. The Army tank, located at the Franco-American Square, was painted this year and a new flag halyard was put on the flag pole. Vandalism continues to be a big problem for us. This year, windows were broken in the Snell tomb at Oak Grove Cemetery and ninety-four (94) grave stones were turned over in all of our cemeteries. Seventy (70) evergreen shrubs were purchased and planted in our cemeteries.

Lots in cemeteries under our care, namely: — Peckham West, Point Road, Friends, Griffin Street, Saint John's, Saint Mary's, Sacred Heart, Tobey, Reynolds and Congregational Church cemeteries were kept in good condition through the year.

I express my thanks for the assistance I have received from your Honorable Board, His Honor, the Mayor, members of the City Council, Department Heads and their personnel, and to the employees of the Cemetery Department for their cooperation during the year 1962.

REPORT OF CARETAKER
of
SOLDIERS' AND SAILORS' GRAVES

New Bedford, Mass.

January 1, 1963

To the Honorable City Council of the
City of New Bedford

Gentlemen:

I, hereby, submit the following report of the work done, during 1962, on neglected lots and graves where soldiers and sailors are interred, as authorized in Chapter 218, Acts of Legislature, 1920:

	Care of Lots and Graves
Rural Cemetery	184
Oak Grove Cemetery	151
Pine Grove Cemetery	23
Peckham West Cemetery	27
Congregational Church Cemetery	2
Griffin Street Cemetery	9
	<hr/>
	396

The amount appropriated for this work was \$2,500.00, and of this amount, \$2,487.73 was expended for cutting grass, leaving a balance of \$12.27.

Respectfully submitted,

JOHN THORNHILL,

Caretaker of Soldiers'
and Sailors' Graves

ANNUAL REPORT
BOARD OF CEMETERY COMMISSIONERS
for the year ending December 31, 1962.

IN CITY COUNCIL,

October 10, 1963

Received, placed on file and ordered printed in the City Documents.

CHARLES W. DEASY,
City Clerk

Attest:

CHARLES W. DEASY,
City Clerk

ANNUAL REPORT

OF THE

CITY AUDITOR

OF THE

CITY OF NEW BEDFORD

MASSACHUSETTS

FOR THE YEAR 1962

BRADBURY-WARING, INC.

New Bedford, Mass.

1963

CITY OF NEW BEDFORD

Office of the City Auditor

To His Honor Edward F. Harrington, Mayor of New Bedford,
and the Honorable City Council:

Submitted herewith are the following statements and schedules showing the receipts and expenditures for the City of New Bedford for the calendar year ending December 31, 1962 and the financial conditions.

Exhibit A—Balance Sheet as of December 31, 1962.

Exhibit B—Statement of Receipts for the year ending December 31, 1962.

Exhibit C—Statement of Expenditures for the year ending December 31, 1962.

Exhibit D—Summary of Receipts and Expenditures for the year ending December 31, 1962.

Exhibit E—Report of Appropriations, Receipts and Expenditures for the calendar year January 1, 1962 to December 31, 1962.

Exhibit F—Schedule of Bonded Debts and Sinking Funds as of December 31, 1962.

Exhibit G—Schedule of Indebtedness Payable at the close of the calendar years 1939 through 1962.

Exhibit H—Summary of Bonded Debt and Sinking Funds as of December 31, 1962.

The City of New Bedford closed the calendar year 1962 with a balance of \$827,555.68 in the Excess and Deficiency Account.

I certify that in the course of the audit of the books and records of the City of New Bedford the cash on deposit and securities representing the investments of sinking funds of the City of New

Bedford and several trust funds in the custody of the commissioners, trustees and city treasurer were verified and found that the same were in agreement with reports and records rendered by said commissioners, trustees and city treasurer to the City Council.

Respectfully submitted,

ROGER G. DUBE,

City Auditor

NOTE: *Frank P. Adamowski was City Auditor from January 1, 1962 through April 15, 1962, the period covering this report.*

CITY COUNCIL

Councillor Lino P. Torres was elected President at the organization meeting held on the first day of January, 1962.

Mayor Harrington presented his budget to the City Council on the 14th day of February, 1962. It was in the amount of \$18,411,784.94. On the 29th day of March, 1962, it was adopted by the City Council after being amended to \$17,570,541.56. In the meantime, the City Council sitting as a quasi committee of the whole had held four meetings at which department heads were interrogated as to their financial requirements.

In all, the City Council held twenty-four regular meetings and twenty special meetings during the year.

ORDINANCES

While numerous ordinances were proposed, the following were of general interest:

1. Rezoning Airport
property passed August 9, 1962
2. Creation of position of Second Assistant
City Planner passed August 23, 1962
3. Changing City Council
meeting date passed November 8, 1962
4. Establishing posts of Chaplain in the
Fire Department passed November 20, 1962
5. Eliminating metal license
plates passed December 27, 1962

CONCLUSION

Each and every employee has contributed to the excellent personal relations we have enjoyed with the residents of the city, and I wish to take this opportunity to commend them.

Miss Ellen M. Gaughan, the Assistant City Clerk, has rendered exceptional service, particularly in connection with matters requiring City Council attention and the answering of inquiries relative thereto.

Respectfully submitted,

CHARLES W. DEASY,

City Clerk

OFFICE OF CITY SOLICITOR

ROOM 203

MUNICIPAL BUILDING

December 12, 1963

To the Honorable
City Council
New Bedford, Mass.

Gentlemen :

We are submitting herewith the Annual Report of the Law Department for the fiscal year ending December 31, 1962.

During the year 1962 the City Solicitor and his assistants rendered 74 written opinions to the City Council and department heads, in addition to many oral opinions.

Industrial accident cases totalling 277 were reported to the Industrial Accident Board in Boston, which included the filing of reports, investigations, and a number of hearings before the Board members.

Many claims for personal injuries and property damage were filed and settled, injuries occurring as a result of defects in the highway and accidents involving city-owned motor vehicles.

All contracts awarded by the Purchasing Department were examined and approved by this office.

Deeds and leases of city-owned property were drafted and also orders for easements, street alterations and layouts.

There were 18 cases entered in the Land Court for foreclosure of tax titles and many letters were sent to property owners with regard to unpaid taxes, which resulted in an added collection for the city for the 1962, taxes that otherwise would have remained on the books as uncollected.

The city purchased the Bishop Grace property at 709 County St. in March of 1962 for \$31,718, and took by eminent domain the house and land at 9 Parker St., adjacent to the Grace property.

The city accepted a quitclaim deed from Hilda Garston, Trustee, in lieu of taxes for property at 912 So. Water St.

The Superior Court jury awarded \$6,800 to Janina I. Parent for land taken by eminent domain in the south-end for off-street parking purposes.

In December, also, Eastern Electric, Inc. was awarded \$75,000 by jury in the Superior Court. This case was also a land damage suit for property on Prospect St., taken for a common public landing.

The city granted easements to My Bread Baking Co. for the purpose of transporting flour underground across a street; to Emmalene Holding Corporation for the purpose of passing over city-owned land bounded by Manomet St. and Coffin Ave.; and a perpetual easement to the New Bedford Gas and Edison Light Co. for the purpose of working on land owned by the city under lease to Maritime Terminal, Inc.

This office also assisted in the preparation of applications for various governmental financial assistance, both state and federal, and in the implementation of these applications by conferences with the officials of those governments and the preparation of briefs and assembling of evidence to meet their objections.

The following is a list of suits pending against the city as of December 31, 1962:

LAND DAMAGE SUITS FOR TAKING OF LAND BY EMINENT DOMAIN

Jesus Amaro, et al - Off-Street Parking
 Antonio C. Andrade, Tr. - Off-Street Parking
 Helen M. Grumbt, et ali - Pumping Station
 Joseph D. Gusenoff - Common Landing Place
 Samuel Kaplan - Off-Street Parking
 Louis A. Rousseau, et al - Off-Street Parking

PERSONAL INJURIES AND PROPERTY DAMAGE SUITS RESULTING FROM ALLEGED DEFECTS IN PUBLIC WAYS

Izaura Avila	Hazel Hathaway
Eunice Bastoni	Jeanne P. Larochelle

ANNUAL REPORT
OF THE
CHIEF
OF THE
FIRE DEPARTMENT
NEW BEDFORD, MASSACHUSETTS

FOR THE YEAR ENDING DECEMBER 31, 1962

Milton C. Andrews, Chief of Department

—Reynolds-DeWalt

FIRE DEPARTMENT REPORT

Mayor of the City of New Bedford —

Dear Mr. Mayor:

I respectfully submit the Annual Report of the operations and functional status of the Fire Department for the year 1962, together with the recommendations that I consider necessary for maintaining and increasing the efficiency of the Department.

The total of alarms received for "Fires" and "Non Fires" for the year 1962 is 1,655.

SUMMARY OF ALARMS RECEIVED

Fires	819
Emergency Calls, other than fires	617
No Fire Found, Sprinkler Trouble, Etc.	97
False Box Alarms	83
False Telephone Alarms	35
Out of City Responses	4
TOTAL	1,655

Of the actual 819 fires, 702 originated as "Still Alarms" and in 146 cases were followed by "Box Alarms" for the same fire. Of the 819 actual fires, 117 originated as "Box Alarms" and in 15 cases, calls for additional apparatus were sent out by "Still Alarms" for the same fire.

Total "Still or Telephone Alarms" transmitted from Headquarters	827
Total "Box Alarms" transmitted from Headquarters	360
	1,187

Of the total alarms transmitted, there were 819 actual fires. There were six Second Alarms during the year.

The total fire loss for the year 1962 is \$360,621.71, of which the loss in buildings is \$244,554.50, the loss of contents of buildings is \$96,779.54, the loss on auto fires is \$17,679.90, the loss on boats is \$140.00, and the loss on aircraft is \$1,467.77.

The fire loss this year exceeded that of 1961 by \$148,537.89. The increase is reflected in the number of second alarms in 1962 (six) against one in 1961. However, despite the increase, our per capita fire loss of \$3.30 compares most favorably with the national average of \$7.97.

The Department responded to 617 emergency services which include resuscitator efforts, pumping out of flooded cellars and boats, removal of refrigerators that were leaking sulphur dioxide gas, and numerous other types of services which this Department classes as emergency Public Service. May I state that the above calls were made as a part of the emergency service this Department provides the citizens of our City.

As authorized by Section 19 of Chapter 148, General Laws, I granted 3 Permits for Blasting.

The capable staff of Chief Officers who are responsible for administrative and firefighting efficiency in their respective Districts, in addition to a myriad of other duties related to the Fire Service, are to be congratulated for their unquestioned dedication and support to this office.

Deputy Chief Frank H. Cleveland, District Chiefs Charles J. Armanetti, Edward J. Jablonski, Daniel L. Piekut, Alphonse Piekut, James E. Harwood, Gordon W. Graham, Fred Osuch and Richard T. Gaughan made approximately 576 inspections during the year to check-out complaints and remedy hazardous fire conditions. They granted 908 Open Air Fire Permits after visitation for assurance of fire-safe conditions.

The Home Fire Inspection Program was continued under the direction of Deputy Chief Frank H. Cleveland. I wish to compliment our personnel in this phase of Fire Prevention. The diplomatic and efficient manner in which Company personnel conducted these inspections is highly commendable. A total of approximately 4,000 buildings and 5,000 occupancy inspections were made. In addition to the Home Inspections, schools, hospitals, theatres and convalescent homes were inspected quarterly. A continuing phase of this most important fire prevention measure also included every church in the City. If we may prevent the loss of just one life through the efforts of our Fire Prevention measures, then I would say the program is justifiable.

The Fire Alarm Division, our communications center, which services both telegraphic and radio transmission and reception continues to operate in a most efficient and progressive manner under the direction of Assistant Superintendent of Fire Alarms Clifford J. Snell.

In addition to the routine preventive maintenance work on the telegraphic network, considerable new construction and installation was performed in order that our line of communications remain first line.

Several thousand feet of underground cable and aerial line were installed to serve existing and new fire alarm boxes.

Construction work on the New Bedford-Fairhaven Bridge demanded many man-hours of work requiring the moving of fire alarm duct and suspended cable as a result of above construction.

Consistent with our desire for inter-department cooperation, the following services were performed:

1. Interior fire alarm system connected to a master fire alarm box was installed for the School Department at the Horatio A. Kempton School.
2. Electrical circuits were installed for five (5) new gas heaters at the Water Department Repair Shop on North Water Street.
3. Assistance was given the Wire Department at Common Park relative to the annual Christmas Display.

I am very happy to report that, in conjunction with the School Department, seven (7) new master boxes were installed in various schools this past year. Continued progress in this area will ultimately result in automatic fire notification in all our public schools.

At the close of 1962, the number of fire alarm boxes throughout the City totalled 441; of this total 256 are Public and 185 are private, 124 of the latter being the master type connected to sprinklers, heat detectors, or auxiliary pull stations.

The Repair and Maintenance Division under Master Mechanic Kenneth M. Haddock is charged with the upkeep and repair of all mobile units, many of which are specialized requiring service uncommon to most motor vehicles. The Repair Shop also maintains, repairs, and many times fabricates the special equipment and accessories peculiar to fire fighting.

Care of the eleven (11) buildings under Fire Department jurisdiction, requires that our Repair Division perform carpenter, plumbing and heating repairs which otherwise would require the services of an outside contractor.

Fire Prevention Division is headed by Captain Ernest M. Torres assisted by two lieutenants and two clerks. This Division is responsible for administering one of the most important phases of Fire Department functions, namely Fire Prevention and Investigation.

Their Duties embrace the entire field of Fire Prevention and Investigation including issuing of relative permits as required by law, inspection duties, fire prevention lectures to schools and public service organizations, and investigative work in relation to suspicious fires.

Permits issued by the Division are as follows:

Power Oil Burners	408
Range, Cabinet and Space Heaters	105
Garage and Filling Stations	27
Fuel Oil Storage	52
Liquified Petroleum Gas Storage	55
Underground Tank Removals	52
<hr/>	
Total	699

The Drill and Training program is directed by Captain Raymond G. Furness. Its function is to maintain efficiency in all phases of firefighting through classroom instruction and fire ground training at the Drill Tower and various other locations.

Captain Furness, through his attendance at the Massachusetts Institute of Fire Department monthly meetings, is able to keep astride of the most modern techniques of firefighting.

Annual Underwriter service tests for all pumping engines, first aid instruction and lectures to military, Civil Defense, and industrial fire brigades are all a part of the duties of our Drillmaster.

During the past year, Captain Furness conducted a course in radiological monitoring to all Members of the Department. The course of instruction resulted in the qualification of most Department Members in the detection and reporting of varying degrees of radiation fallout. The various instruments

employed in the detection of radioactivity are provided by the Civil Defense Agency and are kept operational and in readiness at all Fire Stations throughout the City.

The New Bedford Protecting Society Officers and Personnel constitute a most dedicated and capable body of citizens who, with a most modern equipped salvage vehicle provide invaluable assistance to the Public and Fire Department. Serving without remuneration, the members of the Society avail themselves at any hour, day or night, in their effort to help keep the City's fire losses low. The Public should be more aware of their excellent service.

APPARATUS IN COMMISSION

- 10—Motor Pumping Engines, 5-1,000 G. P. M. and 5-750 G. P. M. Engines, all with booster hose and water tanks. Four have built-in liquid foam tanks used for flammable liquid fires. Six carry large deluge guns for use on large fires.
- 1—Motor Pumping Engine, 200 G. P. M. with power take-off pump and water tank.
- 4—Aerial Ladder Trucks, 2-85 Ft. tractor type and 2-75 Ft. non-tractor type, all equipped with ladder pipes.
- 1—City Service Ladder Truck.
- 1—Rescue and Fire Boat, on trailer — available on call.
- 1—Hose Wagon with Booster and Water Tank, equipped with forestry hose, wet-water device, flammable liquid fire fighting appliances — on call.
- 1—Automobile for the Chief.
- 1—Automobile for the Deputy Chief.
- 4—Automobiles for the District Chiefs.
- 1—Automobile for the Drillmaster.
- 3—Fire Alarm Trucks, one used only for pulling in cable.
- 3—Repair Division Cars — 1 truck and 2 sedans.
- 3—Automobiles for Fire Prevention Division
- 1—Van for towing of Rescue SCUBA and Fire Boat.
- 1—N. B. Protecting Society Salvage Truck.

APPARATUS IN RESERVE

- 2—Motor Pumping Engines, 1-1,000 G. P. M. and 1-500 G. P. M.
- 1—High Pressure Fog Truck with 435 Gallon Water Tank.

FIRE HOSE

- 800 feet of 3-inch hose
- 29,550 feet of 2½-inch hose
- 19,700 feet of 1½-inch hose
- 500 feet of 1-inch hose, high pressure
- 4,500 feet of ¾-inch booster hose
- 800 feet of ⅝-inch Garden Hose
- 132 Waterproof Salvage Covers carried on apparatus
- 10 Waterproof Salvage Covers carried on Protection Truck

NEW EQUIPMENT ACQUIRED DURING THE YEAR

- One new Fire Alarm Manual Transmitter.
- Three new Alarm Registers and Take-Up Reels.
- Sealed type batteries replaced on one Fire Alarm Circuit.
- One radio unit (two-way) on the Bristol County Mutual Aid Band.
- S. C. U. B. A. equipment in sufficient quantity to outfit four divers, thereby allowing this service to become operational for limited periods until additional gear is acquired.
- One new mobile radio unit.

My sincere thanks to the Mayor and City Council for the continuation of their excellent cooperation and good relationships with this Department. Their provision for Department uniform allowances is gratefully acknowledged by all.

Inter-Department cooperation is on the highest level. I extend my thanks to the Building, Wire, Water and Public Works Departments.

Our news media including the Standard-Times, and radio stations WNBH and WBSM are outstanding in the presentation of fire ground activity and various other newsworthy items related to the functions of the Fire Department. Without their fine support our Educational and Fire Prevention programs would be impossible to achieve their objective—namely, “reaching the people”.

The Salvation Army, Volunteers of America and American Red Cross who faithfully dispense hot coffee and refreshments to our men at multiple alarm fires, deserve and receive our special thanks. May our fine relationship continue.

Many thanks to Civil Defense Director Mrs. Anne Fitch and her personnel for invaluable assistance in the fields of traffic, lighting, and availability of their Rescue Truck at multiple alarm fires.

Special recognition and thanks are extended to the Company Officers and Firefighters who on many occasions have demonstrated their ability to fulfill their duties in the highest tradition of our service. Their participation in the many civic endeavors of our city is worthy of admiration.

RECOMMENDATIONS

Seven years have elapsed since the purchase of our last piece of fire apparatus. For the past nine years I have recommended the purchase of a new pumping engine to replace a 200 gallon pumper at Station No. 8. Our present so called reserve apparatus at Station No. 5 are both obsolete, undependable, and should be replaced. If we do not soon begin a program of gradual replacement of apparatus, I fear the City will in time face the heavy financial burden of mass replacement. I recommend a long range plan of replacement to insure the continued fire protection our City deserves.

REQUEST: \$26,000.00

Three (3) New Four Door Automobiles: Our department requires and uses 12 passenger type automobiles, which are used by the chief, deputy chief, district chiefs, fire prevention inspections, drillmaster, master mechanic and one to tow our Rescue Boat, etc. At the beginning of 1963, we will still be operating with several old cars which should be junked. Ages of cars are as follows: one, 16 years old—one, 15 years old—one, 13 years old—two, 10 years old—one, 9 years old—two, 8 years old—one, 7 years old—one, 5 years old—two, 1 year old. One of the three requested autos would be to provide a new car for the chief, who is presently using an 8 year old Pontiac which should be replaced. The other two cars would be for deputy and district chief use whose cars could be passed down for fire inspection, drill master and shop use and some of older cars would be junked. Rescue boat is being towed by a 22 year old van, which cannot be considered a very dependable set up. Only 2 new autos have been purchased for the fire department in the past 7 years so that conditions on ages and conditions of several old cars is very poor.

REQUEST: \$10,500.00

One (1) Portable Walkie-Talkie Radio: This consists of a lightweight portable radio unit, easily carried about. A very necessary, valuable and useful unit in efficient fire-fighting in such places as forestland, factories, schools, hotels, high buildings. In rescue work use with boat around water, where one could talk to shore from boat. Practically every city and nearly all towns have had these for years. Due to lack of funds in our budget, we are never able to purchase one.

REQUEST: \$600.00

Widen Apparatus Door Opening and Installation of Overhead Door at Fire Station No. 7: I again repeat my request which I have made each year for the past ten years for funds for the widening of one door opening and the installation of an overhead door at Station 7. The space between the door casing is so narrow that several accidents have occurred damaging the fire apparatus. The present door width was designed for the old horse drawn steamer engine.

REQUEST: \$3,000.00

Five (5) New Fire Alarm Boxes: It is 6 years since any new fire alarm boxes have been purchased. Since 1957 many new developments with new homes have been completed. Many areas so developed are without reasonable fire alarm box protection, a protection that the citizens and home owners in these areas should have. If two or three new boxes were purchased yearly, we could keep up with new areas. Not less than 5 new boxes should be purchased in 1963 to cover said areas. Boxes at about \$200.00 each.

REQUEST: \$1,000.00

Repairing and Painting of Fire Stations: The Building Department personnel have done a certain amount of inside and outside painting at four of our ten fire stations, but much important and costly repair work needs to be done at several stations. At Station 9, Tarkiln Hill Road, during many rain storms, water enters through the bricks on south wall of the station and runs down the brick and plaster inside of bedrooms, severely damaging walls on second floor. No effort is being made to correct this condition and it continues year after year. Station 11, at Brock Avenue, has a serious condition in that many bricks are falling out of outer wall of building, and water and ice and frost are damaging

building year after year, with nothing being done. Station 2, the Central Fire Station, needs new roofing job, water runs into attic space and down plaster into certain rooms, damaging property, badly needs a reroofing job. Putting \$2,000.00 yearly in the budget earmarked for station repairs would be an efficient long-range plan.

REQUEST: \$2,000.00

Two Transistor Radios: This department maintains 28 radios which have been purchased over a span of 11 years. Increased service and repairs to many of the older units is indicative of the necessity for their gradual replacement. A plan should be invoked whereby 2 units should be replaced yearly in order to maintain this most vital link of communications.

REQUEST: \$1,600.00

Two (2) New Registers and Take-Up Reels: These electrical units serve as an integral part of the bell alarm transmission link between the Stations and Fire Alarm Headquarters. They serve as paper-tape recorders of box alarms. During the past few years, I have been able to replace 8 of these units, thereby leaving 2 more to be replaced. The remaining 2 are from forty to fifty years old, badly worn and undependable. A faulty register could cause a wrong box number to register resulting in erroneous response by the apparatus. The serious consequence is obvious.

REQUEST: \$800.00

Respectfully submitted,

MILTON C. ANDREWS,

Chief of the Fire Department

**A FURTHER BREAKDOWN OF THE CLASSIFICATION OF THE FIRES
ON THE PREVIOUS PAGE IS LISTED BELOW**

Residential	Includes—Dwellings, Tenements, Apartments, Hotels, Rooming and Lodging Houses.
Non-Residential Assembly	Includes—Office Buildings, Theatres, Churches, Hospitals, Institutions, Schools.
Mercantile	Includes—Retail & Wholesale Trade, Restaurants, Bars, Repair Shops, Filling Stations.
Manufacturing	Includes—Factories, Breweries, Canneries, Bakeries, Laundries, Printing & Other Manufacturing Processes.
Storage, Etc.	Includes—Warehouses, Piers, Wharves, Grain Elevators, and Storage.
Public Utilities	Includes—Power Plants, Pumping & Transformer Stations, Poles, Ets.
Miscellaneous	Includes— <i>a.</i> Detached Private Garages & Barns. <i>b.</i> All Other Buildings.
Grass & Brush	Includes—Grass and Brush Fires ONLY.
Motor Vehicles	Includes—Motor Vehicle Fires ONLY.
All Other Fires	Includes—Outdoor Fires, Such as Boats, Lumber Yards, and Machinery.
False Alarms	Includes—Mischievous and Maliciously False Alarms.
Accidental Alarms	Includes—Smoke Scares, Honest Mistakes, Wrong Locations, Sprinkler Troubles, and Accidental Alarms.
Emergency Calls	Includes—First-Aid, Accidents, Emergency Calls, Etc.
Out of the City	Includes—Out of the City Calls ONLY.
Deaths	Includes—Death among Firefighters and Civilians.

CAUSES OF FIRES — 1962

- 10 Acetylene and Blow-Torch carelessness
- 10 Arcing wire
- 3 Arson
- 20 Burning food
 - 1 Burning soot
- 25 Burning with a permit
- 14 Burning without a permit
 - 3 Careless use of inflammables
- 215 Careless smoking
 - 7 Carburetor backfire
 - 3 Careless use of matches
- 147 Children with matches
- 10 Combustibles in contact with stoves, etc.
- 24 Defective and faulty carburetors
 - 5 Defective wiring
 - 1 Friction from towing
- 4 Hot ashes
- 2 Exposure
- 4 Leaking gas pipes
- 10 Leaking gasoline, oil or kerosene
 - 4 Lightning
- 6 Overheated brake bands
- 15 Overheated drying machines
- 10 Overheated electric and/or gasoline motors
 - 2 Overheated exhaust pipe
 - 4 Overheated flatiron, electrical appliances
- 27 Overheated grease
- 12 Overheated stoves, ovens or fireplaces
 - 5 Overheated stacks, smoke pipes or chimneys
- 17 Overturned street flares
- 39 Oil burners — defective, improperly operated, flare-up and flooded
- 101 Short circuits — including auto, house, radio and T. V.
- 13 Sparks from incinerator
 - 1 Sparks from grinder or buffer machine
 - 3 Sparks from stove
- 9 Spontaneous combustion
- 5 Undetermined
- 7 Rekindle

PEDIATRIC CLINIC PHYSICIAN

Bernard A. Portnoy, M.D.

**Leave of Absence*

REPORT OF DIRECTOR OF PUBLIC HEALTH

An Urban Renewal Program was instituted in the City of New Bedford in 1962 with financial assistance from the Federal government. As a result, it was necessary to appoint two sanitarians to carry out environmental health aspects of such a program. These two individuals started work on December first. Immediately, a program of indoctrination began, to prepare them for the task ahead.

One of the significant programs which has been instituted in this city for the protection of the health, particularly mental health, of children has been the phenylketonuria program which was begun at St. Luke's Hospital. This department was requested to assist in the field follow-up in the event that mothers did not follow instructions given to them upon the infant's discharge from the hospital. If such a program can guarantee the mental well-being of these infants in later life, it certainly will be worthwhile in the prevention of the anguish suffered by the parents of retarded children as well as a financial saving when some of these youngsters with brain damage would, in later life, have had to be institutionalized.

Since 1950 the Board of Health has been planning to build a public health center in order to house as many of these facilities as possible under one roof. Great encouragement was received from the Massachusetts Department of Public Health which approved this program and from the United States Public Health Service which set aside 40% of the total cost of \$700,000 for such a structure. In the fall of 1962 the Public Works Accelerated Program increased the amount of money which this department could receive for a building so that at least \$350,000 of Federal funds could become available to the city.

This matter was considered by the City Council on several occasions with the final result that the construction program was voted down. This was one of the most heartbreaking things which had been encountered in my many years of experience in this department and we are now left with very limited quarters to conduct, we believe, an outstanding public health program.

While the physical facilities of this department are very limited there is no intention of abating any of our programs whatsoever. It is to be hoped that, in the near future, the City of New Bedford will reconsider and go ahead with this much needed construction.

While the building of a public health center did not materialize there was some degree of satisfaction that the City of New Bedford was considered favorably by the Federal Government in the construction of a new stack to replace the two old stacks at the incinerator of the Refuse Disposal Division. There is every reason to believe that this will materialize when finally approved by the Federal Government and the City Council. Such would well bring about a lessening of the deterioration of the lining of the furnaces of the new incinerator, thus prolonging their lives considerably.

Again, it should be pointed out that many polio clinics were held each of which was highly successful. The response indicated the high degree of confidence the public has in such services which are rendered by the Board of Health.

ALPHEGE LANDREVILLE,

Director of Public Health

ANNUAL REPORT

OF THE

INSPECTOR OF WIRES
POLICE SIGNAL SYSTEM
STREET LIGHTS

TO THE CITY COUNCIL

For the Year 1962

BRADBURY-WARING, INC.
Printers
1963

Annual Report

New Bedford, Massachusetts

August 12, 1963

To the City Council of the City of New Bedford:

Gentlemen:

I respectfully submit the annual reports of the departments of Inspector of Wires, Police Signal System and Street Lights for the year 1962.

INSPECTOR OF WIRES

Some of the larger electrical jobs inspected during 1962 included, renovations at Berkshire-Hathaway and complete new wiring systems for Taber Nursing Home, Mars Department Store, and many new homes at Pine Hill Acres and Westgate Park.

Inadequate wiring in homes is still one of our greatest concern. Modern appliances connected to overloaded and overfused circuits are a potential fire hazard. Extension cords run under rugs or nailed or tacked to walls or floors contribute to our fire hazards. Electricity is third on the list for Building Fire Causes and in 1961 there were 117,920 fires caused by the misuse of electricity in the United States. This department through its efforts in having these hazards corrected help to keep the fire loss as low as it is in our City.

My appreciation is extended to all of the personnel in this department for their efforts to protect our people and their homes and factories from the hazards arising from the use of electricity.

The Christmas Display on the Common was a success. More than 6500 multi-colored lights were used with 15 miles of wire. A 10 foot illuminated cross, a 22 foot Santa Claus along with his workshop were newly added attractions.

The New Bedford Gas and Edison Light Co. donated the electricity and the Building, Water, Fire, Park, Public Works, Civil Defense, Police and Police Signal departments all contributed to the success of the display. Through the courtesy of Mr. Z. Walter Janiak, Director of Vocational High School, students from the Art, Carpentry and Electrical departments actually set up the display under the direction of department heads. I extend my heartiest appreciation to Messrs. Daniel Gabriel, Sterling Wilson and Lloyd Taber.

The following is a breakdown of the work completed this year:

2W receptacles	4,669
3W receptacles	503
New buildings	92
Old buildings	3
110V motors	63
220V motors	79
550V motors	492
Sockets	1,038
Switches	2,755
Meterloops	8
New services	118
Underground services	3
Service breakdowns	49
Services reconnected	46
Service changeovers	226
Oil burners	308
Oil pumps	22
Circulators	258
Oil tanks	8
Gas burners	187

Gas pumps	22
Fixtures	3,726
Fluorescents	1,662
Air conditioners	31
Washers	98
Dryers	51
Disposals	10
Dishwashers	7
Fire alarms	10
Floodlights	58
Freezers	7
Fans	54
Fires	50
Medicine cabinets	14
Ranges	45
Outside signs	102
Inside signs	6
Sump pumps	2
Swimming pools	1
Thermostats	2
Timeclocks	5
Telephone booths	10
Electric heating	4
Billboards	2
Water heaters	9
Demolitions	45
Emergency lighting	23
Alterations	75
Boarding homes	17
Repairs	145
Transformers	65
Elevators	4
Circus	1
Church fairs	5
Carnivals	6
Trailers	8
Reinspections	75

Advisory	212
Requests for inspections	3,188
Permits to electricians	2,206
Permits to owners	66
Reports of defective wiring	2,131
Yellow tags	630
Blue tags	328
Red tags	36
Permits issued to N. B. Gas & Edison Light Co.	2,013

During the year, I investigated and reported to the City Council on 86 petitions of the N. B. Gas & Edison Light Co. and the N. E. Telephone & Telegraph Co. These petitions involved new pole locations, relocations, transfers, underground ducts, removals and manholes.

Eight applications for the moving of buildings were investigated and approved.

The operating expenses for the year were:

General Expenses	\$ 1,316.11
Salaries and Wages	27,894.55
Pension	2,115.14
Christmas Decorations	4,910.04
	<hr/>
Totals	\$ 36,235.84

POLICE SIGNAL SYSTEM

Because the new so-called "Jay-Walking" law was not adopted by the City, no new traffic installations were made. Standard specifications for new traffic signal installations were not issued by the State Department of Public Works during 1962. The 1948 specifications will have to be amended to coincide with the intent of the new law before we can proceed with any new installations.

Eight new police boxes were purchased this year at a cost of \$2,001.20. These boxes will replace some of the older boxes that have been in use for over forty years. Replacement parts for the old boxes cannot be obtained.

The controller for the pre-timed traffic lights at North and County Sts. was replaced with an actuated type by the Vander Electric and Equipment Co. at a cost of \$2,064.00. This change will help prevent the many pile ups which have occurred on both North St. and County St.

The following is a breakdown of the work done by the Police Signal Electricians:

Police box repairs	165
Police boxes rewired	20
New cable to police boxes	12
Station No. 1 inspections	138
Switchboard repairs, Station No. 1	23
Station No. 5 inspections	137
Switchboard repairs, Station No. 5	22
Traffic light controller repairs	83
Traffic light repairs	58
Traffic light accident repairs	25
Overhead wire repairs	51
Underground cable repairs	103

A new telephone was installed in the temporary Police Station in the south end Library. This involved installing

new overhead lines on Cove St., from Stapleton St. to Water St.

A new telephone was installed in the center Police Station garage.

New overhead wires were installed in the rear of the Airport and on Howard Ave., from Acushnet Ave. to Belleville Ave.

Other work done by the department was as follows:

The Christmas Displays — Common Park, City Hall,
Library Lighting for several band concerts and
block dances.

Lighting for Naval dance at Y.W.C.A.

Lighting for Miss Massachusetts Welcome Home on
Public Library Lawn

Lighting for Polio Clinic at Ashley and DeValles
Schools

Installing electric score board system at Sargent Field
in cooperation with School Dept. electrician

Repairs to wiring at Story Book Land, Brooklawn Park

Installed new wiring for lights and receptacles for
Police Dept. in new Inspectors Division on second
floor

The operating expenses for the year were:

General Expenses	\$ 13,055.83
Salaries and Wages	12,822.50

Totals	\$ 25,878.33

STREET LIGHTS

At the end of the year, there were 5,681 street lights in operation in the City as follows:

1,735	100 C.P. overhead	@	14.40 per year
881	250 C.P. overhead	@	23.88 per year
30	250 C.P. underground	@	23.88 per year
990	250 C.P. underground	@	31.20 per year
27	400 C.P. overhead	@	35.28 per year
130	400 C.P. underground	@	42.72 per year
8	600 C.P. overhead	@	47.04 per year
56	600 C.P. underground	@	54.36 per year
243	1,000 lumens overhead	@	28.80 per year
5	1,000 lumens overhead	@	38.80 per year
563	2,500 lumens overhead	@	36.00 per year
10	2,500 lumens overhead	@	46.00 per year
285	2,500 lumens overhead	@	37.80 per year
3	2,500 lumens overhead	@	47.80 per year
31	2,500 lumens under-ground	@	82.80 per year
4	2,500 lumens under-ground	@	117.80 per year
40	4,000 lumens overhead	@	45.00 per year
20	4,000 lumens under-ground	@	90.00 per year
14	4,000 lumens under-ground	@	125.00 per year

85	6,000 lumens overhead	@	54.00 per year
4	6,000 lumens overhead	@	64.00 per year
14	6,000 lumens under-ground	@	99.00 per year
21	6,000 lumens under-ground	@	134.00 per year
2	10,000 lumens overhead	@	72.00 per year
1	10,000 lumens under-ground	@	117.00 per year
151	17,000 lumens mercury overhead	@	88.20 per year
32	17,000 lumens mercury overhead	@	98.20 per year
53	17,000 lumens mercury underground	@	133.20 per year
35	17,000 lumens mercury underground	@	168.20 per year
7	20,000 lumens mercury underground	@	129.60 per year
2	20,000 lumens mercury underground	@	164.60 per year
3	21,000 lumens fluorescent overhead	@	112.80 per year
188	21,000 lumens fluorescent underground	@	157.80 per year
8	21,000 lumens fluorescent underground	@	192.80 per year

Numerous new lights were installed in the residential sections throughout the City and in addition, as lights were

replaced due to faulty fixtures and accidents, the intensity of these lights were increased. Increased intensity included Brownell Ave., County St., Pearl St., Pleasant St., Pope St. and Purchase St.

Due to outages, \$96.81 was credited during the year by the N. B. Gas & Edison Light Co.

The expenses for the year were:

General Expenses	\$ 202,836.06
------------------	---------------

Respectfully submitted,

WALTER E. MONT,

Inspector of Wires,
Supt. of Street Lights,
Supt. of Police Signal System.

ANNUAL REPORT

Inspector of Wires, Police Signal System
and Street Lights
for the year 1962

IN CITY COUNCIL, October 24, 1963

Received, placed on file and ordered printed in the City
Documents.

CHARLES W. DEASY,

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

December 31, 1962

To the Honorable City Council:

Gentlemen:

The Sixty-ninth Annual Report of the Board of Park Commissioners on Parks, together with reports on Bath Houses, Youth Activities, Playgrounds, Retarded and Handicapped Children, and Militia under the control of this Board, is herewith presented in accordance with provisions of law, for the fiscal year ending December 31, 1962.

The Board held ten regular meetings and three special meetings during the year and voted to dispense with meetings during the months of July and August.

The Board organized in May for the ensuing year. William Smith, veteran member of the Park Board was elected chairman, succeeding Everett F. Sowle, and Manuel P. S. Macedo was named secretary. Mr. Macedo succeeded Harrie W. Johnston whose three-year term expired May 1.

Frank Vieira of 151 Bellevue Street was welcomed as a member of the Park Commission for the term of five years expiring in May, 1967.

A license was granted to the Cove-Amusement Corp. for a parcel of land at Bristol Mill Lot for the purposes of operating a midget "Go-Cart" auto track at a fee of four hundred dollars (\$400.00) annually for a term of five (5) years from May 1, 1962.

The Municipal Golf Course lease was renewed for five years to Stanley A. Brown d/b/a New Bedford Public Links

pending a survey of all taxable property, plus yearly fees and various conditions concerning any member of the City Council and any other duly appointed committee on the golf course.

Harold W. Barton of 180 Palmer Street was granted the concession rights at Brooklawn Park for a one (1) year term beginning May 1, 1962, and ending April 30, 1963, for his bid of \$360.00.

The American-Lebanese War Veterans Association of New Bedford, Inc. of 11 Franklin Street was granted permission to replace the plaque on the American-Lebanese Veterans Square at the Common Park with a granite monument 42" wide 60" high and 20" thick.

The New Bedford Exchange Club was granted the use of Marine Park for the period of August 6th through the 14th, 1962, to sponsor their Annual Scallop Festival on 10-11-12 August 1962.

In commemoration of the 50th Anniversary of Girl Scouting, 13 Girl Scout Troops from St. Anthony, St. Casimir, St. Kilian, St. Joseph, and St. Andrew Church held rededication ceremonies in Brooklawn Park on May 19.

New Bedford Post Number One, The American Legion, was granted the southeast corner of the Bristol Mill Lot for the Clyde-Beatty-Cole Brothers Circus on May 9.

Reverend Newman J. LeShana, minister of St. Paul's Methodist Church, was granted permission to hold Easter sunrise services at Buttonwood Park in the vicinity of the warming house.

The American-Portuguese War Veterans were granted the use of the lower part of Joseph Francis Playground, west to Rockdale Avenue, for their carnival the week of July 15.

The Jolly Whalers Drum and Bugle Corp were granted the use of Marine Park every Monday for rehearsals.

The Citizens Fourth of July Celebration Committee made use of Joseph Francis Playground for a firework's display on July 4.

The Rivet Street Business Association used the Northeast corner of Ashley Park to erect a Christmas display and also used the building on the park grounds to store a recorder from December 1, 1962 to January 5, 1963.

A six months leave of absence was granted to Herbert Rego, head lifeguard and bath house maintenance man, to join the United States Coast Guard.

Homer Rene, park keeper at Brooklawn Park, having reached the retirement age limit, retired September 29, 1962, after 20 years of service.

The Board relinquished its care, custody and control of the so-called Logan Street Playground and turned the land, bounded by Hicks, Howe, and Logan Street, over to the City Property Committee.

Because of the ever increasing applications for use of the Clarence W. Arey Memorial Bandshell which resulted in extensive labor costs, the Board adopted a schedule of rental rates to cover the expense of moving the bandshell to various parts of the city. Labor costs amounted to \$1,495.17 for 1962, covering the services of four men normally required to move the shell. Beginning January 1963 anyone using the bandshell will have to pay the prevailing wage rate on an hourly basis.

Construction easement was granted to the Corp of Engineers of the U. S. Army and of the Commonwealth of Massachusetts to use a portion of Joseph F. Francis Playground and Jacinto F. Dinis Memorial Park for project construction of the New Bedford-Fairhaven Hurricane Protection Barrier.

The Board has refrained from recommending any extensive improvements or additions which would involve additional annual expenditures for maintenance and upkeep of the parks, feeling that while there are many desirable features

which would add to the enjoyment and convenience of those who visit the parks, the present facilities will serve until the city is better able financially to provide them.

Appropriations and expenditures for the entire year are shown in the various tables incorporated in this report.

Respectfully submitted,

WILLIAM SMITH, Chairman

MANUEL P. S. MACEDO, Secretary

EVERETT F. SOWLE

CARL R. ANDERSON

December 31, 1962

To the Honorable Board of Park Commissioners:

Gentlemen:

Herewith is submitted the Annual Report of the Park Department and its subdivision for the year 1962.

The work of the department during the past year has been wholly of a maintenance nature. In addition to regular maintenance, marked and urgently needed improvements were made in various parks in the city.

A chainlink fence, 1060 lin-feet long and 4 feet high, was installed, replacing the wrought iron fence on the south side of the Buttonwood Park Pond running east and west along the Alvin T. Fuller Memorial Parkway.

Building construction was started on the new buffalo house. However, with the cold weather setting in only the foundation was completed.

Improvements were made to the dugout at Brooklawn Park and a score-board was erected for the Little Leaguers.

Extensive remodeling of the warming house at Buttonwood Park was completed. A new ventilating system, improved heating conditions, and impervious floor for the concession room, a new three-compartment sink and adequate storage and refrigeration of foods and drinks were installed in the warming house.

The candlepower of four ornamental lights at the Common had been increased from 250 — 600.

Picnic tables and benches in various parks were repaired and painted. Those damaged beyond repair were replaced with new ones while localities needing, but lacking these fixtures, were provided with them.

The Daniel Ricketson house in Brooklawn Park, slated for burning because of its dilapidated condition, was rescued on a temporary basis on the plea of the Waterfront Historic Area League of New Bedford, Inc. The house is now being restored through the efforts of the league.

The baseball diamonds, football, soccer, bowling greens and tennis courts have been kept in good playing conditions. The need for more baseball fields, however, is growing, particularly among younger groups such as the Little League and Pony League. Tennis retained its popularity and our courts were patronized throughout the playing season.

The playgrounds were operated from the latter part of June to August with a noticeable increase in participation. The program included free and organized play, competitive sports, handicraft and many other activities.

Winter made skating possible. Every attention was paid to the care and comfort of the skaters, with competent help in the warming house and officers upon the ponds.

Japanese pines were planted at the southwest end of Hazelwood Park, a red maple in Grove Park and on the County Street end of the Common. These trees were gifts to the City from pupils of the James B. Congdon, John B. DeValles, Robert C. Ingraham and Phillips Avenue Schools. Planting of the trees was handled by the Park Department crews.

The rose beds at the Common were replenished to fill the spaces made vacant in recent years by dying plants. Beds at the approach to the Fairhaven Bridge were replanted, and the formal gardens at the greenhouses in Buttonwood Park have drawn favorable comment from many sources. We continue to grow all of the plants used for the flower beds in our various parks.

The department participated in the Ninth Annual Spring Flower Show of the Kiwanis Club of Greater New Bedford, held in the Hammond Auditorium of the New Bedford Vocational High School. As with all other exhibitors a \$50.00 allowance was extended by the Kiwanis Club to help defray cost.

In conclusion, my appreciation is extended to the members of my staff and to my fellow co-workers for their faithful and loyal service. I am also very grateful to the Board members for their confidence and support throughout the past year.

Respectfully submitted,

EDWARD W. BARRETT,

Superintendent

BATH HOUSE DIVISION

The swimming season opened Sunday, June 17, 1962 with 22 lifeguards and other necessary personnel on hand to cover the East and West Beaches.

All guards were chosen from the State Civil Service list. They were required to swim a quarter of a mile every morning and also had weekly life saving drills. Both guards and male bath house attendants were instructed in the use of resuscitator equipment. All personnel were required to have American Red Cross Standard First Aid Certificates.

Free swimming instructions, ranging from novice through senior life saving, were held for New Bedford residents. Classes were conducted six days a week from July 5 to August 29 by Mrs. Genevieve Townley and three assistants.

The annual water show was canceled this year because of inclement weather. Certificates were issued by Edward J. Lowney, director of recreation.

A total of 30 near-mishaps which involved the direct assistance of the guards occurred. A drowning which took place at East Beach was not the fault of the Park Board personnel.

About 200 emergency First Aid cases were administered to this year. The New Bedford Police Department are to be commended for their assistance in cases too severe for us to handle at the beach.

The Fairhaven Sesquicentennial committee-sponsored Acushnet River swim began at East Beach and ended at Fort Phoenix in Fairhaven. The event was held in conjunction with the town's sesquicentennial celebration.

The Park Department's Annual Swim Carnival was held Sunday, August 19. A total of 32 trophies were awarded to winners by William Smith, chairman of the Board of Park Commissioners. Judges were Mrs. Beatrice Whalen, Irving Davids and Mr. Lowney. Albert A. Sylvia was starter, assisted by Mrs. Townley. Clerk of the events was James T. Bicker, assisted by Pierre R. Paradis. John Britto served as announcer.

Lifeguards received bathing trunks this year with "Guard" written on them, for their easier detection by the public.

The buckboard was sent to the factory to be fully reconditioned, and the West Beach shower drain was put into working condition.

The rafts were brought in September 5, and the beach officially closed September 8.

At this time I am thanking you, Mr. Barrett, the office clerks and the Park Department workers for their interest, support and co-operation they have given me throughout the year.

Respectfully submitted,

HERBERT REGO,

Head Lifeguard and
Bath House Maintenance Man

SWIMMING

I respectfully submit the following report in reference to the Swimming Program held at Municipal Beach during the summer of 1962.

Enrollment for the New Bedford Park Department swimming program began June 22, and ran through to June 30. Total enrollment was 486 pupils.

Swimming instructions began July 2, and ended August 29. Pupils passing the Red Cross requirements in the different swimming categories received certificates at a brief ceremony held inside the bath houses August 29.

A tropical storm canceled the water show which was to be held that day. The show was to consist of pupils doing synchronized swimming to music. Pin wheels were to be formed by the tiny tots. All classes were to have demonstrated perfection in swimming. A life size dummy would have been used in our life saving demonstration. Other swimming techniques were also planned.

Instructors assisting in the program were Sandra J. Lemos, Suzanne J. Caron and Georgiana J. Pimental.

A breakdown of the complete program is as follows:

Total enrollment as of July 2, 1962	486
Failed to report for any lessons	41
Vacations, camps, disqualification	76
Final total for month of July	369
Taught to swim	369
Passed Red Cross test, received certificate	230
Tested as very good but not strong enough for required lengths in swimming	139

Respectfully submitted,

MRS. GENEVIEVE TOWNLEY,

Supervisor of Recreational Athletics
(Swimming)

DIVISION OF RECREATION

Playgrounds - Youth Activities - Annual Fishing Derby

PLAYGROUNDS

The 1962 playground season, conducted for a nine week period, commenced on June 26th and terminated August 24th.

A total of 13 playgrounds were utilized and were staffed by 43 Recreation Leaders and Assistant Leaders. Three of these leaders were used as Arts and Crafts specialists and travelled to the various play areas on a regular schedule. The Arts and Crafts program presented a more diversified offering with the addition of beadwork, sewing projects and popsicle sticks. We were very fortunate to have two specialists who were extremely adept in regard to carrying out their assignments.

Several other innovations were conducted and proved very popular. One of these was a Physical Fitness contest operated in conjunction with H. P. Hood & Sons Milk Co. The Hood Co. supplied the pamphlets and brochures and also contributed six trophies to the contest winners. The contest finals were held at the Common and the city champions were crowned there.

Many playground youngsters were able to take advantage of a regular schedule of Bookmobile visits to the various play-

grounds — a program made possible by the generous co-operation of Librarian James S. Healey.

Another popular first-time event was a Miniature Golf Tourney made possible by Mr. Joseph Barbero, who donated the facilities of his miniature golf course for the City Playground Championship Play-offs.

Other weekly city-wide contests which proved very popular were: doll carriages, bubblegum, pet show and Arts and Crafts Display Day.

Formal leagues were conducted in both baseball and basketball and much interest was generated during the regular season and the city championship play-offs. Informal competition in volleyball, soccer, and badminton created enjoyment for those youngsters not interested in the organized leagues.

A Bowling Clinic, courtesy of the Hathaway Wonder Bowl, was offered to all playground youngsters upon making application at their home playground. Many boys and girls took advantage of this offer and consequently learned the fundamentals of bowling. We sincerely hope that this will be an annual event.

Once again the Park Department co-operated with the Handicapped Children's Center at West Beach and the Retarded Children's Center on Smith Street. Both of these excellently operated programs were served both personnel-wise and materially.

A city-wide Horseshoe Tourney was held at the Common, bringing together the champs of the 13 playgrounds to determine the City Champs in both singles and doubles competition.

1100 happy youngsters were transported to and from Lincoln Park for a day's outing. The Park Department provided free ice cream, soda, chips and candy and the various rides were filled to capacity for the entire day. This happy event is eagerly looked forward to and the gratifying response tells the story of its popularity.

The Park Department once again co-operated fully with the Citizens Fourth of July Day Committee, and actively assisted with the various children's events staged both at Brooklawn Park and Joseph Francis Playground.

Daily supervised fishing was initiated at the Buttonwood Park Pond and proved a very popular pastime for the young anglers. We hope to broaden the scope of this program during the coming season.

A total of 61,724 youngsters took advantage of the various playground facilities during the nine week period. The reason that this figure is down somewhat from the previous summer is that we operated one less playground — 13 rather than 14 — due to the utilization of the Ellen R. Hathaway Playground by the School Committee. If present plans are projected, this site or part of it, will once again be used for playground purposes during the coming season.

There is a possibility of securing land in the extreme north end of the city for playground purposes. At this writing, nothing definite has been consummated in regard to this plan.

KEITH JUNIOR HIGH SCHOOL

The generous co-operation of the School Committee once again made possible the utilization of the gym at Keith Junior High School by the Park Department.

This program is operated on a five night per week basis, Monday through Friday, from 6 P.M. to 9 P.M. Membership cards are issued and there is no charge for this program. The rules and regulations are set up by the School Board and supervisors from this department are on hand to conduct the activities.

The Keith program was carried on for 37 weeks and the total attendance was 14,788 boys, an average of 399 per week. It is hoped that in the near future the other two Junior High Schools will be opened and utilized for recreation purposes.

Under the present set-up the Park Department supplies the personnel and pays for the custodian. The heat and lighting are supplied by the School Department.

A Little League basketball program, worked in conjunction with our own program, has proved very successful. While this program operates on our time schedule and utilizes half of the gym, they supply their own supervisors, referees, timers, etc. This arrangement has worked out very amicably for both parties. Under this organization many youngsters who would not otherwise have an opportunity to participate are given the chance to play with supervision and guidance.

FORT RODMAN RECREATION PROGRAM — RECORD HOP

The Naval authorities once again granted permission to the Park Department for Saturday evening use of the Drill Hall in the Naval Reserve Building. This record hop program is conducted from 7:30 P.M. to 10:30 P.M.

Boys and girls from 14 through 18 years of age are eligible to participate in this segment of the recreation program and membership cards are issued to those youngsters who meet the age requirements and are willing to comply with the rules set up jointly by the Park Department and the Naval Commander.

This dance program was operated for 36 weeks and the total attendance was 4,262 or an average weekly group of 112.

Despite the fact that we appreciate this generous offer of facilities by a private organization, I feel strongly that this once a week dance does little to alleviate the lack of a well-rounded recreation program in this section of the city. It is hoped that other facilities will be acquired in this area of the city which will be conducive for recreation purposes.

ANNUAL FISHING DERBY — BUTTONWOOD PARK

The Park Department's Annual Fishing Derby, once again conducted for a 13 week period at the Buttonwood Park pond, proved once again to be as popular as ever with the young anglers — boys and girls alike.

Any youngster who is between 7 and 15 years of age is issued a permit upon application at any one of several locations. This permit enables them to fish and also to become eligible for the prize awards during and at the termination of the Derby.

During the 1962 season we issued a total of 486 permits and the total catch was 2,011 fish.

The top prizes of a bicycle and a transistor radio were donated by the New Bedford-Acushnet Co-operative Bank and the Park Department respectively.

Supervisors from the Park Department are on hand to assist in the weighing and tabulations of the various fish caught and also to make certain that all safety regulations are obeyed.

I would like to express my sincere gratitude to the Board of Park Commissioners, the Superintendent of Parks, and the office personnel for their help and understanding throughout the year.

Respectfully submitted,

EDWARD J. LOWNEY,
Director of Recreation

SUMMER RECREATION PROGRAM FOR RETARDED CHILDREN

The second year of the Summer Recreation Program for Retarded Children of Greater New Bedford was a highly successful one. Unlike other playgrounds, registrations were required for all or most of the summer. These were screened to make sure that no child was accepted who could take part in any other recreational program. Enrollment was increased to thirty-five children.

The program for 1962 was held at the newly constructed Center for Retarded Children at 247 Smith Street. The building and the fenced playground were planned and equipped for the special needs of retarded children. The program was held daily for eight weeks, from July 2 through August 24, from 10 A.M. to 3 P.M. Taxi service was provided for the children.

The staff consisted of six regular counselors, all experienced teachers of retarded children. There was also an attendant to free the counselors of housekeeping duties and to care for the nine diaper children. In addition, a group of Keith Junior High School girls, under the direction of their guidance counselor, Miss Catherine Roche, took turns helping with the children. Each child required a great deal of individual attention, and the assistance of the volunteers was very important.

The program consisted of opening exercises, physical education, free play on the playground equipment, table activities, story hours, simple arts and crafts, music, and special activities. A great deal of emphasis was placed on physical education, as this is perhaps the greatest need of retarded children. A simplified version of baseball was the most popular daily event for the older children.

Eleven special events were scheduled by various community groups and individuals, and six field trips were taken. A field day was held for parents at the end of the season.

Case studies were compiled of each of the thirty-five children. Every child made gains in some or all of the special problems of retarded children, self-help, social adjustment, speech, toilet training, eating habits, physical co-ordination and mental alertness.

The expenses of the program were divided between the Division of Special Education of the Department of Education of the Commonwealth of Massachusetts, and the Park Department of the City of New Bedford. The sponsoring group was the Greater New Bedford Chapter for Retarded Children, Inc.

Plans have been made for expanding the staff and facilities to care for a larger group of children next summer.

We wish to express our appreciation to the many organizations and individuals who helped the children in so many ways. Our special thanks go to the Chapter for Retarded Children and to the Park Department.

Respectfully submitted,

GLADYS M. BOYD,

Director, Summer Recreation Program
for Retarded Children

RIFLE RANGE

To Mr. Edward W. Barrett,
Superintendent of Parks

Dear Sir:

The year 1962 saw minimum activity at the New Bedford Rifle Range due to the National Guard Battalion, 211th Howitzer, being ordered to active duty status and stationed at Fort Bragg, N. C. for the entire year.

Otis Air Base requested use of the New Bedford Rifle Range for two weeks in June as an emergency measure, while their range was being repaired. A detachment of United States

Airforce personnel, 20 leading shooters from the 1st Corp Area fired rounds for elimination and team position. The winners were to represent the Airforce from the Eastern area at future competitive matches at the Canal Zone.

The F.B.I. held night firing classes for the Police Associations in this area for three days in September. About 150 participants were taught the approved system for combat shooting at night.

Range permits at the close of the year numbered 456 issued for civilian usage. Commencing January 1963, the permits issued in 1962 will be voided and reissued with a change of color on a two year basis for reactivation of the files. Throughout 1962 on days conducive to good shooting civilian utilization of the New Bedford Rifle Range was always evident.

With regard to maintenance, buildings, fences, racks, benches, etc. have all been reconditioned and repainted at the range. Range equipment has been readied for usage starting in April 1963 for the National Guard Battalion.

Appreciation must be expressed here by this range officer for the co-operation and interest shown by your department and its employees.

Respectfully submitted,

ARTHUR LEE, SMC, USN, Retired
Range Control Officer

ANNUAL REPORT
DEPARTMENT OF PARKS
of the City of New Bedford, Massachusetts
for the year ending December 31, 1962

IN CITY COUNCIL,

Thirty-eighth Annual Report

OF THE

PLANNING BOARD

NEW BEDFORD, MASSACHUSETTS

For the Year 1962

PLANNING BOARD REPORT

City of New Bedford

January 1, 1963

To the City Council of the City of New Bedford.

Gentlemen:

The Planning Board submits its Annual Report for the year ending December 31, 1962.

Eight meetings were held during the past year for the purpose of holding hearings on changes on the zoning map. Fifteen petitions for proposed zoning changes were received for consideration by the Planning Board.

A summary of the cases with the action of the Board therein is set forth in the following table.

PETITIONS FOR ZONING CHANGES — 1962

Location	From	To	Recommendation by Board	Date of Meeting
1. That the zoning classification of Lots 12 and 308 as shown on Assessors' Plot 136 be changed from Business and Residential B to all Business, bounded and described as follows: Plot 136 Lot 12 — Parcel 1 Beginning at a point in the east line of Phillips Road said point being the northwest corner of land belonging to Fairway Realty Corp; thence easterly in northerly line of Fairway Realty Corp. 30' to an angle; thence easterly 62' to an angle in north line of Fairway Realty Corp.; thence southeasterly 294' to a corner in north line of Fairway Realty Corp.; thence northerly 36' to a corner in line of Fairway Realty Corp.; thence easterly 458' to a point in the west line of Route 140 being the northwest corner of land of Fairway Realty Corp.; thence northerly in west line of Route 140 1175.58' to a point in the south line of the Access Ramp to Route 140; thence westerly in the south line of the Access Ramp 446' to a point in east line of Old Phillips Road; thence southerly in the east line of Old Phillips Road 1345' to the point of beginning containing 14A 53.68 rds. Plot 136 Lot 308 — Parcel 2 Beginning at a point in the west line of Old Phillips Road being the southeast corner of the land to be rezoned:				

thence westerly in line of new Phillips Road 49.55 feet to a point in the east line of new Phillips Road; thence northerly in the west line of new Phillips Road 645.16 feet to Braley Road Extension;

thence easterly 111.85 feet in south line of Braley Road Extension to a point being the intersection of Braley Road Extension and the Access Ramp for Route 140;

thence southeasterly 48 feet in west line of Access Ramp to Route 140 to a point in the west line of Old Phillips Road; thence southerly in west line of Old Phillips Road to the point of beginning. Containing 1A 75.08 rods.

Business & Residential B	Business	Tabled Granted	January 26, 1962 March 19, 1962
--------------------------	----------	-------------------	------------------------------------

2. That the zoning classification of certain property on the north side of Hathaway Road, east of Shawmut Avenue, being Lot 1 and Lot 8 of Plot 101, be rezoned so that the sections of said Lots 1 and 8 owned by Continental Screw Company and zoned in part for Residence B zoning, be changed.

Residence B	Business		January 26, 1962
-------------	----------	--	------------------

That that part of Lot 1 now zoned for Residence B, be changed to Business, and that part of Lot 8 west of Lot 9 abutting Hathaway Road now zoned Residence B, be zoned for Business, and that that part of Lot 8 now zoned Residence B located east of Lot 9 be zoned Industrial B.

3. That the zoning classification of Lot 16 Plot 46 be changed:

Lot 16 Plot 46 is in a block bounded on the west by County St., on the north by Union Street, on the east by Eighth Street and on the south by Spring Street. Lot 16 Plot 46 starts at a point on the corner of Eighth and Spring Streets and extends northerly along Eighth Street for 108.55 feet; thence in a westerly direction 81.92 feet;

PETITIONS FOR ZONING CHANGES — 1962

Location	From	To	Recommendation by Board	Date of Meeting
thence in a southerly direction to Spring Street a distance of 109.45 feet; thence easterly on Spring Street to the corner of Eighth a distance of 81.0 feet.	Residence C	Business	Granted	March 19, 1962
4. That the Business Zone be extended another thirty feet easterly on the north side of Jarry Street; Plot 127C Lots 134-135-136 to a depth of 80 feet. The property now located on the northeast corner of Jarry Street and Ashley Boulevard is now zoned for Business on the north side of Jarry Street 100 feet east of Ashley Boulevard.	Business	Extension	Extension of Business Zone another 15 feet easterly on the north side of Jarry St.	March 19, 1962
5. The Business Zone on the southwest corner of Union and Tremont Streets be extended to include the adjoining lot 58 on Plot 44 of Assessors' Plans.	Business	Extension	Denied	March 19, 1962
6. The block bounded by Union, Newton, Court and Park Streets rezoned.	Residence B	Business	Denied 90 days expired after advertising of hearing — action of City Council void — see October 22, 1962.	April 23, 1962
7. Lot 9 of Plot 101 and that portion of lot 8 of Plot 101 now zoned for Residence B, be changed. Both lots are located on the north side of Hathaway Road.	Residence B	Industrial B	Granted	June 25, 1962

8. The area bounded by Brooklawn Avenue, on the south, Park Avenue on the north, Seabury Street on the west, and Lafayette Street on the east be rezoned.	Residence B	Residence A	Granted	June 25, 1962
9. That the Business Zone on the south side of Kempton Street be extended to a depth sufficient to include the entire Lot 7 on Plot 49.	Business	Extension	Granted	June 25, 1962
10. That the premises situated on the easterly side of Rodney French Boulevard and bounded on the northerly side thereof by Woodlawn Street now zoned as Residence A, be reclassified and zoned for Business, said premises herein now being owned by Huttleston Apartments, Inc., as to that portion hereof; extending from the south line of David Street southerly thereon on Rodney French Boulevard to a point approximately 60 feet north of the north line of Woodlawn Street, more or less.	Residence A	Business	Denied	June 25, 1962
11. That the airport in its entirety be rezoned to Industrial B, with the exception of a 100 buffer zone adjacent to and inside the existing property lines which would be rezoned to Industrial A and with further exception that property owned by the City of New Bedford under the jurisdiction of the Airport Commission known as Mt. Pleasant Homes bounded by Tarklin Hill Road, Kings Highway and Mt. Pleasant Street.	Residence B Business Industrial C.	Ind. B 100' Buffer Strip Ind. A	Granted	June 25, 1962

PETITIONS FOR ZONING CHANGES — 1962

Location	From	To	Recommendation by Board	Date of Meeting
12. That the zoning classification of property on the north side of Jefferson Street be changed to provide for an extension of Business Zone to include that portion of Plot 97, Lot 21, which is now zoned Residence B.	Residence B	Business	Granted	September 24, 1962

13. That the zoning classification of the property on Union Street, north side, from the easterly line of Newton St. easterly 183.47 feet, for a depth of 100 feet, from Residence B to Business. Beginning at the point of intersection of the easterly line of Newton Street and the northerly line of Union Street; thence easterly in said northerly line of Union Street a distance of one hundred eighty-three and 47/100 (183.47) feet more or less, to the point of intersection with the easterly line of land belonging to Harry and Freda B. Lipman; thence northerly by said easterly line of land belonging to Harry and Freda B. Lipman and easterly line of land belonging to Carl Herbert Johnson and Winnifred Allice Johnson, a distance of one hundred (100) feet, more or less, to a point; thence westerly in a line parallel to and one hundred (100) feet distant northerly from the northerly line of Union Street, a distance of one hundred eighty-three and 47/100 (183.47) feet, more or less, to a point in the easterly line of Newton Street;

thence southerly in said easterly line of Newton Street, a distance of one hundred (100) feet, more or less, to the point of beginning, all as shown on a plan on file in the office of the City Clerk and the Zoning Map adopted as part of Chapter 27 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

October 22, 1962

Denied

Business

Residence C

14. That the zoning classification on the following lots be changed from Residence B to Business:

Plot 97 Lot 25 located on the northeast corner of Jefferson and Mt. Pleasant Streets.

Plot 97 Lots 140, 22 and 23 located on the north side of Jefferson Street, east of Mt. Pleasant Street.

Granted

Business

Residence B

November 19, 1962

15. That the Business Zone on the south side of Kempton Street, be extended as follows:

"Beginning at a point ninety-eight (98) feet southerly from the south line of Kempton St. on the boundary line between the Town of Dartmouth and said City of New Bedford; thence southeasterly in said boundary line two hundred sixty (260) feet to the northerly line of Metropolitan Avenue;

thence easterly in the northerly line of said Metropolitan Avenue one hundred fourteen and 81/100 (114.81) feet more or less to land now or formerly of New Bedford Gas & Edison Light Company;

Thirty-seventh Annual Report

OF THE

BOARD OF APPEALS

NEW BEDFORD, MASSACHUSETTS

For the Year 1962

BOARD OF APPEALS

City of New Bedford

January 1, 1963

To the City Council of the City of New Bedford.

Gentlemen:

The Board of Appeals submits its Annual Report for the year ending December 31, 1962.

Meetings were held on the first and third Wednesdays of each month except when there were no appeals.

Twenty-seven appeals, under the Zoning Ordinance were received for consideration during the year. Seventeen of these appeals were granted, three were denied, one withdrawn, one reconsidered, and five were granted conditionally.

A summary of the cases, with the action of the Board is set forth in the following table.

*Granted conditionally

No.	Nature	Location	District	Date of Hearing	Action
1601	Permission to alter third floor to provide an additional apartment	26-28 Liberty St.	Residence B	January 3, 1962	Granted

Patrolman Louis Pontes

REMARKS AND RECOMMENDATIONS

The following improvements have been put into effect and acquisitions made for the New Bedford Police Department in the year of 1962. We of the department feel that because of these accomplishments the conveniences for the public and the services to the community have been immensely improved. We look forward to greater betterments in the future in regard to our relations with the public as guardians of their welfare and property.

During the year of 1962 there were four retirements and six deaths amongst the personnel of the Police Department (one active patrolman, four retired officers, and one civilian employee). Six patrolmen were appointed and one person was reinstated as a patrolman in the service of the Police Department.

The Detective Division moved into their new quarters on the Second Floor of Police Headquarters. The department now has the Detective Division and the Fingerprint unit adjoining each other with equipment and paraphernalia on a par with other well equipped law enforcement agencies.

A new Apeco Electro-Stat photocopy machine was purchased. The paper used in this machine will cost three and a half cents each copy compared to eight cents a copy for paper used in the replaced machine.

Two new electric typewriters were purchased. They are the first electric typewriters obtained for the department. The quality of the work put out by these machines and the efficiency attained is a marked improvement over the manual type machines.

Three new Ford Station Wagons, equipped with two stretchers in each and complete First Aid accessories were put into service this year. These vehicles serve as patrol cars and emergency ambulances. When the two regular ambulances are in use simultaneously, these wagons have proved their worth on many an occasion.

A new centralized record room was put into effect the latter part of the year. This was the first change and improvement in the handling of records in forty years. Since its inception, on a twenty-four hours basis, each day, the department has been able to supply reports, etc., to other law enforcement agencies, and supply the needs of the public in a minimum of time. It is a project anticipated for a number of years, and now being a reality, one in which we all take great pride.

It is recommended that a new ambulance and seven patrol cars be purchased for replacement of obsolete and outmoded motor vehicles.

The department is in dire need of fifty stands for no-parking, etc., signs.

A new oil burner and boiler is required to replace a coal burning unit which has been in use approximately forty years.

A shelter should be built for housing the emergency generator.

Railing for outside stairs at the South and East entrances to Police Headquarters should be erected for the protection of the public.

We of the office of the Chief of Police wish to convey to His Honor, Mayor Edward F. Harrington, and the City Council our thanks and appreciation for the consideration shown in our behalf during the administration of the Police Department in 1962. To all departments of the City of New Bedford we thank you for your help and assistance in many matters that were vital to the safety and well-being of our citizens. We congratulate and speak in terms of admiration for the fair and impartial manner in which the television, radio and press have handled police news. To the public who have been most liberal in their generous and understanding relations with the Police for 1962, let me say we shall strive to offer you better and more efficient service in 1963.

THOMAS F. CAWLEY, Chief of Police

Joseph A. Sciuto, M.D.
Board Members

Leo S. Harrington
Director of Public Assistance

To His Honor, the Mayor, and Members of the City Government of the City of New Bedford:

The Board of Public Welfare respectfully submits its annual report for the year 1962.

The year 1962 brought about a searching look at the public assistance programs; a newer, more realistic and timely approach to recognizing problems as they exist in the public welfare field, and a sincere step forward in trying to alleviate and solve these problems.

Emphasis is now being placed on services for the prevention of dependency and family breakdown and for those who suffer from social and economic difficulties. One of the duties of our economic and moral system is to assist, through public welfare, those who are socially and economically unfortunate, and to enable those who are aged and disabled to obtain a fuller and more satisfying life.

The major objective of public assistance agencies is the improvement of social services with public assistance families, to strengthen family life, safeguard children in hazardous home situations, and reduce dependency through effective programs of rehabilitation services.

Effective as of July 1, 1962, the State Department of Public Welfare formulated a plan to strengthen and refine the necessary social services for public assistance families. Family cases were defined as those receiving Aid to Dependent Children or General Relief cases in which there are minor children. For such families, a case load standard not to exceed 50 cases was set for each social worker, and a supervisory standard not to exceed five family workers per supervisor.

The social worker is required to acquire as full and complete an understanding as possible of the family as a unit, and to ac-

comply with this, it became necessary for frequent visits to be made in the home. Families classified as having the most serious problems, needing concentrated social services, are to be visited in their homes as often as necessary while this need exists. Quarterly visits, necessary to establish continuing eligibility, still exist in Aid to Dependent Children cases.

With the reduction in case load, the social worker, by more frequent visits with the family, is able to learn more thoroughly the problems of the family, its weaknesses and strengths, and its ability and capacity for facing its problems, and to arrive at a plan of treatment for the family in the field of rehabilitation. Stress is being placed on adequate housing, educational opportunities for the children and adults, work incentives for employable family members, health of all members of the family unit, recreation, religious activities and all factors which make for a well rounded and adjusted family unit.

As of September 1, 1962, in order to take advantage of increased federal reimbursement for certain administrative expenditures, a program of increased social services for aged and disabled recipients was inaugurated. The purpose of providing these services was to help families and individuals who are applicants or recipients of Old Age Assistance, Medical Assistance for the Aged and Disability Assistance, to maintain or restore themselves as useful, productive individuals, by assisting them to be self-supporting, independent, able to care for themselves and capable of participating in community life. Emphasis is placed upon adequate home setting, home-making, nursing home and chronic hospital placements, physical and mental health, social functioning, employment abilities and potentialities of rehabilitation with an eye for reducing and eliminating dependency of applicants and recipients.

As of January 1, 1962, there was a revision of the Medical Care Plan Schedules for hospitalization, nursing and convalescent home exceptions and public medical institutions.

In compliance with federal requirements for reduction and control of fraud, effective April 6, 1962, the State Department of Public Welfare issued a definition of fraud and the administrative steps to be taken if the element of fraud is found to be existing among applicants and recipients of aid.

Chapter 118A of the General Laws was amended as of August 5, 1962 by Chapter 411 of the Acts of 1962 to provide that as a basis of eligibility an applicant for Old Age Assistance must have resided in the Commonwealth for one year immediately preceding the date of application. The previous factor of three years residence in the nine years preceding application was deleted from the law.

Chapter 556 of the Acts of 1962 amended Chapter 118 of the General Laws, effective as of September 1962, eliminating requirement of fitness of the parent and suitability of the home in the Aid to Dependent Children category.

To facilitate the location of missing parents, whose whereabouts is unknown, for all family cases in receipt of assistance, a Card of Missing Parents must be prepared and submitted to the State Department of Public Welfare within a three-month period. A central State agency has been established for the registration and location of missing parents.

Under the Social Security amendments, incorporated under Federal Public Law 87-543, signed by the President, was included a provision for extending Aid to Children of Unemployed Parents to June 30, 1967.

State Department of Public Welfare financial responsibility for providing foster care to children accepted by the Division of Child Guardianship for such care, has been established by Chapter 535 of the Acts of 1962, which amended Section 23 of Chapter 1197 of the General Laws, effective as of September 4, 1962.

Also effective September 4, 1962, Chapter 597 of the Acts of 1962 amended Chapter 118A increasing the exemption of certain children in the Old Age Assistance and Medical Assistance for the Aged programs. In Old Age Assistance, single children living with their parents had their exemption increased to \$2450.00 per annum, and single children living apart from their parents, had their exemption increased to \$2750.00 per annum. Married children's exemption was increased to \$4750.00 per annum in both Old Age Assistance and Medical Assistance for the Aged.

The Old Age Assistance law was further amended, as of October 1, 1962, by Chapter 653 of the Acts of 1962, increasing the transportation allowance from \$4.00 to \$5.00 per month.

Persons who are released to family from State mental institutions are now eligible for public assistance, if a need exists. Eligibility factors for public assistance and the community of responsibility are the same as for persons released on a visit status.

By an amendment to the Social Security Act, provision was made on October 1, 1962 for federal financial participation for the Aid to Dependent Children second parent (natural or adopted) when his physical or mental incapacity or unemployment deprives the child of support or care. Prior to this, federal financial participation was allowed for but one parent.

As of October 1, 1962, the federal matching ceilings on Old Age Assistance and Disability Assistance cases were increased; Old Age Assistance to \$54.00 per case, and Disability Assistance to \$46.50 per case.

A restatement of federal financial participation in the federally aided categories, including the changes of October 1, 1962, is as follows:

Old Age Assistance — \$54.00 per month per case.

Medical Assistance for the Aged — 50% of the monthly vendor medical expenditures.

Aid to Dependent Children — \$20.50 per month for each eligible child and parent included in the grant.

Disability Assistance — \$46.50 per month per case.

State reimbursement is now as follows:

Old Age Assistance — $\frac{2}{3}$ of non-federal monies in cases legally settled in the Commonwealth, and the full amount of the non-federal share in cases which are without legal settlement.

Medical Assistance for the Aged — Vendor medical payments, $\frac{2}{3}$ of the non-federal share; direct payments and burials, $\frac{2}{3}$ of the amounts expended as direct payments to recipients, and for vendor payments for burial expense.

Aid to Dependent Children — $\frac{1}{3}$ of the amount of aid expended in this program.

Disability Assistance — an amount which, together with the federal reimbursement, shall amount to 75% of the assistance expenditures.

Because of the increased stress on social services, as of September 1, 1962, federal financial participation in administration was increased for salaries, employee benefits and travel of those employees actively engaged in rendering services. The increase in Aid to Dependent Children now results in 75% reimbursement, and 55% in the categories of Old Age Assistance, Medical Assist-

ance for the Aged and Disability Assistance. In the latter three categories, expenditures for employees who are working on other than the direct rendering of services are reimbursed at the previous rate of 50%.

During the past year we have been most fortunate in obtaining co-operation and assistance from every person and agency with whom we have been in contact, and for this we wish to extend our sincere appreciation to: the Honorable Mayor and Members of the City Council, Heads of other City departments, Mr. James A. Donnelly, District Director of the Massachusetts Department of Public Welfare, and his staff, members of the staff of this department, and to the many private agencies, businesses and individuals whose names are too numerous to mention in this report.

Respectfully submitted,

LEO S. HARRINGTON,

Director of Public Assistance

GENERAL RELIEF

The following cases were granted hospital care during the year 1962:

- 81 House and 92 Clinic cases, having New Bedford settlement.
- 13 House and 19 Clinic cases, having no settlement.
- 5 House and 3 Clinic cases having other cities and towns settlements.

This is a total of 99 House and 114 Clinic cases.

The physicians attached to the Board made 84 house visits and had 464 office visits from recipients of General Relief.

The Board of Health requested this department to procure histories and determine settlements of 76 cases.

Annual Report
OF THE
CITY PURCHASING
DEPARTMENT

CITY OF NEW BEDFORD
MASSACHUSETTS

For the Year 1962

BRADBURY-WARING, INC.
Printers
1963

December 31, 1963

The Honorable Mayor and City Council
City of New Bedford
New Bedford, Massachusetts

Gentlemen:

We have the pleasure of submitting to you our report for year 1962.

We are grateful for your support and continued cooperation in our efforts to conduct all purchasing activities in accordance with the laws and ordinances of the City.

The City departments have been most cooperative in our efforts to effect for them every saving possible and we have continued our efforts to give all qualified bidders an equal opportunity to bid in order to obtain for the City the maximum value for money expended.

Respectfully submitted,

FERNANDO P. CRUZ

Purchasing Agent

NOTE: Albert E. Catterall was City Purchasing Agent from January 1, 1962 through June 16, 1962, the period covering this report.

**CITY OF NEW BEDFORD, MASSACHUSETTS
PURCHASING DEPARTMENT**

REPORT OF THE PURCHASING DEPARTMENT — 1962

The work of the Purchasing Department during 1962, the sixth full year of its operation, is summarized in the schedules of Requisitions, Purchase Orders, and Contracts listed on the following pages.

The City Ordinance provides that the Purchasing Department is responsible for procurement of all supplies and contractual services required by any department which derives its support wholly or in part from City funds, with the exception of professional expert consultant or similar contractual services. The Department is also responsible for the disposal of all surplus scrap and unusable materials.

The operating expense for 1962 follows:

Salaries and Wages	\$15,414.51
General Expenses	2,301.97
	<hr/> \$17,716.48

Purchases of miscellaneous small items, usually required immediately, are made promptly after prices have been checked. On items involving less than \$100.00 competitive bids are invited by telephone, on items over \$100.00 by mail and on special equipment bids are advertised. Contracts are issued on purchases involving \$500.00 or more.

All advertised bids are received sealed by the Purchasing Department, and are opened and read in public and a summary of the bids prepared and posted on the Bulletin Board. When inviting bids on contract purchases and on purchases under \$500.00 efforts have been made to include all known concerns in New Bedford who are in a position to submit bids, and many contracts and purchase orders have been awarded to New Bedford business companies.

The City is exempted by law from payment of Federal Excise Taxes and it has been the policy of the Purchasing Department to provide exemption certificates to cover such taxes where taxes may have been paid previously. Purchases of motor passenger cars, motor trucks, batteries and other automotive equipment are covered by exemption certificates.

It has been the practice of the Purchasing Department to arrange for cash discounts whenever possible and there is record of over 400 Sellers who regularly allow discounts on purchases made by the City. The City Auditor and the Department Heads are fully aware of the advisability of taking cash discounts, and through their cooperation the total of cash discounts earned and taken during 1962 is enough to pay the operating expenses of the Purchasing Department.

CONTRACTS

Formal Contracts are required to authorize purchases of \$500.00 or more and 205 such contracts were written during 1962. Contracts are drawn up by the individual departments and mailed out for Contractor's signature after which they are returned to the Purchasing Department and processed.

No work is permitted until contract and bond have been approved by the City Solicitor and signed by the Mayor.

Many contracts were issued for future delivery on an established price basis of supplies used by various departments, resulting in uniform quality and minimum cost. Such contracts are based on total requirements with no guarantee of quantity.

Much progress has been made during 1962 in expediting processing of contract documents but the interval from award to execution approximates ten days and efforts will continue to reduce this interval.

SAVINGS

Over-all savings through centralized purchasing cannot be determined accurately although certain definite savings over prices previously paid under similar market conditions, or prices known to be under the prevailing market, have been recorded and details are available from the Purchasing Department files. Because of the varied types of work covered by construction contracts, there is no definite basis for comparison of costs, but the wide circulation given to Invitation to Bid has undoubtedly resulted in substantial savings to the City.

Assistant Superintendent,
Secondary Education

Office of
Superintendent of Schools
New Bedford, Mass.

December 26, 1962

Honorable School Committee
New Bedford, Massachusetts

Mrs. Ferreira and Gentlemen:

In accordance with the laws of the Commonwealth and the adopted policies of the New Bedford School Committee, I have the honor of submitting my second report as Superintendent and the one hundred and second annual report of the New Bedford Public Schools.

The accompanying reports from the two assistant superintendents and the principal of the senior high school have outlined the accomplishments of the past year. Presented in a separate report, the directors of each department have detailed the activities in their special areas. I will confine my report to the Ellen R. Hathaway School project, budgetary comments and recommendations for the future.

Since the year 1962 marked the occupation of the Ellen R. Hathaway School it is most appropriate that for future reference the record contain these pertinent dates and facts:

May 28, 1960 — Harrington Memorial School, built in 1889, destroyed by fire.

July 5, 1960 — School Committee voted to direct the Superintendent to arrange a meeting with the School Building Assistance Commission of the Commonwealth of Massachusetts.

July 14, 1960 — City Council voted to return the Thompson Street School to the jurisdiction of the School Committee so that pupils formerly assigned to the Harrington School might be accommodated.

July 29, 1960 — School Committee held their regularly scheduled meeting at the Brooks School to discuss with residents of the area various recommendations as to location and size of the replacement school.

August 16, 1960 — "Building Needs Conference" was held with the Massachusetts Building Assistance Commission and tentative approval of the project was obtained.

- October 14, 1960 — School Committee voted to build the school on the site of the Hathaway Playground and rename the area the "Ellen R. Hathaway School and Playground."
- October 18, 1960 — Park Board voted to consent to the building of the Ellen R. Hathaway School on the Hathaway Playground area but also voted to retain control and custody of the remaining portions to be used as a playground as stipulated in the will of the donor.
- November 30, 1960 — Architectural firm of Tallman, LaBrode, Drake and Underwood signed the contract to submit plans for a new school.
- December 5, 1960 — First estimate of cost presented by the architects, \$804,553., accompanied by preliminary plans.
- December 22, 1960 — Preliminary plans and cost estimated approved by Massachusetts School Building Commission.
- December 28, 1960 — School Committee voted to accept the preliminary plans.
- February 9, 1961 — City Council voted to request reasons why building costs exceed \$600,000.
- March 2, 1961 — City Council Finance Committee met to discuss with architects, superintendent and representatives of School Committee revised plans and costs.
- April 14, 1961 — Approval of revised plans voted by the School Committee.
- April 18, 1961 — Revised plans and costs of \$720,000 submitted to Massachusetts School Building Committee.
- May 4, 1961 — City Council voted approval of \$720,000 bond.
- June 6, 1961 — Massachusetts School Building Committee approved revised plans and costs.
- July 31, 1961 — Specifications published and bids invited.
- September 19, 1961 — Contract awarded for the building and the site development.
- September 10, 1962 — Pupils occupy 16 classrooms.
- December 2, 1962 — Ellen R. Hathaway School Dedication Ceremonies.

The
Harrington
Memorial
School
1889

The old and —

The
Ellen R. Hathaway
School
1962

While formal acceptance of the school by the School Committee awaits the completion of certain minor items, this preceding "Biography of a School" illustrates in material form the manner in which the people, the local and state agencies must cooperate. From the night the fire started until the pupils walked in the front door of the new school, 2 years, 3 months and 12 days elapsed and these expenditures took place:

Building Cost — \$574,500.00 — \$16.54 per sq. ft.
\$35,900 per classroom

Equipment Cost — \$44,524.62

Total Cost* including Site Development

and Equipment — \$682,500.00 — \$19.65 per sq. ft.
\$42,660 per classroom

*These are figures to date based upon an area of 34,733 sq. ft. and 16 classrooms designed for 480 pupils.

A school becomes more than bricks and mortar — when children enter —

and begin a new day in a new school.

Kindergarten and phonics —

Kindergarten and numbers —

— begin the process which never ends.

Read all those — and more? — before we finish Grade 6!

We study in groups and —

**do research individually —
via the filmstrip viewer.**

. . . "Sweet land of Liberty" . . . !! —
studied to be appreciated.

Programed learning in mathematics allows individual progress.

Elementary School Library — a valuable asset to learning.

Musical talent must be developed early.

Modern visual aids are essential tools of modern teaching.

"Good schools must have good maintenance."

GEORGE M. McCARTHY
School Building Maintenance Foreman.

Detailed budgets for each new year and financial statements of expenditures for each past year are a matter of record this year as they have been for the past 102 years. It is realized that when communities are compared as to their support of education many factors are involved and many comparisons conceal more than they reveal. However, certain internal comparisons can validly be made when a community looks at its own budget year after year for the purpose of discerning trends.

One trend most obvious is the inadequate amount allocated to maintenance each year. Following are revealing percentages:

1958	—	2.7%
1959	—	2.2%
1960	—	2.4%
1961	—	2.6%
1962	—	2.7%
1963	—	1.7%

With a system operating 34 buildings, 10 of which were built in the 1800's, the maintenance budget should be approximately 4% or about double its present appropriation. Salaries were budgeted in 1962 at 86% of the total figure and in 1963 will be approximately 87.4% of the new budget. In most communities the salary appropriation usually does not exceed 85% of the total figure. Does this mean that New Bedford has been paying top salaries? The answer is quite the contrary. New Bedford, endeavoring to keep up with minimum salary requirements legislated by the Commonwealth, has been operating on a minimum essentials budget for some years. This is evident from per pupil expenditures comparisons noted as follows:

Median for Massachusetts	\$450.00
50 States and D. C.	414.00
New Bedford	356.21

The New Bedford figure is based on average daily attendance for the month of October 1961 and the 1963 budget with the expenditures for Adult Education, Public Use of School Buildings, and Summer School subtracted. Variance with other published figures is explained by certain state reports based on school year versus fiscal year, instructional costs versus total costs, average daily attendance versus average daily membership. The figure used is more realistic since

expenses for cafeterias, athletics, transportation and administration are integral parts of the school system and represent a portion of the tax dollar.

It is true that all the large cities of this nation are in trouble. The choking congestion of streets and highways with more automobiles each year, the gray areas of run-down housing, outmoded business areas, fragmentation of the tax base, all are contributing to making some cities the abode of the very poor and the very rich with the middle classes moving to the suburbs returning each morning to the city to work.

The problem is immense, but the role of the school, the attractive, modern school as a catalyst in the creation of a new neighborhood and as an anchor to hold older neighborhoods in central city areas is most clear. These city neighborhoods are dependent upon their ability to attract families who already have a wide range of housing choices. The reason for choosing a particular neighborhood many, many times depends largely on a school building with a school program of high reputation. Witness the fact that the Hathaway School, located in a so-called static neighborhood, was designed for 480 students, opened with 518 and now enrolls 538 pupils. The rehabilitation of areas housing large numbers of culturally deprived residents is handicapped from the start unless the area contains a modern school equipped to lift the new generation to "higher horizons."

With this in mind, it is my sincere hope that 1963 will see definite steps taken to initiate a program consisting of these steps:

1. Replace the Parker Street School (1852), Cedar Street School (1855) and the Merrimac Street School (1857) with one unit of at least 20 rooms built in the Parker Street School area.
2. Construct an addition of at least 30 rooms to the New Bedford High School.
3. Construct a 1-story cafeteria at the Normandin Junior High School and convert the present cafeteria into classrooms.
4. Add 5 classrooms to the Keith Junior High School by utilizing the recessed area in the academic wing.
5. Rehabilitate the cafeteria area in the Roosevelt Junior High School.
6. Survey the Clifford School area with a view toward relocation as a result of the impact of Route 195.

7. Obtain a site for future building in the area north of the Campbell School.

8. Include in the new building program bond sufficient funds to rehabilitate older buildings.

To present these eight recommendations primarily concerned with the physical plant aspects of education is not to neglect the high priority needs of reducing our high dropout rate, up-dating the curriculum, providing for the needs of the exceptional child and encouraging the in-service training of teachers. Rather, these recommendations are urged so that the valiant efforts in the pursuit of excellence now being expended will not be in vain.

We have travelled a long road from the days of stage-coach to the satellite. Our nation, with its constitutional government based on individual freedom, has weathered many perils for more than 150 years. Certainly, our schools have had much to do with this extraordinary achievement. Just because our constitution does not mention education, it is most important that each community feel the obligation of supporting the best possible kind of education. How else except through schooling could an entire people become capable of commanding its own destiny through the workings of a representative government?

Can we afford to be free in this era of cold war conflict? The question may well be answered by the communities who properly answer the question: "Can we afford the kind of education which teaches and demonstrates to all our children in all our neighborhoods the value of freedom and equality of opportunity?"

Problems of personnel, finance and space seem to be always with us but it is a rewarding and satisfying experience to be able to work on these problems in the company of sincere, interested citizens such as those on the New Bedford School Committee and to know that one has the full cooperation of a staff devoted to the purpose of providing the youth of the City of New Bedford with rich educational experiences resulting in intellectual growth and responsible citizenship.

Respectfully submitted,

JAMES R. HAYDEN,

Superintendent of Schools

ANNUAL REPORT

DEPARTMENT OF SECONDARY EDUCATION

This year, as in every year, secondary education has endeavored to direct its educational opportunities so that the abilities of all pupils may be developed to the maximum. Principally, our obligation to the youth of New Bedford is to prepare them for adult citizenship. Additionally, the educational program must be kept dynamic to maintain the interest and continuity essential to pupil achievement. In these efforts we constantly attempt to increase the holding power of our schools.

To this end, we seek to enrich the curricula by regularly revising courses of study, by introducing new educational programs and services, and by improving the quality of classroom instruction.

Money may be indispensable, but it is perfectly possible to spend it and still be unable to achieve the desired results. If we consider this statement in the light of tangible achievements during this year, it can be said, with objectivity, that the results for each school dollar spent have been fully attained. It is our opinion that the taxpayer and parent can be assured that each pupil is getting an education more than commensurate with the per pupil expenditure. This implies that we have adjusted and improved as much as we could within limitations of our budget.

PERSONNEL

The most important key to an effective educational program is the classroom teacher. The ultimate responsibility for quality education is the quality of the teaching.

Recruitment

Assessing the problem of teacher personnel, it is again evident that the situation is no more stable than a year ago.

1. Thirty-two teachers were newly elected to vacancies created by resignations and retirements.
2. In addition, nine teachers were elected to meet new requirements of school faculties.
3. Five teachers returned from leaves of absence.
4. Significantly, fifteen new teachers were elected to English assignments, seven in one junior high school alone.
5. Eight declinations of appointments complicated and aggravated teacher recruitment.

Non-tenure status

The peak turnover of teachers was reached this year, and the following statistics reflect the seriousness of adopting measures to assist our inexperienced teachers:

<i>School</i>	<i>Total Faculty</i>	<i>Non-tenure</i>	<i>Percent Non-tenure</i>
Keith	55	26	49%
Normandin	51	17	33%
Roosevelt	49	16	33%
Totals for junior high schools	155	60	39%
N. B. H. S.	96	28	30%
Totals Secondary schools	251	88	35%

Supervision

Constantly changing faculties reduce the effectiveness of teaching continuity. Except for the comparatively few devoted and experienced teachers, some schools, therefore, could become, from an educational point of view, essentially mediocre institutions. That they are not so in New Bedford is due to the close supervision and training given by principals and department heads. The genuine desire to foster improvement of instruction is exemplified by the many classroom visitations and individual teacher conferences held by these staff members.

If we are to have a full return on our investment when we hire teachers, we must have a system of reporting their performance and growth. This will assist them and enable us to retain qualified personnel. Beginning this September each principal and the responsible department head separately submitted ten-week progress reports for each non-tenure teacher under his supervision. Prior to sending these reports to the assistant superintendent, each supervisor discussed his appraisal with the teacher who countersigned the report. The signature of the teacher is not an expression of approval or disapproval, but merely an indication that the report has been examined.

It is hoped that these reports will make us increasingly sensitive to the need for assisting inexperienced teachers.

Reviewing their good points and those facets of their teaching which require improvement, discussing the results of this evaluation with them and planning specific ways for improving their performance will produce benefits both to the teachers and to the school system.

Principals have scheduled intra-school visitations for their teachers as another practice in the improvement of instruction. Those who are new to the teaching field have an opportunity to see their fellow teachers at work and observe their techniques and methods.

Another item of service offered in our junior and senior high schools is noted. During the year, fourteen of our more experienced faculty members assumed the responsibility of supervising teacher trainees for a period of ten weeks.

Increased duties of instructional supervision pose several problems for department heads. Among these are insufficient time due to their own teaching assignments, continued travel to each junior high school, and the infrequency of visits to some teachers caused by schedule difficulties. Thought should be given to the possibility of a supervisor of classroom instruction, whose responsibilities would encompass the training and supervision of all teachers who are in need of help whether or not they are on tenure. This could materially contribute to raising the standards of quality teaching.

In-service training

Three in-service courses were sponsored by the school department. These courses were designed to bring teachers up-to-date, to start new programs, and to acquaint teachers with additional study.

A reading course for junior high school teachers of English was held during February-April in preparation for a developmental reading program to be incorporated into grades 7 and 8 in September. Twenty-three junior high school teachers completed the course, gaining considerable acquaintance with the subject matter, the methodology, and the instruments needed for the successful pursuance of a developmental reading program.

For junior and senior high school mathematics teachers, a course in "modern" math was given. The texts used in the course were the School Mathematics Study Group (SMSC) materials for grades 7 and 9. Thirty-two teachers completed the course.

Ten business education teachers completed an intensive course in Electronic Data Processing held between April and June.

Advanced Study

It is worthy of notice that during the summer of 1962, ten teachers, under scholarship grants, attended summer institutes: six studied the latest developments and techniques in the field of science, two studied in the field of French and two traveled to Brazil for study in Portuguese. Currently, two teachers are attending a year long in-service course in Earth Science, and one teacher attends monthly seminars concerning the "new" Biology. These are in addition to the many who pursued summer study and others who are engaged in study at present on a tuition basis in the process of earning a Master's Degree. Such interest on the part of our faculty members is most encouraging.

Department heads have been active in keeping abreast of latest developments in their respective subjects by attending conferences and seminars.

CURRICULAR DEVELOPMENTS

Each department continued to focus its pedagogy upon the improvement of traditional instruction and of introducing into the curriculum as many of the newly proven trends which will best challenge the abilities of the school population and meet its needs. Although several recommendations were made for the senior high school, changes through necessity were held to a minimum due to the overcrowded conditions in the school. In the junior high schools, some program expansion was made possible by the adoption of a "rotating-omission" schedule for holding classes.

English

At the New Bedford High School, one concrete result of teacher-committee study was the establishment of a detailed vocabulary program for all grades and in all curricula. The closed-circuit television facilities were used to present several panel discussions on literary topics. In February, March, and April, three eleventh grade College Preparatory classes received their instruction from the Humanities course televised on Channel 2 . . . with the usual good results. From the Audio-Visual Aid Department, there come generous numbers of recordings to enhance the study of poetry and drama. Money

in the sum of approximately \$3,000.00 was invested in book replacements and in entirely new works to strengthen the English courses of study on all levels.

Perhaps the most significant development of the year in the English Department was the planning and incorporation of a developmental reading program for all classes of grades 7 and 8 in the junior high schools in September 1962. More classroom periods were allotted for English meetings by the new type of schedule.

Another unique feature of the year was the establishment of a Summer Workshop in English. A small group of English teachers produced a complete Language Arts curriculum guide for the junior high school grades, encompassing the four areas of Writing, Reading, Oral Composition and Literature. The guide was printed in time for use in September, 1962. The product was especially significant and important because of the large number of inexperienced English teachers currently entering our school system.

Mathematics

The advantage of updating mathematics teachers through an in-service course results in the introduction of modern mathematics for accelerated classes. At the high school, three classes in geometry are using MSG materials; six seventh grade classes, two in each junior high school, are studying from MSG texts.

Recommendations:

1. That provision be made to offer this instruction in modern math for a greater number of students.
2. At the High School, plan to offer a course in calculus for advanced standing on the college level.
3. Require a second year of math in the General Course.

Social Studies

The second year of the course in Problems of Democracy at the high school created an increase of three additional classes. The present enrollment of 298 pupils is divided into five divisions each of Business Education and College Preparatory students. In one of the junior high schools, team teaching is being tried involving one English and one social studies teacher in a core-curriculum type of program.

Recommendations:

1. Change present one-year course of American History and Government to a two-year course at the high school.
2. Plan Summer Workshop to reconsider and reorganize the courses in social studies for junior high school grades.

Science

A course at the high school in the "new" Biology, which includes laboratory periods, is producing unusual interest and enthusiasm on the part of the senior students. The impact of new and valuable equipment purchased with NDEA, Title III funds has not only increased the interest of the students, but has encouraged our teachers to greater efforts. The closed circuit TV in the high school has proved very effective, permitting the presentation of the teaching of a skilled instructor, with every student having a "front seat." Our TV circuit and its use was the topic of a Physics seminar at Cornell University this past summer, as presented by the head of our science department. On a trial basis at one of our junior high schools a course in Earth Science for ninth grade students has evidenced much interest.

Recommendations:

1. The "new" Biology be adopted for more classes at the High School.
2. Adopt Earth Science in grade nine for pupils in the General and Business Curricula.

French

The initiation of French instruction at the seventh grade level this year now makes possible an orderly integration into the high school program. Provisionally, the best pupils from the sixth grade French classes were selected for this program. There are two French classes in Grade 7 at Roosevelt, three at Normandin and four at Keith Junior High School. Due to scheduling difficulties, one class at Keith is a voluntary after-school venture on the part of pupils and teacher.

Significantly, a language laboratory was established in each of the three junior high schools. This has made possible unified achievement for all beginners, not only for the study of French, but for other languages as well. Fifty per cent of

the dollars spent for these laboratories were paid by the Federal Government.

Recommendations:

1. Expansion of present language laboratory facilities at the high school.
2. Continue the present program of seventh grade French in the eighth grade.

Portuguese

This department is leading the country in the teaching of this modern language at the high school level. A third year study is being offered to students in the high school. As a direct result of our accomplishments here, Portuguese courses were offered at the University of Massachusetts for the very first time in September 1962. Worthy of note, the professor who is teaching elementary and intermediate Portuguese at the University is a graduate of New Bedford High School.

Recommendations:

1. Plan to offer a fourth year of Portuguese study in September 1963.
2. Study the feasibility of including Portuguese in the lower grades and in the College I course on the same basis as the French.

Business Education

The department continues to update instruction in the development of students' knowledge, understanding, skills and techniques essential for initial employment in business or for advanced education in business. A unique distinction achieved during the year was that of becoming the second high school in the United States to offer a course in Electronic Data Processing. After careful screening, thirty senior students were selected to take the course which was held during after-school hours.

Library

Success of any library program depends on the extent to which certain conditions prevail: abundance of materials, their proper use, and physical arrangements making such materials readily available. Our high school library is about 4500 volumes short of the recommendation for a school with 2500

students, even if we consider only half of the standard set by the American Association for School Libraries.

In our junior high schools, department heads, teachers and librarians together must plan new ways by which entire classes, as well as individual pupils, can make increased and better utilization of library services.

NEW JUNIOR HIGH SCHOOL PROCEDURES

Certainly the junior high school dollar was well spent last year. A new type of rotating-omission schedule of classes became effective in September 1962. This enabled us to expand the program of studies: a developmental reading for all seventh and eighth graders, French for some seventh graders, honors science classes in grade nine, additional class periods provided in ninth grade gym and shops and in all major academic areas in all three grades. In effect, the school year has been extended in class time without changing the existing school hours.

The utilization of classroom space has reached the remarkable figure of 96.5% in one school. The rotation policy compared to the lengthened school day substantially reduces additional costs for maintenance and fixed expense. Another economic advantage is, of course, the very great savings which were realized in salaries for additional teachers who otherwise would have been needed.

All entering seventh graders and other pupils new to the building reported to the junior high school for an orientation program the day before the regular pupils reported in September.

The homework policy for seventh and eighth grade pupils was revised. These pupils now are given assignments daily in two major subjects requiring a total minimum study time of one hour.

PLANS FOR 1963

1. The School Committee has approved the formation of a New Bedford Summer School for 1963. Registration will be open to pupils in Grades 7 through 12 for a six-week study session. Courses will be made available for make-up credit, review and enrichment in all major subjects, provided enrollment is sufficient. The tuition for each course will be \$15.00 for residents and \$25.00 for non-residents.

2. A Summer Workshop has been approved for a teacher-committee to prepare a curriculum guide in social studies for the junior high school grades.
3. It is hoped that additional physical space will be provided in our secondary schools before the next school year. Over-crowded condition and the necessity of having many "traveling" teachers (20 at the high school) need to be eliminated. Any considerable increase in pupil enrollment in the secondary schools next year can be met only by an increase in present class sizes. The prospect of double sessions for the senior high school in September 1964 is almost assured unless new classroom space is added.
4. Consideration will be given to the possibilities of using lay personnel to relieve teachers for more professional duties:
 - a. Assignment to "cafeteria police duty" is an inefficient use of teacher personnel.
 - b. Lay readers for correcting papers would enable English teachers to expand composition experiences. Composition is the most neglected part of the English program. Its neglect results from inadequate time for the teacher.
 - c. Adult aides could assist department heads with clerical work and further the uses of the science and language laboratories in the senior high school.

SUMMARY

The clear and present need is additional classroom space. The limits of physical space within each secondary school are not being approached; they have been reached. No further innovations in the secondary program can foreseeably be undertaken unless adequate classroom space is provided.

Continued emphasis must be placed on the recruiting and the retaining of teachers equal to the challenge of an educational program which is academically sound and quality centered as well as flexible and experimental. Its success depends heavily on the experience and the dedication of the individual teacher.

There appears to be no simple solution to the complex problems of educating our youth.

ANNUAL REPORT

DEPARTMENT OF ELEMENTARY EDUCATION

The New Bedford Elementary Schools must provide a program of education based on the **NEEDS, ABILITIES AND INTERESTS** of all children. Every child in the City of New Bedford has the right to expect that the schools will offer him opportunity to discover and develop to the fullest extent the talents and abilities which he possesses. Well-qualified teachers, modern textbooks and modern school buildings are three prerequisites of an excellent school system. However, proper concern and provision for the individual pupil, to help equip him to meet life both satisfactorily and successfully, is also an important part of education.

A teacher with thorough professional preparation placed in every New Bedford classroom is a goal for which we are continually striving. During the year 1962, some of our children have actually been deprived of good teaching because better salaries elsewhere attracted many qualified prospects.

It is always desirable and most necessary that our classrooms be equipped with a sufficient supply of modern textbooks, including research and library books, if our children are to grow in learning.

Attractive, modern school buildings do much to enhance the learning of children, and to stimulate teachers into providing superior teaching. New Bedford can well be proud of the three excellent elementary schools built within the past five years.

In a system as large as our New Bedford Public Schools it is very necessary that special services in all areas needed by individuals should be included. These include the mentally retarded, the emotionally disturbed, the physically handicapped, as well as the children with superior academic achievement.

There has never been a greater challenge in the teaching profession than today. Swift cultural change is resulting in rapid curriculum changes. Therefore, our classroom teachers should be acutely aware of the need for growth in teacher competence.

In an effort to help them, all first year teachers, non-tenure and non-certified teachers are sent into other schools to observe good teachers at work, and this intervisitation among teachers pays big dividends. Meetings of new teachers for discussions with a group of experienced teachers have also

been most beneficial. Similar meetings will continue to be held until June, 1963.

Rapid advances in subject matter of teaching requires continuous effort on the part of the experienced teachers too. Therefore two State Extension Courses — one relating to psychology and the other to science teaching — were offered. Arrangements for a Boston University Extension Course, "Workshop in the Language Arts," have been completed and this Course will get underway early next year. Plans are also underway for an In-Service Course for teachers of Grades One, Two and Three, which is to be mandatory for all non-tenure and non-certified teachers.

Participation by teachers on various Book Committees gives them splendid opportunities to become familiar with the books in the areas being considered.

During 1962, a new fourth grade book, "Secrets of Old Dartmouth" was added to the Approved List of Elementary textbooks, as well as numerous fine reference books in the social studies. Revised and improved Health Book Series, and replacements for outdated penmanship books were recommended and placed in actual use.

An excellent new series in English is now on trial for a year in one of our schools. The Arithmetic Textbook Committee is about to recommend for adoption a book on the new, modern mathematics which would be placed in the Enrichment Classes, and later, in our intermediate grades. In one building cuisenaire rods are being introduced to a primary class as an experiment in our approach toward the new mathematics for pupils. We feel assured that our New Bedford Schools are well equipped with much of the outstanding materials in the educational field.

Two new classes called the "Intensive Teaching Classes" were organized this September. In an attempt to lessen the number of secondary school drop-outs, pupils with average intelligence, but already two or more years retarded in Grade Four, were selected to become members of these classes. By keeping the class membership small and by offering intensive, individual work, it is hoped that these children will gain the foundation they need in basic subjects and thereby be enabled to proceed with their classmates with no further repetition of grades.

Administrators in many school systems, including New Bedford, are seriously concerned about the lack of recognition

for dedicated teachers giving excellent service to the community. If the morale, initiative and dedication of our teachers is to remain on a high level, some incentive and recognition for superior effort must become a part of our policies. Teachers who love to teach, whose efforts are outstanding, should be recognized for this talent. For such teachers to receive the same salary as the poor or mediocre teacher is to cast them all in one mold, and this situation is not an honest appraisal of a superior teacher. Some sort of program should be set up and based on various criteria and categories, which could be evaluated periodically and established co-operatively.

In 1962, approximately forty new elementary teachers were given contracts to fill classroom vacancies. Many were inexperienced Teachers' College graduates, and the others were college graduates with no elementary classroom experience or were non-certified teachers. Intensive instruction and classroom assistance should be given these young people if they are ever to develop into valuable teachers. It is practically impossible for the assistant superintendent, whose tasks are now multitudinous, to devote sufficient time to this important work of supervising the beginning teacher. May I recommend that serious thought and consideration be given to creating the new position of a Cadet Supervisor whose principal duty would be to train all first year teachers. It would be an excellent investment that would repay itself many times over.

The opening of the new Ellen R. Hathaway School in September, 1962 provided over five hundred pupils with a modern building, beautifully equipped — and our citizens with justifiable pride in our third new elementary school within the last five years. One flaw — if it can be so labeled — is its size, for its growing pupil enrollment already has crowded its sixteen classrooms.

May I urgently appeal to the members of the New Bedford School Committee to consider the erection of a building with a minimum of twenty rooms, when the new Parker Street School replacement gets underway? A large central building would enable the three Enrichment Classes to have permanent residence and thus solve an annual placement problem for this particular group of children.

The establishment of summer workshops for elementary pupils is gaining wide approval in many parts of the country. A study of such workshops will be undertaken this year, and a proposal for offering both enrichment and remedial classes

on a self-supporting basis in July, 1963 will be submitted for your approval this coming year.

In a school system as large as our New Bedford Public Schools, it is not surprising that we have in our classrooms many seriously emotionally disturbed children. A Massachusetts state law, passed in 1962, now permits the establishing of special classes for teaching these pupils if the services of qualified teachers can be secured.

In all fairness to the emotionally upset child and to the average pupil whom the former often disturbs, may I recommend that funds for at least one or more of such classes for emotionally disturbed children become a reality in 1964? These are our children with serious problems and they must be offered the type of education that will assist them to return to a more normal manner of living, so that they will be accepted by their peers, and become worthy citizens.

If one or more of these five recommendations is given consideration, I shall feel that we are honestly succeeding in our sincere efforts to provide the children in the New Bedford Public Schools with the very best education that could be offered by any comparable community.

ANNUAL REPORT

NEW BEDFORD HIGH SCHOOL

Increase in enrollment at New Bedford High School, constant since 1955 with the exception of 1960, continued this past September with a new student figure of 2510 students. The predicted enrollment of 2400 students last March was thus surpassed by over 100 giving us an actual increase* of 250 students over the previous year. Projected figures for September of 1963 at this time indicate an enrollment of 2600.

Our eight period day, now in its fourth year, has been able to cope with this increased enrollment in so far as class scheduling has been concerned. However, the crowded and unhealthy conditions evident in all areas of the school indicate that the time is fast approaching when double sessions may be necessary. In fact, a close study of figures in February 1963 will indicate at that time whether double sessions will be recommended for next September.

The administration at the school is fully aware of all the disadvantages of the double sessions — academically and in extra curricula activities. However, the *one* advantage of the double session is that the overcrowded conditions would disappear and allow our twenty "traveling" teachers to have their own class rooms. The double session plan will be recommended only as a last resort and will simply mean that the eight period day can no longer provide for the scheduling of all classes.

The physical condition of the school plant is a credit to the maintenance department of our school system, and its cleanliness a result of the hard work of our custodial staff. The three largest maintenance projects needing attention are the replacement of our auditorium seats now over fifty years old and requiring almost daily repairing, a new bell system within a couple of years, and fire doors in the wells of all staircases in our East building.

Few changes were made in the curriculum during the year. All of our department heads are aware of the trends in their particular fields, but changes through necessity were held to a minimum due to the overcrowded conditions in the school. A review of the Evaluation Committee Report of October 1961 will show that approximately 85% of its recommendations for improvements were a result of our lack of space and facilities.

Among the few changes made in the curriculum were the following:

1. Introduction of Latin I in the junior year.
2. Introduction of Portuguese III to be followed by Portuguese IV in 1963.
3. Introduction of three SMSG classes in geometry.
4. Introduction of lab periods in senior biology.
5. Addition of three more reading lab periods.

The New England Association of Colleges and Secondary Schools requires that accredited schools must file a progress report two and five years following their last accreditation. Our 1963 report will through necessity indicate slight progress. However, it is my fervent hope that the 1966 report will show that an addition to our present building will have made it possible to carry out most of its recommendations to make our "good" school a still "better" one.

EMPLOYEES IN SERVICE

January 1, 1963

Teaching Corps:

Headquarters:	Superintendent	1
	Asst. Supt.	2
	Directors	7
	Assistants	17
High School:	Principal	1
	Asst. Principals	2
	Dean	1
	Dept. Heads	8
	Teachers	84
Junior High Schools:	Principals	3
	Asst. Principals	3
	Dept. Heads	2
	Teachers	148
Elementary Schools:	Principals	26
	Teachers, Grade 1-6	298
	Special Teachers	36
	Kindergartens	27
Adult Education:	Director	1
	Teachers	2
High School Guidance and Placement:	Director	1
	Counselors	4
Pupil Personnel Services:	Director	1
	Asst. Psychometrist	1
	JHS Guidance	6
	Elementary School Adjustment	
	Counselors	2
	Special Teachers	6
TOTAL		<hr/> 690

Civil Service Corps:

Clerks	24
Physician	1
Nurses	12
Attendance Supervisors	4
Building Maintenance Foreman	1
Mechanics	11
Supervisor of Custodians	1
Senior Building Custodians	18
Junior Building Custodians	29
Junior Building Custodians Unassigned	16
Janitresses	19
Cafeteria Supervisor	1
Managers	6
Cooks	4
Helpers	35 (5*)
Cashiers	7*
	<hr/> 189 (12*)

Miscellaneous Employees:

Accompanist	1*
ROTC Sergeant	1*
TOTAL NUMBER EMPLOYEES	881 (12*)

* Part time only

TUITION RATES

Rates of tuition for non-resident pupils for school year beginning September 1, 1962, payable in advance are:

High School	Year	\$375.00
Junior High)		
Sight Saving)		
Special Class)	Year	325.00
Work Shop)		
Elementary	Year	250.00
Kindergarten	Year	125.00
Evening School	Night	.50

PER CAPITA COSTS

The cost of instruction per scholar for Day Schools is based on the average number belonging and the total amount expended from taxation money, not including expenditures from the Sylvia Ann Howland, Paisler, Bourne Prize, Etta Abbott Smead, Brooks or Campbell Funds.

	Gross Cost	Net Cost (after state reimbursement)
High School	344.83	294.60
Junior High School	309.34	265.97
Elementary Schools	367.15	303.37
Average for Day Schools	350.04	293.14

The average cost per pupil in the Day School, for text books and supplies, has been as follows:

High School	\$11.83
Junior High Schools	11.56
Elementary Schools	8.97
Average for Day Schools	10.01

ANNUAL REPORT

of the

COMMISSIONER

of

PUBLIC WORKS

of the

CITY OF NEW BEDFORD, MASS.

to the

CITY COUNCIL

1962

BRADBURY-WARING, INC.
New Bedford, Mass.
1963

COMMISSIONER'S REPORT

February 19, 1963

Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

In compliance with Chapter 3, Section 58 of the City Code, I herewith submit the annual report of the Department of Public Works for the year ending December 31, 1962.

Appropriations and expenditures are shown in the various tables, together with a chart indicating the comparative Highway expenditures for the period from 1921 through 1962.

The operation of the department was confined mainly to general maintenance in the various divisions. Individual comment on the activities of each division appears unnecessary due to the fact that all pertinent information is contained in each divisional table.

NEW EQUIPMENT — The City Council ordered, and the Mayor approved, a Highway New Equipment Loan in the amount of \$500,000.00. Funds in the amount of \$290,000.00 were provided this department in 1962 under this loan. Contracts were approved for purchases to the extent of \$212,914.55. Payments were made in the amount of \$125,224.40 which are listed in detail elsewhere in this report. Additional purchases are contemplated in 1963.

CHAPTER 90 — Under this program, a contract was awarded to J. F. Simmons & Sons, Assonet, Mass. for the rebuilding of Shawmut Avenue, from Hathaway Road to the Municipal Airport. Work was started in December and should be completed in 1963.

I wish to express my appreciation for the cooperation that I have received from His Honor, Mayor Edward F. Harrington, the members of the City Council, the various department heads, and my own capable assistants in carrying on the work of the department.

Respectfully submitted,

EDMUND J. TOOMEY

Acting Commissioner

ENGINEERING DIVISION — 1962

AIRPORT COMMISSION — Plans were drawn and surveys made in connection with airport boundaries.

ASSESSORS — Real Estate transactions and transfers were filed at the Registry of Deeds. Such transfers were changed on city plots and indexed. Two sets of 173 plots are kept up to date and blueprints made of same.

BOARD OF APPEALS — Twenty-seven surveys and plans were drawn and records kept.

BUILDING DEPARTMENT — Lines and grades were given for 160 new buildings. The buildings were numbered and records kept.

CITY SOLICITOR — Plans and blueprints were made and descriptions were written on request of City Solicitor for the sale of City owned land and acquisition by Eminent Domain.

CURBING — Lines and grades were given for setting 6,815.5 lineal feet of curbing. Inspection and measurement was made of the same.

HARBOR DEVELOPMENT COMMISSION — Plans were drawn and surveys made for the development of the new industrial area along the waterfront.

HOUSE DRAINS — One hundred and thirty-two (4,779 feet) new house drains and six relays were laid connecting house sewer and surface pipes with the main sewer. Locations of these drains were measured, records were made of the same and drawn on drain plots.

INDUSTRIAL PARK — The Engineering Division worked in close cooperation with private engineering companies in the development of the Park.

PLANNING BOARD — (Zoning) Sixteen Plans for zoning changes were made and lists of abutters made and reported.

PARKING METERS — Fifteen surveys and plans were drawn for new meters and removal of meters. Surveys were made for No Parking signs and laying out stalls for No Parking areas.

PARK BOARD — Plans and surveys were made for new park areas and playing fields.

SEWERS — Surveys, plans, lists of abutters, assessments, contract plans, and specifications were made for six new sewers and four new surface drains. Construction costs, inspection, lines and grades were given for 6,562.7 feet of sewers and 5,365.36 feet of surface drains. Records of construction, final plans, and final assessments were made and reported.

SIDEWALKS — Surveys, plans and estimates were made for forty projects under the Betterment Act. Measurements, records, final plans, and assessments were made and reported. Plans and estimates were made for 127 projects laid by bonded private contractors for property owners.

STREETS — Surveys were made and plans drawn for the acceptance of eight new streets and two street line alterations. Lines and grades were given for all street construction and public utilities construction. Surveys were made and points set for the installation of new street bounds.

TRAFFIC COMMISSION — Surveys were made and plans drawn. Traffic counts were made at fifty intersections.

ROUTE 195 — The Engineering Division co-operated with State and Federal District Engineers and private Engineers on the proposed projects.

WATER BOARD — Lines, grades, Engineering and Survey information as required were given for all water main extensions.

MISCELLANEOUS — Lines and grades were given for fences, street lines, and sidewalks. Fifty-one accident or damage sites were surveyed. Plans were drawn to prepare for possible court action. Numerous plans were drawn and descriptions prepared for study by the City Council, Council Committees, and the City Solicitor.

Weather records were kept daily on rainfall, snowfall, wind velocity, temperature, and tides. This weather information was reported to State and Federal agencies and was made available to the public. Records were kept of street sweeping and ash collections. The area of cuts in pavements and walks were measured and recorded. City maps and plans were kept up to date, blueprinted and indexed.

GENERAL STATISTICS

January 1, 1963

Set off from Dartmouth	1787
Incorporated as a City	1847
Length of City	10.78 miles
Breadth of City (Maximum)	3.10 miles
Highest point	1250 feet north of Rockdale Ave. and Hathaway Road. Elevation 181.50 feet
City Datum	Based on 0.85 ft. above mean high water
State Datum	Based on mean sea level 2.55 feet below City Datum
Geometrical Center of City	Nash Road and Mt. Pleasant St.
Area — Land	12,241 acres
Ponds	193 acres
Land — Ponds	12,434 acres — 19.42 sq. miles
Tidal Water	8,451 acres — 13.21 sq. miles
Length of frontage on tidal waters	10.13 miles
Depth of main channel	30 ft. at low water
Average rise and fall of tide	3.66 ft.
Population — Registrar of Voters estimate	102,395
Assessed valuation	\$154,225,775
Assessed valuation per capita	\$1,506.18
Accepted streets — Area 1,424.246 Acres	241.501 miles
Bridges (3)	0.796 miles in New Bedford
Sewers	257.855 miles
Length of Intercepting Sewer:	
Outfall	0.626 miles
Intercepting	9.188 miles
15 Public Parks	260.10 acres
14 Public Playgrounds	31.72 acres
1 Rifle Range	230.35 acres
7 Parking Lots	5.81 acres
32 School Buildings — Area of Grounds	116.60 acres
1 Airport — Area of Ground	829.93 acres
Area of Easement	118.67 acres
5 Wharves — and other waterfront land (Harbor Development Comm.)	72.000 acres

WATER BOARD REPORT

March 21, 1963

To the Mayor and City Council
of the City of New Bedford

Gentlemen:

In accordance with the provisions of Chapter 25, Section 12 of the City Code of New Bedford, the Water Board herewith respectfully presents this, its ninety-third annual report, covering its operations for the calendar year 1962, and including the reports of the superintendent and water registrar.

Mr. John D. Curran, who had served as a member of the Water Board since November 1950, declined re-nomination for another term in June. Mr. Curran had served faithfully, and it was a great shock to the members of the Board to learn of his sudden death in December. The members of the Board take this opportunity to extend to Mr. Curran's family, their sympathy in his passing, and to further extend their appreciation of his long service as a member of the Board.

In October, Mayor Edward F. Harrington nominated and the City Council confirmed Mr. George J. Goulet as a member of the Water Board for the term to expire in June, 1966.

The average daily consumption for the year was 18,885,843 gallons, an increase over 1961 of 4.6%.

The ordinary receipts amounted to \$743,804.37, an increase of approximately \$7,000 over 1961. However, overall expenditures of the department, including bond payments and interest on bonds, amounted to \$795,905.44, leaving a deficit of \$52,101.07.

The City Treasurer sold one \$10,000 note, under authority of Chapter 400, Acts of 1924, in order to make funds available for the purchase of property in Lake-

ville. In April, land and buildings situated on Long Point Road, Lakeville, were purchased from the Morris Finance Corporation (former owners Robert F. and Joan M. Noyer) for \$6,600.00.

The water debt as of December 31, 1962 is \$2,105,000.00.

In December, the superintendent submitted to the Board for its consideration, a report with regard to the "color" and more especially the "corrosiveness" of New Bedford water. He was authorized to contact engineering firms for the purpose of chemical analyses of the water, towards the end result of correcting these conditions.

The following abstract from the water registrar's report shows in condensed form the financial operations of this department during the year. Full details will be found in his report, which accompanies this.

FIRST, BASED ON THE BUDGET SYSTEM IN ACCORDANCE WITH CITY AUDITOR'S ACCOUNT

	Salaries & Wages	Labor	Gen. Expense	Out of State Travel	Pensions	Total
1962 Budget	\$162,012.75	\$157,631.40	\$138,375.00	\$10.52	\$29,233.00	\$487,262.67

Adalberth S. Rozario

George J. Goulet

REPORT OF THE WATER REGISTRAR

City of New Bedford
 Water Registrar's Office
 Dec. 31, 1962

To the New Bedford Water Board:

Gentlemen:

I herewith present to you a detailed statement of the receipts and expenditures of the Water Works Department for the year ending Dec. 31, 1962.

The report is based on Budget vs. Expenditures and also on Receipts and Expenditures as previously.

RECEIPTS

FIRST, Based on the budget system

Budget Appropriation	\$458,019.15	
Refunds	191.67	
1961 Encumbrances	9,119.56	
Out of State Travel	10.52	
Pensions	29,233.00	
Transfer	4,550.25	
		<hr/>
		\$501,124.15

EXPENDITURES

Payrolls	349,583.86	
Bills	139,204.08	
1962 Encumbrance Account	8,076.12	496,864.06
		<hr/>
Unexpended balance, reverting to City Funds		4,260.09

SECOND, Based on receipts and expenditures as previously

RECEIPTS

RATES

Town of Acushnet, Special Rate	6,391.88
Town of Dartmouth, Special Rate	2,965.31
Under 10,000 cu. ft. per quarter	294,844.57
Over 10,000 cu. ft. and less than 100,000 cu. ft. per quarter	60,540.12
Over 100,000 cu. ft. and less than 1,000,000 cu. ft. per quarter	92,187.54

Over 1,000,000 cu. ft. and less than 2,000,000 cu. ft. per quarter	20,393.55
Over 2,000,000 cu. ft. per quarter	140,640.84
Estimated and building purposes	1,606.00

REPORT OF THE SUPERINTENDENT

March 29, 1963

To the New Bedford Water Board.

Gentlemen:

The annual report of the superintendent on operations of the department for the year 1962 and on the general condition of the works is respectfully submitted.

The financial report of the water registrar, rainfall records, and the usual tables showing in detail the work of the department, are incorporated as part of this report.

RAINFALL

Total rainfall for the calendar year 1962 was recorded at Quittacas Pumping Station as 46.70 inches, .8% higher than the average for the past sixty-eight years.

POND ELEVATIONS

The water level of Great Quittacas Pond reached its highest elevation at 52.13 on January 10, 1962. Its lowest level was 48.88 on September 26, 1962, and the average for the year was 50.76.

The water level in Little Quittacas is controlled by means of a sluice gate at the narrows between Great and Little Quittacas ponds.

1962 — A DEFICIT YEAR

The financial report of the New Bedford Water Department for the year 1962 is shown in detail in the various sections of the water registrar's report contained herein. It will be noted, that the Water Department operated under a deficit of \$52,101.07 for the year 1962 although net water receipts show an increase of \$15,459.94. This deficit is the second since 1951 and is due primarily to the following:

1. The annual bond and interest payments made necessary by the heavy borrowing for capital outlay Water Department projects since 1956.

2. An overall increase and reclassification of salaries and wages instituted in mid 1960 and also in 1962.

The amount of money returned to City funds in excess of money spent on the water system since the beginning of the works is now \$1,589,944.38.

As stated previously, if the surplus money earned by the New Bedford Water Department in past years had been used for Water Department purposes instead of for purposes other than for water supply, the Water Department at the present time would be operating in the black with no outstanding indebtedness.

NEW BEDFORD WATER'S SUPPLY PHYSICAL AND CHEMICAL PROBLEMS OF NEW BEDFORD WATER

On November 8, 1962, a report was submitted to the New Bedford Water Board, regarding certain results of limited physical and chemical investigations conducted by the superintendent into the quality of New Bedford water as it is delivered to the consumers. A copy of this report is included herein.

As a result of this report, the Water Board, on March 1, 1963, retained the firm of Camp, Dresser and McKee, consulting engineers of Boston, Massachusetts, to continue investigation into New Bedford water quality and to submit recommendations to the Water Board on improvements that can be made. At this writing, the investigation is in progress.

Regarding the physical and chemical characteristics of New Bedford water, two items of interest stand out beyond all others.

One of these is "color" which in New Bedford water exceeds desirable limits, but which affects only the "looks" of the water and has little or no effect on the sanitary quality for human consumption.

The second and more serious point of interest is the corrosive action of the New Bedford water as it is delivered to the consumer. Normally the extent of severity of corrosion qualities of water can be shown by the pH value or Hydrogen ion concentration. This indicator is not conclusive in itself, but does indicate

an acid or alkaline water and depending on the water's oxygen and carbon dioxide content, plus certain other factors will indicate the degree of corrosiveness of water to metals.

On the following pages is the report as submitted to the Water Board on November 8, 1962, regarding "color" and "corrosion" of New Bedford water.

CORROSIVE PROBLEMS OF NEW BEDFORD WATER PART 2 OF REPORT TO WATER BOARD

Submitted by Nathan S. Ellis, Supt.

November 8, 1962.

The New Bedford Water Department does not have a laboratory of its own. Bacteriological samples are taken as required once a week. Normally, this consists of 12 samples that are later tested by the Milk Laboratory of the Board of Health and an additional 6 samples that weekly go to the State Laboratories in Lakeville. These are bacteriological samples only.

In addition to this, chemical analysis is done periodically by the State Laboratories and on occasion, this department requests the Local Board of Health Laboratorians to make certain chemical tests which they do. The local Health Laboratory is set up primarily for bacteriological analysis of water and milk and is not equipped adequately for complete chemical analysis. This department has therefore relied mainly on the few State Department of Health chemical analyses that are made each year.

As a result of this, I believe that due to the number of samples tested and the fact that most of these samples are taken prior to chlorination, we have been missing an important consideration which has developed with New Bedford water during the last 20 years.

During my first year with the City Water Department, it was brought to my attention, that the effect of the water on copper meter screens (thin copper sieves used on all meters to prevent foreign matter from damaging the meters) was to actually dissolve the screens over a period of a few years. The remedy for this I was told, was to have meter screens nickle-plated or stainless steel. I felt however, that this ex-

tremely corrosive action of the water needed further investigation. Further visual investigation noted extreme copper staining in private baths, heavy tuberculation of unlined iron mains, extreme corrosion on steel boilers, and various other conditions indicative of a very corrosive water. (Iron mains are also effected by other considerations).

I found from past analysis sheets from the Water Works files that the "Hydrogen Ion Concentration" (pH value) of New Bedford Water varied at the source from about 6.3 to 7.0. From this it is apparent that New Bedford water is normally slightly acid (7.0 is neutral). Distribution system samples prior to 1941 also seemed to be in the acid range with 6.3 being the low recorded from state analysis.

In 1941 chlorine was first imparted to New Bedford water. Since that time, a notable decrease in pH values is evident in reports from the State Laboratories, although a great differential was noted. Ranges in pH values were recorded ranging from a low of 5.2 to a high of 6.7, during the years between 1941 and 1960. Some of these low readings which would normally indicate a very acid water were recorded at the source. Some were recorded after chlorination at High Hill Reservoir. A correlation between these reports from these analyses alone is difficult, if not impossible.

During 1961, this department obtained the necessary apparatus (a "Taylor Analyzer" with appropriate range slides) to complete our own pH values and periodically pH values were taken prior to chlorination, after chlorination, and after dissipation of the chlorination residual within the distribution system. The results were quite informative. Prior to chlorination the range of pH values varied from about 6.3-6.6 as before, but immediately after chlorination, a drastic drop in pH values to ranges from 5.0 to 5.4 was evident and consistent. The samples taken in the distribution system also indicated a pH value of 5.0-5.4 and no recovery of pH occurred. It then became evident that due to the chlorine being added to the water as required by the State Board of Health, a much more acid water was and is being delivered to the public.

In order to check our findings, I enlisted the aid of the Acushnet Process Company Golf Ball Division.

These people who have been very cooperative with me in this study, take pH value, color, and iron tests daily, as variations in these test results play a critical part in the manufacturing of golf balls. Comparative tests between our colorimetric method of testing pH and their more modern photo-electric method of testing pH were quite close. They also furnished a two-year record, January 1961 to September 1962, of their findings which indicate a pH range of water delivered to their factory of 5.2 to 5.9, and possibly a slight correlation between our chlorine residual increase (during summer months) and decrease in pH during the same period.

There appears to me to be only one conclusion to be drawn from this study, and that is the required chlorine dosage that this city must maintain in the water for bacteriological protection of the public has a side effect of causing the already slightly acid water to become very acid and we know that although other factors enter the picture, corrosion of metals in water is much more rapid in acid than in alkaline waters and the degree of corrosion increases with the increase in acid conditions (or the lowering of the "Hydrogen ion" Concentration).

Due to our limited methods of analysis, I believe a competent water chemist should be retained as soon as possible, to determine what proper actions should be taken to alleviate this problem, and also to check the water further to discover whether or not other factors are entering into this problem.

I believe a soda ash additive will be required, plus necessary machinery to inject this material into the water to correct this corrosive condition. Other more appropriate methods may also be available that I presently am not aware of and other conditions may be evident that an experienced water chemist would discover.

In any event, we have a condition that must be corrected. There may be various ways to correct this problem. The important thing is that something is done as soon as possible in an inexpensive way as possible involving machinery or apparatus, that is no more complex than required to do the job.

I believe sincerely that this consideration on the corrosiveness of New Bedford water is the most important consideration of the New Bedford Water Department today.

"COLOR IN NEW BEDFORD WATER"
PART 1 OF REPORT TO WATER BOARD

Submitted by Nathan S. Ellis, Supt.

November 8, 1962

Color in New Bedford water is produced by the solution, in colloidal form, of partly decomposed vegetable matter, and although little sanitary significance can be attached to the amount of color in the water, the appearance of the water is very much affected by high color.

Also a "taste and odor" increase may be noted with an increase in color due to the same decomposed vegetable matter. Of course, both "Color" and "Taste and Odor" are objectionable to the consumer to varying degrees.

During the twenties and early thirties, a great deal of effort was expended by the New Bedford Water Department in color control at the Lakeville ponds which comprise the source of water to the City of New Bedford. Draining swamps, straightening and deepening brooks and building dams and causeways improved the color conditions by allowing less water to flow over the swampy areas, thereby picking up less color-causing vegetable matter.

Color control work was planned to continue at the time, especially in the Black Brook area which contributes the highest percentage of color to New Bedford water. However, apparently lack of funds caused the work to cease before the Black Brook area could be improved further.

Black Brook is the major source of water to Great Quittacas pond and the major source of color of New Bedford water. Color in Black Brook waters ranges from a low of about 85 to a high of over 300 with an average between 130 and 190. This water mixes with the waters of Great Quittacas, Pocksha (color range 25-50), and Little Quittacas. This mixing, plus the natural bleach-

ing action of the sun during storage lowers the color to 30 to 40 at the Little Quittacas Intakes.

Much of the work done in the past is of a permanent nature and the effects are lasting. Some of the ditch work becomes overgrown and effort is required to keep these brooks clear of obstructions so that the effect of the original work will not be lost.

The minimum effort by the New Bedford Water Department over the last few years in color control, ditch work, etc. due to lack of money and labor has caused the color to increase only slightly, according to the records of the department. Color at the intakes at Little Quittacas during 1930-35 ranged from a low of 26 (average for 1930-31) to a high of 42 (average for 1934). A low of 30 (average for 1961) and a high of 42 (average for 1959) were recorded during the period 1959-1961. The amount of rain and the pond levels play an important part also in the color recorded and during periods of high rainfall and high levels, more color is evident in the water than at other times. This condition is due of course, to the water standing in and over the swampy areas during high level periods.

Although no great color increase is evident over the past 30 years, no improvement is evident either. The color of New Bedford water is still much in excess of the U. S. Public Health Standard of 20 and should if possible, be reduced.

Modern machinery and methods if made available, could I believe improve the color problem greatly. Permanent improvements such as ditching, deepening pond edges, filling small swamp areas, would improve color conditions and would require little maintenance, as evidenced by the past. Other advantages to this work, would be storage increase (in some instances) and taste and odor improvement.

Due to the character of the source of our New Bedford water, I do not believe the color problem can ever be eliminated without expensive filter plants which for color alone are not warranted. The color condition can be improved however, by continuing the work that was extensively carried on in the past.

NEW BEDFORD WATER SUPPLY
AVAILABLE SUPPLY, PRESENT CONSUMPTION,
FUTURE NEEDS

Water was first delivered through a publicly owned water system to New Bedford on November 25, 1869. The source of supply was created by damming the Acushnet River, and constructing a brick conduit five miles long from the dam into a receiving reservoir on Coggeshall Street. From this reservoir, water was pumped through the Purchase Street Pumping Station to the Mt. Pleasant Reservoir. This system had a capacity of about five million gallons per day, and the elevation of the reservoir on Mt. Pleasant Street was too low to supply all parts of the city.

In the late 1880's, it became apparent that the need for water by the city and its industries was greater than could be met through the Acushnet System. Chapter 345 of the Acts of 1894 authorized the City of New Bedford to take the waters of Great and Little Quittacas Ponds, build dams, pumping station, force mains, reservoirs, and other appurtenances for additional supply purposes. Water from the Quittacas System was first delivered on July 10, 1899. Since that date, all water supplied through the distributing mains of our system has been drawn from the Quittacas Supply.

The Acushnet Supply is abandoned except to the extent that water to the amount of about one million gallons per day is furnished without pressure to the Revere Copper and Brass Company for industrial processing only.

The City of New Bedford furnishes water, at the present time, to a small number of services, to both Lakeville and Freetown and in much larger quantities to the towns of Acushnet and Dartmouth, although Dartmouth's consumption is now drastically reduced due to the development of a series of wells within the town proper.

New Bedford has no independent water supply for industrial use, so that the bulk of the City's industrial water comes from the domestic supply. The one exception to this is the Revere Copper and Brass, before mentioned.

The yield of the Great and Little Quittacas Ponds has been estimated at about ten million gallons per day over a period of dry years. This estimate of safe yield may be high as evidenced by an "Engineer's Summary" of a study done for the "Southeastern Massachusetts Water District Commission, Dated December 2, 1953", in which the report states a safe yield for these two ponds to be nearer nine million gallons per day. For the sake of this writing, I will continue to use the ten million figure.

After World War I, it appeared that the needs of New Bedford for water were nearing the capacity of the Great and Little Quittacas Ponds. After study of the matter and report of a joint board to the State Legislature, Chapter 400 of the Acts of 1924 made provision for the allocation of the waters of Long, Assawompsett, and Pocksha Ponds between the Cities of New Bedford, Fall River, and Taunton. The Act is sometimes called the "Tri-City Act."

In general, the Act permitted the City of New Bedford to withdraw not exceeding an average daily amount of eleven and one-half million gallons from Pocksha and Assawompsett Ponds; Taunton, not exceeding eight million gallons per day from Assawompsett Pond; and Fall River, not exceeding eleven and one-half million gallons per day from Long Pond. The Act also stipulated that the City of Fall River, before withdrawing water from Long Pond, must acquire all right, title, and interest to the waters of North Watuppa Pond, and that in the event a dam should be constructed to impound the waters of Long Pond, it must be arranged so that the maximum difference in elevation between Long Pond and Assawompsett Pond would be six inches.

In accordance with the authority granted by Chapter 400, the City of New Bedford installed a connection between Pocksha Pond and Great Quittacas Pond on Long Point Road at the town line between Lakeville and Middleboro.

The water consumption of the City of New Bedford remained at or near an average of ten million gallons per day from 1915 until 1940 so that no appreciable amount of water was withdrawn from Pocksha Pond until the latter and subsequent years.

From 1940 to 1956, the average daily water consumption in New Bedford rose to a maximum in 1956 of twenty and three-quarter million gallons. From 1956 to 1961, a decrease is noted to a low of slightly over eighteen million gallons in 1961, due to a slackening of industrial activity during this period and a loss of most of the town of Dartmouth, which now has wells of its own. Since 1961, the trend has been for water consumption to increase once more and during 1962 an average daily consumption is noted of just less than nineteen million gallons.

Severe droughts during 1949 and again in 1957 lowered the water surface of the Lakeville Ponds further than ever before observed. The combination of the increasing demand for water in New Bedford and the alarming depletion of the Lakeville Ponds in 1949 and 1957 pointed up the need for a re-examination of the probable safe yield of the Lakeville Pond watershed and the allocation of the total available quantity.

Under Chapter 400 of the Acts of 1924, the so-called "Tri-City Act", New Bedford may withdraw from Assawompsett Pond an amount of water not exceeding a daily average of 11,500,000 gallons. It is estimated that the safe yield of Great and Little Quittacas Ponds which is also allocated to New Bedford is 10,000,000 gallons per day.

Thus, there is now a total of 21,500,000 gallons per day available and allocated to New Bedford. We are now using about 88% of this total; and, if the recent rate of increase continues, we will require the total amount in a very few years.

Fall River has never exercised its rights granted under Chapter 400 of the Acts of 1924 although both Taunton and New Bedford have done so. Whitman and Howard, Consulting Engineers, in a "Report to the Watuppa Water Board in Relation to Improving the Water Supply of Fall River", dated August, 1950, stated their conclusion, (Page 8), that the whole project of Fall River's taking water from Long Pond is completely out of reach financially; and found three other possible sources with a combined total daily yield of 11,600,000 gallons which they considered feasible and preferable to the development of Long Pond as a source of additional water for Fall River; and

We have grave doubts that the total of the allocations granted by Chapter 400 can be counted upon in a series of dry years, or even in one very dry year.

It has previously been proposed that the Cities of New Bedford and Taunton petition for the rescinding of any and all rights in the waters of the Lakeville Ponds which have been granted Fall River by Chapter 400 of the Acts of 1924, and that such rights now granted Fall River be re-apportioned between New Bedford and Taunton after a careful re-evaluation of available safe yield at these lakes is made.

It has previously been stated that the City of Fall River has spent about \$197,000 on the study and development of water rights and damages in connection with Long Pond. This amount has not been agreed to by the City of New Bedford. In case an agreement could be reached with the City of Fall River, under the terms of which they would relinquish all rights to Long Pond in return for reimbursement by the Cities of New Bedford and Taunton for all expenditures in connection with the Long Pond development, it would appear reasonable that New Bedford would bear two-thirds and Taunton one-third of the cost of such reimbursement.

On December 2, 1953, the Southeastern Massachusetts Water District Commission, a recess commission of the General Court of Massachusetts, submitted a study and report on present and estimated future water requirements of the cities and towns of Bristol and Plymouth Counties.

Recommendations and conclusions accompanying this report included certain suggested changes in order to increase the available water to the City of New Bedford and Taunton by:

1. Fall River relinquishing its rights to the waters of Long Pond, and
2. By the diversion of Fall Brook in Middleboro to the Lakeville Ponds.

No concrete progress has yet been made along the lines as recommended by the S. M. W. D. C., although three meetings between Fall River, New Bedford and Taunton were held between November 18, 1958 and March 4, 1959. At the last meeting between the three cities, it was agreed that Fall River would submit a revised breakdown of costs on Fall River's expenditures

made in the Lakeville Ponds area under Chapter 400 Acts of 1924. The City of New Bedford and the City of Taunton appeared at the time to agree to reimbursing Fall River for any reasonable expenses the City may have had in exchange for Fall River's relinquishing its rights to the Lakeville Ponds. To date, Fall River has not submitted the revised breakdown of costs as agreed on March 4, 1959.

It is my opinion, as it was the opinion of my predecessor, that efforts should begin once again to increase our available water supply by continuing the negotiations begun in 1958 between the three cities involved until a satisfactory solution can be reached. This problem must be resolved before we can reasonably pursue any physical means of impounding more water in the Assawompsett Pond area. After all, what good would it be to increase the available water in Assawompsett Pond if we are still limited by Legislative Act to 11,500,000 gallons per day from this course?

I further recommend that once Fall River's rights to the Lakeville Ponds are eliminated, the Cities of New Bedford and Taunton should begin planning legislative procedures to divert Fall Brook, Middleboro, into Assawompsett Pond, as recommended by the S. M. W. D. C. report of 1953, or by some other means, plan to further increase the water available to the two cities.

Unlike most communities, New Bedford can not intelligently estimate future water consumption based on population trends.

To illustrate this fact, the following figures taken from the 1962 annual report should be of interest:

Total metered accounts at end of June, 1962 — 20,048.

Total year's consumption of above accounts — 6.36 billion gallons.

Number of accounts using over 15 million gallons per quarter — 13.

Total year's consumption of these 13 accounts — 3.59 billion gals.

Thus it is shown that 56% of all the water supplied by the New Bedford Water Department in the period July 1, 1961 thru June 30, 1962 was used by only 13 of the 20,048 accounts. The effect of large industrial water

users is easily seen. Additions or subtractions of large water users to New Bedford can change the picture greatly and quickly.

Today, New Bedford's water supply may be considered adequate for the moment. The addition of more than one heavy industrial water user (or equivalent increase of smaller users) to New Bedford's economy will unquestionably put a strain on our present water resources. I believe that New Bedford's available water resources should be increased by at least 3.5 million gallons per day (average) as soon as possible, and further increase 8.5 million M. G. D. (average) to bring the ultimate safe yield to 30 M. G. D. safe yield (average day) by 1970.

NEW BEDFORD WATERSHED SANITARY CONTROL

New Bedford's water comes from Little Quittacas, Great Quittacas, Pocksha, and Assawompsett Ponds, which are located in the Towns of Lakeville, Freetown, Rochester, and Middleboro.

It has been the practice of the New Bedford Water Department, since the beginning of the Works, to depend heavily on natural purification of the water supply through control of the watershed lands, thus preventing pollution as far as possible and gaining purification of the water through the benefits of the natural elements and storage.

The basic idea behind the development of New Bedford's water resources was that water is naturally pure, and that people cause pollution through misuse of watershed lands and waters. If control of the watershed land and waters is adequately maintained, the water can be delivered to the consumer without further treatment. Today, Public Health authorities do not consider this type of treatment enough and chlorine is required as a final safeguard to pollution.

New Bedford began a practice of acquiring watershed lands to protect the water resources as far back as the middle of the nineteenth century. This practice continues today under the Legislative authority of Chapter 400 of the Acts of 1924. At the present time, New Bedford owns over 3,500 acres of watershed lands.

Due to the close control of the watershed lands, for many years nothing was done to the water prior to delivery to the consumer, except screening out marine life, twigs, leaves, etc., at the pump intakes. It was not until the middle 1940's, that chlorine was added to the water for sterilization purposes, and as of this date, chlorine is still the only unnatural treatment received by the water before delivery to the consumer. (See corrosive problems of New Bedford water in a separate section of this report).

In recent years, legal encroachment on parts of the watershed and waters have been made. Legalized fishing by boat has been allowed for the past few years and horseback riding, blueberry picking, etc., etc., have been allowed by permit. This type of use in itself, properly controlled, does not seem to be detrimental to the watershed except of course, these uses represent beginnings to more and varied recreational uses in the future.

Illegal use of the watershed and ponds of the water system has increased greatly in the last twenty years. Swimming, illegal boating, water skiing, misuse of watershed lands and various forms of vandalism have become a serious problem on Pocksha and Assawompsett Ponds, and, to a lesser extent, on Great Quittacas Ponds.

Private lands bordering upon the waters of the reservoir ponds (Assawompsett or Pocksha) or tributaries to these or the Quittacas Ponds, have been developing at a more rapid rate than in the past, in spite of legal and sanitary restrictions to the use of the ponds themselves or the watershed lands bordering the ponds.

One such area known as "Betty's Neck" is contemplated for development to include hundreds of homes, many of which will have access to Pocksha or Assawompsett Ponds shorelines. If the sanitary regulations of the State of Massachusetts Department of Public Health can be met in this instance, I believe the development will proceed as planned and thousands of additional people will be living in close proximity to New Bedford's drinking water supply.

Eventually, if present trends continue (legal and illegal), one of two courses of action will be forced onto the City of New Bedford:

1. A uniformed ranger patrol adequately equipped to maintain constant supervision over the waters and

watersheds under the control of New Bedford, and to check permits and enforce sanitary regulations at all times.

2. A complete treatment works at a cost estimated at well over a million dollars, and a continuing operational cost of the treatment works for salaries, maintenance, and chemicals at an approximate cost of one hundred thousand dollars yearly.

It is my opinion that the people of New Bedford would be best served by the first course of action.

NEW BEDFORD WATER DEPARTMENT
NEEDS WITH REGARD TO
REPLACEMENT, REFURBISHING, AND EXPANSION
OF THE EXISTING DISTRIBUTION SYSTEM
PIPES AND VALVES

The oldest water mains now in service in the New Bedford Water Distribution system were originally laid by the City at the time the City began drawing water from the old Acushnet reservoir (now abandoned for domestic water supply) in 1867.

For many years, the pipe used was of the pit-cast cast iron unlined type. As improvements in the manufacture of water pipe became evident, New Bedford graduated from the pit-cast variety of cast iron pipe to bitumen coated cast iron and finally to centrifugally spun cement lined and bitumen coated cast iron pipe as is used today. In recent years, cement asbestos water lines have also been used in the smaller sizes. One 48 inch steel line laid in 1897 and cement lined in the early 1930's and a 48 inch and 42 inch Lock Joint Concrete pipe complete the inventory of water mains in the transmission and distribution system of New Bedford.

With the exception of the steel main before mentioned, the City has never entered into a program of cement lining of existing cast iron lines and as a result of this and the chemical nature of the water, a great deal of tuberculation of the iron mains has resulted with the resultant decrease in the carrying capacity of the unlined and bitumen coated pipes. In many instances, this decrease in carrying capacity is presently of little importance inasmuch as the mains in question

are still more than adequate for the amount of water drawn through them. In other instances especially in the smaller sizes, the decrease in carrying capacity has necessitated or will necessitate replacement of the main.

Of course, the effect in each case is not now known as much further study in this matter would be necessary to accurately evaluate each main and its ability to carry sufficient volumes for future needs. This report is intended to be of a preliminary nature only.

As a beginning toward this study a master plan of the distribution system has been developed. On this plan is noted the size and location of each main in the distribution system and as an aid in future studies as to condition, each main has been marked as to type and year laid. Thus it is assumed that during the course of future investigations heavily tuberculated pipes of poor carrying capacities will be found. It is logical to assume that pipes of similar size, of the same type, under similar draw conditions, and laid at approximately the same time, will exhibit somewhat similar flow characteristics. This comparison will thus aid future refurbishing and renewal programs as these programs are developed.

There are about 260 miles of water mains, ranging in size from four inches to 48 inches, in the transmission, supply, and distribution system. The transmission mains extend from Little Quittacas Pumping Station to High Hill Reservoir, there being two mains 48 inches in diameter. There are two 36 inch and one 42 inch supply mains extending from High Hill Reservoir to the distribution system; there is also a 48 inch and 36 inch by-pass supply main extending from the 48 inch transmission mains at Middleboro Road and this supply main serves as part of the distribution main system in Acushnet Avenue.

The most important part of the distribution system is a 36 inch and 30 inch loop main which extends from Park Avenue in the north to Rivet Street in the south. The loop main is supplied with water by three 36 inch supply mains at its northern end and one 42 inch main at Smith Street and Park Street in the western side. The loop is cross-connected with smaller pipes, forming part of the distribution pipe system.

Engineering tests run in 1955 reported as follows with regard to carrying capacity of certain of the larger mains:

"Our tests showed that the friction factor of the 48 inch and 36 inch by-pass supply main in Acushnet Avenue corresponds with C-90, of the commonly used Hazen Williams hydraulic formula. The friction values of the 36 inch supply mains from High Hill Reservoir correspond with C-80. The friction values found for the distribution mains are of the same general magnitude as the supply main values." (C factor for new centrifugally applied cement lined cast iron pipe is between 140 and 150.)

It can be shown that cement lining on existing pipe that exhibits a C factor of only 80 will increase the available flow through the line at the same hydraulic gradient over 1.5 times. It may also be shown that if the required flow is held constant, a considerable improvement in available pressure at the distribution end of the line can be expected.

All of the above mains tested are of the unlined cast iron type and all are tuberculated and have lost certain of their original carrying capacity as indicated. The mains discussed were laid between 1896 and 1920.

Due to the extreme importance of the transmission mains and the 30 inch and 36 inch loop mains, it is recommended that a program of refurbishing these mains be begun so that eventually the carrying capacity and condition of these mains will be improved to the benefit of the City.

In refurbishing these mains it will be necessary to cement line the pipes and repair or replace some of the large gate valves. Naturally a good deal of money is involved because very little of this type of improvement has been done in the past.

It would be appropriate to set aside a certain sum of money for this purpose to begin this refurbishing program in areas contemplated for urban renewal or major highway or civic projects, where the refurbishing of the mains now would prevent the tearing up of new expensive pavements at a later date.

For example — the eastern or lower part of the 30 inch and 36 inch loop mains begins at Cedar Grove

Street and Ashley Boulevard, goes south on Ashley Boulevard to Logan Street, then east one block on Logan Street to Acushnet Avenue. This main (a 30 inch unlined cast iron pipe) travels south on Acushnet Avenue from Logan Street to Second Street and then south on Second Street all the way to South Street. A major section of the streets covered above will be replaced by the so-called Down Town spur connector from proposed Route 195 to the Fairhaven Bridge. It will be unfortunate if the City has to repair this 30 inch main at the expense of the pavement of the Down Town spur connector after the spur is completed.

In conclusion, I recommend that the minimum sum of \$200,000 be set aside to begin cement lining and otherwise refurbishing certain of the most important water mains in the New Bedford system. This sum would aid the City in a sound beginning of this most important undertaking.

REINFORCEMENT OF THE EXISTING DISTRIBUTION SYSTEM

The following recommended improvements are based on limited investigation and available information. As before mentioned, this report is intended to be preliminary. Further investigation into the needs of reinforcing or refurbishing sections of the New Bedford Water Distribution System is desirable.

1. Certain improvements were recommended by engineers in a report issued to the City in February, of 1955, pertaining to the reinforcement of New Bedford's Water Distribution System. Most of these recommended improvements have been carried to completion. One recommendation remaining of considerable significance is that a 24 inch cross-connection main should be built in Hillman Street (or between Hillman and Willis Streets) to connect the 30 inch loop at Park Street with the 30 inch loop at Second Street.

The purpose of this cross connection is to reinforce the Second Street 30 inch main by supplying a more direct supply from the then proposed (now installed) supply main from High Hill to the 30 inch loop at Park Street.

2. Indications are that it will be necessary within the next few years to reinforce the 12 inch cast iron water main in Belleville Avenue by installing a line from Ashley Boulevard to Belleville Avenue.

This existing cast iron main supplies a group of New Bedford's heaviest water consumers. Fire Underwriters' tests have indicated to me that due apparently to increased tuberculation of the mains and increased consumption, available fire flows in the area have been gradually decreasing. Although a critical condition does not now exist, graphic illustrations indicate that a problem is in the making. More study is needed on this problem before definite conclusions are reached.

3. Parts of the present 6 inch (increased to 8 inch in the river channel) water line from New Bedford at Front Street across and under the New Bedford-Fairhaven Bridge to Pope's Island and Fish Island need to be replaced. Indications are that parts of this main in the vicinity of Front Street are in very poor condition.

This pipe is the only supply to Pope's Island and Fish Island and due to the submerged section (across the channel south of the bridge draw) is difficult and expensive to repair. This is especially true during winter months under emergency conditions.

It is recommended that a dry line for emergency use only be installed from the Fairhaven Water Company's 10 inch main in Main Street to connect to the eastern end of the water line in Pope's Island. This emergency line of 4 inch or 6 inch size would insure water to Pope's Island and Fish Island in future instances where repairs or replacement of parts of the existing water line are necessary, and at the same time avoid the necessity of expensive crash programs when repairs to the existing line are made.

4. A program to eliminate dead end water lines should be continued to insure new and existing areas where these ends exist of better quality water and fire protection.

5. The possibility of a network analysis of the New Bedford Water System should be explored. Modern methods of network analysis by electronic computer

methods can aid greatly in the overall efficiency of any distribution system by indicating where reinforcement is needed.

New Bedford's water system has grown over the past twenty to thirty years, but the water needs of certain sections due to the changing of land use and industrial diversifications have also changed the requirements on sections of the water system. This changing of water requirements in sections of the City in some cases has reduced the load on the existing water mains. In other areas, the reverse is true. Land use changes in any given area of New Bedford will continue to have an effect on the water system.

DISTRIBUTION SYSTEM

Forty-six hydrants have been damaged as a result of traffic accidents. The total cost of repairs was \$5,803.94 and \$3,924.86 has been collected.

WATER REPORT

45 y

LEAKS

There have been twenty leaks on main pipe during the year, as herewith shown.

Date	Size	Location	Cause	Cost
Jan. 3	8"	Padanaram Ave., S x Cove Rd.	Cracked main	\$120.29*
Jan. 29	8"	In front of 421 Purchase St.	Joint leak	82.99*
Feb. 1	8"	Kempton St., 11.5' E x E line Park St.	Joint leak	99.76*
Feb. 1 and 2	36"	Smith St., 15.0' W x W line Park St.	Joint leak	263.10*
Feb. 8 and 9	16"	Borden St., 10.0' S x S line Bedford St.	Joint leak	110.67*
Feb. 9	20"	State St., 191.0' N x N line Austin St.	Joint leak	121.30
Mar. 20 and 21	4"	South bell of cross at Hill and Mill Sts.	Main leak	122.98*
Apr. 5, 6 and 9	6"	New Bedford-Fairhaven Bridge 2.0' E x 2nd hydrant on W. side of drawbridge	Cracked main	404.33
May 18	8"	Ridgewood St., 240.0' N x N line Hillcrest St.	Joint leak	30.51
May 23 and 29	8"	New Bedford-Fairhaven Bridge	2 joint leaks	165.66
June 19	8"	Hillman St., at E. line No. Water	Broken main	86.34
June 22	6"	Lindsey St., 57.0' S x S line Smith St.	Joint leak	56.07*
July 20	6"	Coffin Ave., W x W line Riverside Ave., 184.0'	Broken main	108.96*
July 25	8"	Hillman St., 65.0' W x W line No. Water St.	Main leak	52.73*
Sept. 11 and 13	42"	Smith St., W. line Park St.	Joint leaking	234.94*
Oct. 1	6"	Becket St., 27.8' W x W line Adelaide St.	Cracked pipe	62.50*
Oct. 16	8"	Hillman St., 17.2' W x W line No. Water St.	Main leak	86.56*
Nov. 6	8"	Shawmut Ave., 30.0' S x Center 1st hydrant N x Nash Rd.	Cracked pipe	49.10
Nov. 21	8"	Hillman St., 7.2' W x E line Second St.	Joint leak	87.05*
Nov. 26	6"	Becket St., 28.0' W x W line Adelaide St.	Cracked pipe	61.41

*No actual payment made for cost of street repairs.

15,157 feet of distribution pipe, in sizes from 4 inch to 16 inch, were added to the system during the year and none was removed.

109 feet of distribution pipe less than 4 inches has been laid and 0 feet removed. The total length now in use is 11,300 feet.

One hundred nineteen stop gates have been set and three of those previously set have been removed. The total number now in use is 3,648.

The total number of small size gates now in use is 93.

The total number of waste gates now in use is 229.

The total number of air taps now in use is 228.

Eighteen private gates have been set and three of those previously set have been removed. The total number now in use is 1,097.

Twenty-nine new hydrants have been set and five of those previously set have been removed. The total number now in use is 2,141.

The total number of water cart hydrants now in use is 21.

The total number of sprinkler cart hydrants now in use is 8.

One hundred forty-nine service pipes have been laid and seventy-three of those previously laid have been removed. The total number now in place is 23,273. Of this number, three hundred fifty-five are unmetered fire services, nineteen thousand nine hundred seventy-two are metered, and the balance, two thousand nine hundred forty-six are not in use.

Three hundred thirty-four service leaks have been repaired.

Three hundred fifty-one taps have been cleaned as follows:

Rust 304; trouble inside 47.

One thousand eight hundred ninety-six meters have been removed for repairs, and one thousand seven hundred eighty-four have been reset. Also one hundred seventy new meters have been set for the year, making the total number in use 19,972.

WATER REPORT

47 y

CONSUMPTION OF WATER

The consumption of water for the year has been as follows :

Month 1962	Monthly Consumption				Daily Average Consumption
	New Bedford	Dartmouth	Acushnet	Total	
	Gallons	Gallons	Gallons	Gallons	Gallons
January	540987400	501850	6110250	547599500	17664500
February	481527500	539250	4799250	486866000	17388071
March	556416450	387750	4468500	561272700	18105571
April	521092850	652900	4725750	526471500	17549050
May	586232650	1389900	5217750	592840300	19123881
June	609380950	6581450	7653000	623615400	20787180
July	573995550	8778400	6683250	589457200	19014748
August	649385100	10546750	6363750	666295600	21493407
September	577798350	2310850	6622500	586731700	19557723
October	593685850	547150	4762500	598995500	19322439
November	544705500	468000	4785000	549958500	18331950
December	556324950	514500	6389250	563228700	18168668
Totals	6,791,533,100	33,218,750	68,580,750	6,893,332,600	18,885,843
Averages	18,606,940	91,010	187,892	18,885,843	

Maximum daily consumption — (24 hrs.) — Aug. 6.....27,292,000

Minimum daily consumption — (24 hrs.) — Mar. 11.....10,579,900

Average daily consumption — 6 a.m. to 6 p.m.11,044,461

Average night consumption — 6 p.m. to 6 a.m.7,841,382

Amount of water consumed shown on above table includes the supplying of about 119.45 miles of distribution pipes located in the adjoining towns of Dartmouth and Acushnet. Dartmouth supplies 12,645 consumers, of which 723 are summer residents, through 4,215 taps. Acushnet supplies 5,252 consumers through 1,281 taps.

COMPARISON OF THE CONSUMPTION OF THE YEAR 1962 WITH THE
RECORD OF THE 81 PREVIOUS YEARS

*Includes population supplied in towns of Dartmouth and Acushnet 5,496 taps, 17,897 consumers.

†This consumption is for eleven months.

‡This consumption is for thirteen months.

CONSUMPTION

The average daily consumption, 18,885,843 gallons, shows an increase over 1961 or 4.6%.

The following table shows the number of accounts, registration and income in the several steps of the sliding scale of rates:

DATA ON METERED CONSUMPTION AND REVENUE

July 1, 1961 through June 30, 1962

	No. of Accts.	Number of gallons		Receipts for metered water		
		Total Gallons	Per Account	Total Receipts	Per Account	Per M Gallons
*Using less than minimum rate viz; 30,000 gallons per year	3,576	69,684,750	19,487	28,656.56	8.01	.411
Using over minimum rate but less than 75,000 gallons per quarter	15,900	1,316,030,250	82,769	264,117.29	16.61	.200
Using between 75,000 and 750,000 gallons per quarter	450	337,362,000	749,693	59,658.78	132.57	.177
Using between 750,000 and 7,500,000 gallons per quarter	100	648,277,500	6,482,775	94,257.74	942.58	.145
Using between 7,500,000 and 15,000,000 gallons per quarter	7	236,470,500	33,781,500	27,181.84	3,883.12	.115
Using over 15,000,000 gallons per quarter	13	3,591,987,000	276,306,692	128,189.10	9,860.70	.036
Totals and averages	20,046	6,199,812,000	309,279	602,061.31	30.03	.097
Town of Dartmouth Venturi Meter	1	25,881,600		3,012.25		.116
Town of Acushnet — special rate	1	54,074,250		6,517.43		.121
**City of New Bedford Departments Metered Water Department Use		57,143,250				
		23,073,750				
Grand Totals	20,048	6,359,984,850		\$611,590.99		

* Includes special assessment accounts

** Not charged to City of N. B. Depts.

The superintendent wishes to express to the Mayor, the Water Board, and the members of the City Government, appreciation of their assistance during the year; and to express his gratitude to the employees of the Water Department for their co-operation in serving the public.

Respectfully submitted,

NATHAN S. ELLIS,

Superintendent

Cast Iron, 4 inch.....	1	48
Totals.....	149	5951½

One 2 inch cast iron service has been removed and replaced with ¾ inch copper service.

Thirteen ½ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Thirty-eight ⅝ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Two ¾ inch heavy lead services have been removed and replaced with ¾ inch copper services.

One 1 inch light lead service has been removed and replaced with 1 inch copper service.

Thirty-four ⅝ inch light lead services have been removed and replaced with ¾ inch copper services.

Eleven ¾ inch light lead services have been removed and replaced with ¾ inch copper services.

Two 4 inch cast iron services, one 2 inch galvanized iron service, one 1½ inch copper service, one 1 inch heavy lead service, eleven ½ inch heavy lead services, twenty-seven ⅝ inch heavy lead services, two ¾ inch heavy lead services, two 1 inch light lead services, eleven ⅝ inch light lead services, fifteen ¾ inch light lead services have been removed.

No connections have been made to services.

The following extensions were made to services by takers:

161 ft. 3 inch copper tubing, 47 ft. 1¼ inch copper tubing, 1477 ft. 1 inch copper tubing, and 166 ft. ¾ inch copper tubing.

SUMMARY OF STATISTICS
FOR THE YEAR ENDING DECEMBER 31, 1962
IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION

NEW BEDFORD WATER WORKS

NEW BEDFORD
BRISTOL COUNTY, MASS.

GENERAL STATISTICS

Population by census of 1962 — 102,395.

Date of construction, 1866 to 1869, inclusive. Further supply, 1895 to 1899, inclusive.

By whom owned, City of New Bedford.

Source of supply.—Water was first introduced on Nov. 26, 1869. From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

In 1926, under Legislative Authority to take 11½ million gallons of water per day from Long, Assawompsett and Pocksha Ponds, a connection was made to bring water from Pocksha into Great Quittacas Pond, when needed.

Mode of supply.—Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6/10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distance, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52'). It is pumped through two 48 inch force mains 8¾ miles long to a distributing reservoir (capacity 67 million gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir, it flows into the city's distribution system by gravitation through two 36 inch cast iron pipes averaging 4 1/17 miles in length and one 42 inch pre-cast concrete pipe following a different course and approximately the same length. The concrete transmission line was put into operation in 1958.

It is also possible to pump directly to the city through a 48" and 36" main using the reservoir as a balance. This latter connection was completed in 1921.

The first named system is not now in use.

PUMPING STATISTICS

LITTLE QUITTACAS STATION

1. Builders of Pumping Machinery.

Electric Units

No. 1 10 million gallons per day centrifugal pump manufactured by DeLaval Steam Turbine Company, driven electrically by 400 H. P., 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.

No. 2 Duplicate of No. 1.

No. 3 15 million gallons per day centrifugal pump manufactured by DeLaval Steam Turbine Company, electrically driven by 600 H. U., 3 phase, 4110 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.

The three foregoing pumps are controlled by switches and automatic starting equipment in a switchboard manufactured by the Electric Machinery Company.

No. 4 30 million gallons per day centrifugal pump manufactured by DeLaval Steam Turbine Company, directly driven by 950 H. P. Baldwin locomotive type 6 cylinder supercharged Diesel engine, 600 R.P.M., manufactured by the Baldwin Locomotive Company.

Electric current purchased of New Bedford Gas and Edison Light Company.

Total installed capacity, 65 million gallons per day.

LITTLE QUITTACAS STATION — Pump 4 "Diesel"

2. Description of fuel used.

a. No. 2 Diesel oil.

b. Brand of oil — various.

c. Price of oil per gallon — delivered to Little Quittacas Station 10.78 cents.

3. Oil consumed for the year — 21,090 gals.

4. Total pumpage for the year — 423,130,000 gallons by Venturi meter.

5. Average static head against which pumps work — 171.0.

6. Average dynamic head against which pumps work — 196.0.

7. Number of gallons pumped per gallon of fuel oil — 20,063 gals.

8. Number of gallons raised 100 feet per gallons of fuel oil — 39.323 gals.

9a. Cost per million gallons raised into High Hill Reservoir — \$12.50.

9b. Cost per million gallons raised into High Hill Reservoir — diesel fuel only — \$5.37.

LITTLE QUITTACAS STATION — Pumps 1, 2, 3

10. Total pumping time for the year 14,411 hrs.
11. Total current used for the year 4,716,800 K.W.H.
12. Total pumpage for the year 6,473,731,120 gallons.
13. Number of gallons pumped per K.W.H. 1,372.
14. Number of K. W. H. required to raise one million gallons into High Hill Reservoir 729.
Cost per K. W. H. varies in accordance with amount consumed.
15. Average cost per K. W. H. \$.0114.
- 16a. Cost per million gallons raised into High Hill Reservoir, (Pumps 1, 2, 3) \$19.61.
b. Per power only \$8.29.
Total cost of pumping, figured on pumping station expenses, viz: \$132,255.74.
17. Per million gallons pumped \$19.18.
18. Per million gallons raised one foot (dynamic) — 10 cents.
Cost of pumping figured on total maintenance and interest on bonds (see financial CC + 44) less credits, viz: \$576,130.02.
19. Per million gallons pumped \$83.54.
20. Per million gallons raised one foot (dynamic) — 45 cents.
Cost of pumping figured on total maintenance, interest on bonds and bond payments (see financial CC + DD + EE) less credits, viz: \$804,130.02.
21. Per million gallons pumped \$116.39.
22. Per million gallons raised one foot (dynamic) — 62 cents.

STATISTICS OF CONSUMPTION OF WATER

1. Estimated total population at date (New Bedford) 102,395
Acushnet 6130, Dartmouth 16,000*124,525
2. Estimated population on lines of pipe*122,500

Year July 1, 1961 through June 30, 1962

4. Total consumption for the year6,779,901,300
5. Passed through meters6,359,984,850
6. Percentage of consumption metered93.8%
7. Average daily consumption18,575,072
8. Gallons per day to each inhabitant*149
9. Gallons per day to each consumer*152
10. Gallons per day to each tap (active)*719
11. Average rate received per million gallons metered\$96.16
12. Average rate received per million gallons consumed\$90.21

Year January 1, 1962 through December 31, 1962

13. Cost of supplying water, per million gallons consumed
figured on total maintenance (item CC) less
credits\$72.10
14. Cost of supplying water per million gallons consumed
figured on total maintenance plus interest on
bonds (CC + DD) less credits\$83.58
15. Total cost of supplying water per million gallons con-
sumed figured on total maintenance, plus in-
terest on bonds and bond payments (CC +
DD + EE) less credits\$116.65

*Includes population supplied in the towns of Dartmouth and Acushnet.

STATISTICS RELATING TO DISTRIBUTING SYSTEM

MAINS

1. Kind of pipe cast iron and steel.
2. Sizes, from 4 inch to 48 in.
3. Extended 15,157 feet during the year.
4. Discontinued 0 feet during year.
5. Total now in use 257.353 miles.
6. Cost of ordinary maintenance per mile including flushing and inspecting gates and hydrants — \$112.43.
7. Number of leaks per mile .078.
8. Length of pipes less than 4 inches diam. 2.14 miles.
9. Number of hydrants added during the year 24.
10. Number of hydrants public 2141.
11. Number of stop gates added during year 116.
12. Number of stop gates now in use, 3648.
13. Number of stop gates smaller than 4 inch, 93.
14. Number of blow offs, 229.
15. Range of pressure on mains, 16 lbs. to 91 lbs.

SERVICES

16. Kind of pipe; lead, cast iron and copper tubing.
17. Sizes, $\frac{1}{2}$ inch to 12 inch.
18. Extended 7802 $\frac{1}{2}$ feet.
19. Discontinued 2392 feet.
20. Total now in use 179.1082 miles.
21. Number of service taps added during year:

New Bedford	76
Dartmouth	166
Acushnet (decrease)	—43
Total added	199
22. Number now laid:

New Bedford	23,273
Dartmouth	4215
Acushnet	1281
Total now laid	28,769
Total now in use in N. B.	20,328
23. Average length of service 40.6 ft.
24. Average cost of service for the year.

(a) Gross	\$60.22
(b) Net (credit)	111.85
25. Number of meters to be added 58.
26. Number now in use, New Bedford only 19,972 (See Table T.)
27. Percentage of active service, metered 98 $\frac{3}{10}$ %.
28. Percentage of water receipts from metered water =100.

CITY ORDINANCES
PASSED BY THE CITY COUNCIL
of the
CITY OF NEW BEDFORD

From January 1, 1963 to December 31, 1963

THE BAKER MANUFACTURING COMPANY
- PRINTERS -
NEW BEDFORD, MASSACHUSETTS

CITY ORDINANCE**CITY OF NEW BEDFORD**

In the year One Thousand Nine Hundred and Sixty-Three

AN ORDINANCE**ELIMINATING THE USE OF METAL PLATES ON CLASS B
AND CERTAIN OTHER LICENSED VEHICLES**

Be it ordained by the City Council of the City of New Bedford
as follows: —

SECTION 1. Section 6 of Chapter 21 of the New Bedford
City Code as inserted in 1947 is hereby stricken out and the follow-
ing inserted in place thereof:

Sec. 6. Fee for vehicle licenses and identification cards
A fee of one dollar shall be paid to the city before the
issuance of a public vehicle license of either class and all
Class B licenses shall be furnished with an identification
card for each licensed vehicle which shall be kept in the cab.

SECTION 2. Section 10 of Chapter 17 of said Code is here-
by amended by striking out the words "and wagon plates" con-
tained in the first line and by striking out the entire first sentence
of the second paragraph.

SECTION 3. Section 12 of the aforesaid chapter is hereby
stricken out in its entirety.

SECTION 4. Section 13 of said chapter is amended by
striking out all references to "wagon plates" so that as amended
it will read:

Sec. 13. Same - Failure to wear or display badge as grounds
for revocation.

The wearing of the badge is hereby made a condition
of every license named in section ten of this chapter and
failure on the part of the licensee to wear the badge while
in the exercise of his license shall be cause for the revocation
of said license.

SECTION 5. This ordinance shall take effect in accordance
with the provisions of Chapter 43 of the General Laws, (Ter. Ed.).

CITY ORDINANCE

Personnel Policy Board

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-Three

AN ORDINANCE

ESTABLISHING A PERSONNEL POLICY BOARD FOR THE CITY OF NEW BEDFORD.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. There is hereby established within the municipal government an unpaid Personnel Policy Board to be composed of five (5) members appointed by the Mayor and confirmed by the City Council, as follows: One qualified through experience in personnel activities in business or industry or the Federal or State service; One a qualified retired city employee; One whose education and experience includes training in the area of labor management relations or allied fields; One to be qualified through experience as a top level management executive; and One shall represent the general public.

SECTION 2. Each member shall serve for a term of three (3) years or until a successor is appointed and confirmed. If an appointee shall resign or otherwise vacate his office, his successor shall be appointed in the manner of the original appointment for the unexpired term. Members of the Board shall elect their chairman annually for a one-year term and no member shall be eligible to succeed himself as chairman.

SECTION 3. POWERS AND DUTIES OF THE PERSONNEL POLICY BOARD — The Personnel Policy Board shall have the following powers and duties:

(a) Establish and maintain impartial and uniform personnel policies in accordance with standard procedures and practices consistent with the provisions of law.

(b) Conduct investigations and studies on all matters as may relate to the Personnel of the City of New Bedford.

(c) Make reports and recommendations to the Mayor and the City Council concerning methods for promoting economy, efficiency and avoidance of useless labor and expense in the conduct of the Personnel Administration.

(d) Review the duties and responsibilities of all classified and unclassified positions and compensation applicable thereto and shall recommend such allocation or reallocation of any such position to the appropriate salary grade as set forth in the salary schedule so that the principle of fair and equal pay for similar work shall be followed.

(e) Formulate an employee Grievance Procedure providing an established orderly method for the prompt disposition of employee grievances.

(f) Formulate a uniform plan governing overtime, vacations, sick leave and other leaves of absence.

SECTION 4. GRIEVANCE PROCEDURE — The Personnel Committee shall act as a Grievance Committee and shall hear appeals from any City employee who claims to be aggrieved subject to the following procedure which shall insure him or her a right to be heard and to just satisfaction or explanation.

(a) Employee shall first meet with his immediate supervisor and discuss his or her grievance; if not satisfactorily adjusted, the supervisor will arrange for the

(b) Employee to meet with the department head within three (3) working days of the meeting in (a); if not satisfactorily adjusted, the department head will arrange for

(c) Employee to meet with the Personnel Committee at their next regular meeting. He shall be represented by a person of his own choosing.

Before a final decision is reached by the Personnel Committee, the department head will be interviewed by the Committee. The decision of the Personnel Committee will be final and binding on all parties as prescribed by ordinance.

(d) The Personnel Committee shall hear appeals from any city employee aggrieved by any action of an appointive authority on any matter pertaining to his contract of employment. Such appeals for a review or hearing shall be made in writing within ten (10) calendar days of the occurrence of such action. Within five (5) days after the conclusion of the hearing the Committee shall render a decision which shall be final and binding upon all parties concerned.

SECTION 5. ADMINISTRATIVE AUTHORITY AND PROCEEDINGS — The Personnel Policy Board shall meet regularly once a month in at least ten (10) months of every year unless there is no current business before it and it may hold such special meetings as may be called by the Chairman or directed by vote of the Board. If any member of the Board is absent from three (3) or more

successive meetings the other members may by an affirmative vote request the Mayor to remove such absenting member from his membership, and if so removed the vacancy shall be filled in the manner provided herein for the unexpired term and no vacancy shall continue for more than thirty (30) days. Except as otherwise provided by law, the Personnel Policy Board shall have access to all facts, figures, records, and other information relating to the Personnel of all City Departments other than the School Department, and the same shall be furnished forthwith by any such department whenever so requested by said Board and in such form as it may prescribe.

SECTION 6. ANNUAL REPORT — The Personnel Policy Board shall file an annual report of its activities conformable to the requirements of the City Code.

SECTION 7. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

CITY ORDINANCE

Recreation Commission

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-Three

AN ORDINANCE

ESTABLISHING A COMMISSION ON RECREATION
AS AMENDED

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. There is hereby created a Commission on Recreation to be comprised of nine members, to serve without pay, appointed by the Mayor and confirmed by the City Council. Of the nine members originally appointed hereunder, three shall serve for terms ending December 31, 1963; three for terms ending December 31, 1964; and three for terms ending December 31, 1965; and thereafter as the terms of the original appointees expire, their successors shall be appointed for three year terms. All of the members of the Commission shall be residents of the City of New Bedford. At least two of the nine members shall be of the female sex; one of the nine members shall have had prior experience as a teacher or as a coach of athletics; one of the nine members shall be a member of the Board of Park Commissioners; and one of the nine members shall be a member of the New Bedford School Committee. The Commission shall elect one of its members to act as chairman for the Commission for the period of one year commencing January first of each year.

SECTION 2. The Commission shall provide, conduct, institute and supervise any form of recreation or cultural activity it deems advisable to insure the proper, constructive and wholesome enjoyment of the leisure time of the citizens of the City of New Bedford in all age groups. It may have care, custody and control and management of such public playgrounds, playfields, indoor recreation centers and other recreational areas and facilities as may be turned over to it by the proper public authority or authorities for such period and on such terms and conditions as the particular public authority or authorities may determine. The Commission shall manage, direct, equip and care for such properties placed under its supervision and accepted by it in compliance with its purposes.

SECTION 3. The Commission shall employ a Director of Recreation. The person now holding the position of Director of Recreation under Civil Service in the Park Department shall be transferred therefrom to the same position with said Recreation Commission. Thereafter, the Director of Recreation shall be ap-

pointed by the Mayor on the recommendation of the Commission, subject to the confirmation of the City Council. The Director of Recreation shall have at least five years prior training in the field of recreation, athletics and guidance. He shall serve as Clerk of the Commission and shall keep such records as the Commission may prescribe. The Director of Recreation shall receive such annual compensation as may be determined by the Mayor and City Council.

SECTION 4. The Commission shall make an annual report to the Mayor and the City Council and such other reports as the Mayor and City Council may from time to time request.

SECTION 5. An Ordinance "Establishing A Recreation Commission which was ordained on the 12th day of June, 1952 and approved by the Mayor on the 17th day of June, 1952 is hereby repealed, annulled and rescinded.

SECTION 6. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).
